

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

BUREAU OF STATISTICS OF LABOR,
ROOMS 250-258 STATE HOUSE,
BOSTON, JULY 15, 1901.

TO THE HONORABLE SENATE AND HOUSE OF REPRESENTATIVES:

I have the honor to transmit, herewith, the Annual Statistics of Manufactures for the year 1900, which have been collected and are presented in compliance with Chapter 174, Acts of 1886.

I desire to acknowledge the efficient assistance of Mr. Frank H. Drown, Second Clerk of the Bureau, who, as in previous years, continues in immediate charge of the Division of Manufactures, entrusted with the collection of material and its preparation for publication in this report, and also to thank Mr. Charles F. Pidgin, First Clerk, for his valuable services in an executive capacity.

Very respectfully,

HORACE G. WADLIN,

Chief.

PART I.

INDUSTRIAL CHRONOLOGY.
1900.

PART I.

INDUSTRIAL CHRONOLOGY—1900.

Abington. In January, Lilliputian Shoe Co.'s plant damaged by fire; in July, work of remodelling begun. *June.* Henry A. Owen, suspenders, removed to Boston and changed firm name to Hall & Owen. *July.* King Bros.' shoe factory destroyed by fire. *August.* Puritan Manufacturing Co. of Boston leased the old Buffum factory in this town and fitted it for manufacturing shoe machinery findings. *December.* Geo. J. J. Clark & Co., house finish, sold to Edward Billings.—*During the year,* A. C. Woodward built an addition, 2 stories, 80 x 46 feet, and installed new looms.

Acton. In October, fire destroyed two buildings of the cider plant of Henry Barker & Co.

Acushnet. In the early part of year, boat-building shop of Eben F. & Chas. F. Leonard destroyed by fire.

Adams. In January, Renfrew Manufacturing Co. shut down on account of accident to machinery. *February.* No. 4 mill of Berkshire Cotton Manufacturing Co. and lower mill of Renfrew Manufacturing Co. damaged by high water; work suspended temporarily. *March.* Work resumed at the Adams Marble Quarry. *June.* Berkshire Cotton Manufacturing Co. added new machinery; in July, installed telephones in every room in the mills to connect with main office; later, shut down for annual repairs, and replaced the wooden flume which connected Mills 1 and 3 with an iron one. *August.* Renfrew Manufacturing Co. sunk a number of artesian wells in preparation to the concentration of its bleaching work at Renfrew village. *September.* James Renfrew of the Renfrew Manufacturing Co., died, aged 60 years. *October.* Renfrew Manufacturing Co. shut down owing to an accident to engine.—*Foundry of James Hunter Machine Co. shut down and work transferred to North Adams. November.* Greylock Shirt Co. shut down temporarily.—*Berkshire Cotton Manufacturing Co. ran several looms weaving silk as an experiment. December.* Wood-turning shop of Frank G. Higgins, builder, and harness shop of Robert Christy destroyed by fire.

Agawam. In May, work begun by Edson W. Lindsey in the Porter distillery which had been shut down since June, 1899. *July.* Agawam Co., woollens, shut down for vacation.

Amesbury. In January, the Carriage Machine Co. moved into larger quarters.—*Briggs Car Works increased capacity. March.* Scott Grain Co. incorporated, to succeed Adam Scott, under Massachusetts laws. *June.* Merrimac Hat Co. began manufacture of hats for women in addition to the regular product of men's hats; in August, shut down for repairs. *August.* Chas. D. Pecker, shoes, retired from business; no successor. *September.* Miller Bros., carriages, moved into larger quarters. *October.* Fox, Fenerherm, & Mentz purchased buildings formerly occupied by Essex Leather Co. and began the manufacture of shoe tips, and carriage, trunk, furniture, and other grades of leather.—*Hamilton Woollen Co. replaced wooden water wheel with one of steel.—Lockwood & Brown discontinued manufacture of carriage wheels and were succeeded by Carr, Prescott, & Co.; old firm started in business later putting on rubber tires.*

Andover. In February, Newton Jaquith, shoes, retired from business; no successor. *March.* The Tyer Rubber Co. let contract for new brick factory, 112 x 176 feet, 4 stories; completed in December. *November.* Plant of Bay State Brick Co. absorbed by New England Brick Co.

Ashburnham. In January, Alfred H. Whiting & Co. began erection of chair factory, 50 x 150 feet, 4 stories; completed and dedicated in March.—*W. F. Whitney, chairs, shut down for two weeks.*

Athol. In January, H. H. Rice's shoe-box factory destroyed by fire; rebuilt. *February.* L. S. Starrett, Athol Machine Co., and Athol Gas & Electric Light Co. shut down temporarily owing to high water. *March.* Athol Machine Co. shut down again owing to high water. *June.* O. J. Powers & Son, formerly of Dana and Palmer, leased building to manufacture straw hats, removing machinery, etc., from latter town. *July.* Joseph Wilcox & Co., combs, began setting up machinery in new factory. *August.* L. S. Starrett shut down for vacation of two weeks and addition of new machinery; in October, Mr. Starrett bought control of the manufacture of steel tape measures and folding rules of John Campbell of New York; the third story of the Bennett & Van Valkenburg cotton mill renovated and fitted for this new business. *October.* Chas. M. Lee's Sons, shoes, shut down for balance of the year. *December.* Woollen mill of E. E. Partridge resumed operations after a shutdown of 2 years.—Wood-turning shop of Marshall Peckham damaged by fire.

Attleborough. In January, Hebron Manufacturing Co. added new machinery. *February.* S. Nelson Carpenter, jewelry, died.—Daggett Jewelry Co., of North Attleborough, purchased machinery, tools, etc., of D. D. Codding & Co., and removed same to its North Attleborough plant. *March.* Cornell-Andrews Smelting Co. organized; in May, began erection of smelting plant of brick, 53 x 102 feet, 2 stories. *June.* James H. Sturdy, retired jewelry manufacturer, died, aged 77 years. *July.* B. K. Manufacturing Co. incorporated under the laws of Rhode Island to manufacture jewelry; authorized capital \$3,000.—Horton, Angell, & Co., jewelry, shut down for two weeks' vacation.—C. M. Robbins shut down on account of the heat.—A. Bushee & Co. shut down for vacation.—James J. Horton, treasurer Bay State Optical Co., died. *August.* Oscar M. Draper, jewelry manufacturer, died, aged 58 years.—Chas. M. Robbins Co. incorporated to succeed to business of C. M. Robbins. *September.* Myers & McNary, jewelry, sold to P. J. Cummings & Co. *October.* Upper part of Hebron Manufacturing Co.'s brick storehouse at Hebronville destroyed by fire. *December.* Foundation started for factory, 45 x 100 feet, 4 stories, for H. W. Williams & Co., manufacturers of jewelers' stock.—Hebron Manufacturing Co. at work on addition to Hebronville plant.—Bay State Optical Co. incorporated to succeed to business of firm bearing same name.—During the year, James Orr built addition to dyehouse and installed new yarn dyer.

Auburn. In March, Otis N. Pond, retired woollen goods manufacturer, died, aged 83 years. *May.* Shoddy mill of James Hilton destroyed by fire; rebuilt. *November.* Plant of the Stoneville Worsted Co. sold at auction.

Avon. In January, Ira May, harness manufacturer, died, aged 88 years; he began business in 1828, manufacturing boots in the old-fashioned way, but gave it up and went into the manufacture of harness, continuing in this business until within a few years. *August.* L. G. Littlefield, shoes, shut down for one week, and again in September for the same period of time; in December, shut down on account of accident to machinery. *October.* The machinery at McCarthy's cider mill renovated so that the pressing could be done by steam power instead of hand power as formerly used.

Ayer. Blank book factory of Wm. M. Sargent, idle during entire year.

Barre. In May, Francis Willey & Co., of Boston, purchased the mill village variously known as Crossleyville, Dennyville, and South Barre, and made preparations for erection of new mill 800 feet long for manufacture of worsted tops.—White Bros. began manufacturing in plant of J. E. Smith in Smithville, which they purchased in October, 1899.

Becket. In June, machinery in abandoned Westfield Braid Co.'s mill moved to new plant in Westfield; later, M. E. Ballou & Son purchased the property to use in connection with their other works for the manufacture of baskets.

Belchertown. In August, the combination sawmill of Pratt Bros. destroyed by fire.

Bellingham. In February, work begun on foundation for new engine at Caryville Mills; in September, mills shut down to permit the installation of an electric plant.

Belmont. In November, New England Brick Co. absorbed plant of Bray Bros. & Co.

Bernardston. In January, C. S. Barber's saw and grist mill, which was burned in July, 1899, rebuilt and placed in operation. *July.* E. S. Hulbert & Co., cutlery, shut down two weeks for repairs.

BEVERLY. In January, L. P. Baker, shoes, discontinued and entered firm of J. H. Baker & Co. — C. H. Woodbury & Co., soda water and bottling, dissolved, and business sold at auction. — Frank Woodbury, shoes, shut down for 2 months. — Friend-Copp Co., boxes, succeeded by A. W. Copp & Co. *March.* Millett, Woodbury, & Co., shoes, changed over machinery. *April.* Beverly Engine & Machine Co. changed from private firm to corporation; authorized capital \$300,000. — Hall & Moses and Dustin Bros. started manufacture of shoes. *May.* Wm. F. Burns, leather, retired from business; no successor. — Putnam & Pope's lumber mill damaged by fire. *June.* J. A. Wallis & Sons, shoes, dissolved; F. A. Seavey & Co. succeeded. *July.* John Wilson, shoes, retired from business; no successor. *September.* Stephen B. Bray, retired shoe manufacturer, died, aged 67 years. *October.* The Upton Machine Co. of New York leased the vacant B. E. Cole factory for manufacture of automobile gearing and supplies.

Billerica. In February, main shaft at the new Talbot Mills broke causing shutdown for several days. — American Woollen Co. changed name of Faulkner Mills to Bay State Mills. *April.* Julian Talbot, retired chemical manufacturer, died. *June.* Works of Talbot Dyewood & Chemical Co. damaged by fire; in August, rebuilt. *September.* Water main at Bay State Mills burst and damaged stock and machinery; later, weave room shut down one week to allow finishing room to catch up; in October, shut down for repairs. — *During the year,* Talbot Mills built addition to weave and picker house; new dyehouse, 150 x 63 feet; new storehouse, 200 x 60 feet, and added new cards and looms.

Blackstone. In February, new looms added to Saranac Mills. — High water caused shutdown at Saranac Mills and Lawrence Felting Co. — Plant of East Blackstone Spinning & Dyeing Co. purchased by Alfred H. Lange; in August, plant sold to F. J. Gobeille for manufacture of woollen yarn; in November, plant again sold, this time to George Girard. *April.* New folder put on clearing machine in finishing department of the Saranac Mills. *July.* Saranac Mills shut down one week for vacation. *October.* Two new boilers installed in plant of Lawrence Felting Co. *December.* Saranac Mills shut down on account of scarcity of warps.

BOSTON. In January, Benjamin W. Dunklee died, aged 78 years; he was at one time proprietor and manager of the Wakefield foundry. — A building, for occupancy by Williamson & Sleeper, straw goods, 60 x 90 feet, six stories, begun; completed and occupied in May. — Bailey Manufacturing Co., perfumes, gave up manufacturing and disbanded.

February. United Shoe Machinery Co. absorbed William Gordon Co. and Seaver Process Lasting Co. — Foundation begun for bottling plant for Continental Brewing Co., one story, 50 x 104 feet; completed in May. — John J. Birkmaler & Co., cloth sponging, succeeded by Frederick Haartz & Co. — Jacob Pfaff, president H. & J. Pfaff Brewing Co., died, aged 71 years. — Fires for month: Samuel Usher, printer; J. P. & W. H. Emond, carriages; Putnam Bed Co.; and F. P. Martin & Co., cigars.

March. The Antique Glass Factory in South Boston sold to William Hack. — Chase Manufacturing Co., refrigerators, absorbed by the Liquid Air Refrigerator & Power Co. — Work begun on new building for J. G. & B. S. Ferguson to be occupied as bakery and stable, of brick, 100 x 100 feet, 4 stories; completed in August. — Plans made for addition to plant of Walworth Manufacturing Co., 40 x 60 feet, 1½ stories; completed in October. — Rufus Hart, of Hart & Osgood, iron founders, died, aged 69 years. — Abner J. Tower, oiled clothing manufacturer, died, aged 48 years. — Fires for month: William G. Bell Co., market and store fixtures; B. E. Hill, store furnishings; Peck Bros., printers; McIndoe Bros., printers; E. J. Drisko & Co., printers; Franklin Press, printers.

April. Hub Hosiery Co. incorporated; authorized capital \$10,000. — Boston Blacking Co. incorporated, succeeding private firm of same name. — Sleeper Patent Flexible Insole Co. absorbed by Peerless Machinery Co.

May. William P. Scott, boxes, retired; no successor. — Atlantic Box Manufacturing Co. sold to Samuel R. Sawyer, who continued.

June. Henry A. Owen, suspenders, moved from Abington and changed firm name to Hall & Owen; in October, sold to F. M. Hall. — American Heel Co. incorporated under Maine laws with authorized capital of \$100,000, for manufacture of shoe heels under special patents both as to machinery and product. — Brown & Kelsey, furniture, discon-

tinued manufacturing; no successor. — Edison Electric Light and Power Co. began work on erection of new engine room of brick, 129 x 80 feet, 1 story; completed in December.

July. Addition to factory of Thos. G. Plant Shoe Co. started, brick, 52 x 107 feet, 6 stories. — Peerless Machinery Co. absorbed the Rapid Power Eyeletting Machine Co. — A. F. Scott, earthenware, shut down during July and August. — Benjamin F. Smith, coffins, succeeded by A. L. Eastman. — J. H. W. Huckins & Co., canned soups, sold to Potter & Wrightington. — Winthrop Thayer, president of Thayer & Co., steam boilers, died, aged 37 years. — J. S. F. Huddleston, manufacturer meteorological instruments, died, aged 82 years. — N. F. Thayer & Co., shoes, shut down one week.

August. The Massachusetts Breweries Co., organized under laws of Virginia, absorbed the following plants: American Brewing Co., Alley Brewing Co., H. & J. Pfaff, Robinson Brewing Co., Hanley & Casey, William Smith & Co., Habich & Co., Franklin Brewing Co., and Continental Brewing Co., and began business under its consolidated title August 8; authorized capital, \$15,000,000. — Foundation started for addition to cigar factory of Walitt & Bond, 20 x 35 feet, 5 stories, to be used as a storehouse; completed in November.

September. J. C. Haynes & Co., banjos and mandolins, discontinued manufacturing. — H. S. Leonard & Co., wool soles, sold to Wiley & Son Co. of Hartford, Conn.

October. Work begun on new plant for Walter M. Lowney & Co., confectionery, 68 x 96 feet, 5 stories. — Star Brewing Co. began excavating for new pump house, 30 x 80 x 14 feet. — Kidder Press Co. closed plant and moved to Dover, N. H. — Dudley Feed Mills sold to Dodge & Tarbell.

November. Fire, caused by explosion of a hot water tube, slightly damaged shoe factory of Thos. G. Plant & Co. — Rosenfeld & Blackstone, hats, damaged by fire. — John Wales, treasurer, National Wire Co., died, aged 68 years.

December. Boiler works of E. Hodges & Co. damaged by fire. — Warerooms of Heywood Bros. & Wakefield Rattan Co., A. B. & E. L. Shaw, W. B. Badger, and C. W. Earnshaw destroyed by fire. — Cutter & Cutter's trunk factory damaged by fire. — Thomas Gaffield, formerly a member of Tuttle, Gaffield, & Co., having, in 1861, a plant for the manufacture of window glass at South Boston, died, aged 75 years. — W. B. Sewall, member of the Sewall-Day Cordage Co., died, aged 68 years.

During the year, Hub Hosiery Co. added new knitting machines. — Saxon Knitting Mill began manufacture of women's seamless hosiery. — Echo Knitting Co. began manufacture of infants' hose. — H. P. Wasserboehr, cigars, shut down factory entire year. — Standard Extract Co. changed from private firm to corporation under Massachusetts laws. — Owing to grade crossing work on Cambridge street, the buildings, fixtures, and stock of George H. Robinson, monuments, etc., had to be removed or raised so that it was impossible to continue work during 10 months of the year.

Braintree. In February, burned plant of Victor Metal & Foundry Co. rebuilt; in December, sold out to Victor Metals Co. — Arza B. Keith, cut shoe stock, succeeded by Arza H. Keith. *June.* New machinery set up in new addition to the Rice & Hutchins shoe factory.

Bridgewater. In July, addition to shoe factory of W. H. McElwain & Co. completed. *October.* Monarch Horse Shoe Nail Co. sold to Cosewell Horse Nail Co., of Hartford, Conn., and machinery moved. *November.* W. H. McElwain & Co., shoes, shut down for stock taking.

BROCKTON.* In January, Joyce & Fletcher, shoes, incorporated as the Joyce-Fletcher Co. — D. W. Field and J. H. Lewis, shoes, damaged by fire.

February. Packard & Field changed over product from fine goods to popular priced goods. — Arnold & Elkins dissolved partnership; business carried on by Brockton & Eureka Box Toe Co. — Preston B. Keith Shoe Co. occupied newly constructed office

* In the Chronology for 1899, it was stated that during the month of March a strike occurred at the factory of the George E. Keith Co. and that the strikers were ordered back by the Union. This statement was based upon the published reports of the incident, but the facts were inexactly reported. There was no strike at the factory nor was one contemplated; certain of the operatives stopped work and consulted workmen in other shoe factories in relation to the price paid for certain work. The result of their investigation was referred to the employer and the employes returned to their work even before the so-called strike was reported in the local papers. There has been no strike in the factory referred to during 15 years, the proprietors making annual agreements with the employes independently of any Labor Union.

building. — Abbott L. Lowell, slippers, sold to Atherton W. Tilden. — Oliver F. Leach, retired shoe manufacturer, died, aged 68 years.

March. Clifford & Clancy began manufacture of shoes. — W. F. Nesmith Shoe Co. organized under laws of Maine; authorized capital, \$50,000.

April. Excavating begun for erection of new factory, 140 x 50 feet, 5 stories, to be occupied jointly by Nelson Paper Box Co. and Empire Shoe Co. — J. E. Peckham Manufacturing Co., shanks, incorporated; authorized capital, \$5,000. — C. A. Eaton Co., shoes, leased new factory for additional room. — Empire Shoe Co. added machinery for manufacture of welted shoes. — Albert W. Hayden, one of the early shoemakers of Brockton, died, aged 56 years; he began manufacturing at 18 years of age, making the shoes himself all the way through as was customary at that time.

May. T. D. Barry & Co., shoes, changed over from the Standard machines to those of the United Shoe Machinery Co. — McCarty, Sheehy, & Kendrick shut down cutting room for stock taking, and closed factory one day on account of accident to main shafting. — Field-Hazzard Co. shut down cutting and finishing rooms for stock taking. — J. W. Terhune Co.'s shoe factory shut down temporarily. — Slater & Morrill, shoes, shut down for stock taking. — Cygolf Shoe Co. incorporated with authorized capital of \$20,000. — Kimball & Baker's shoe factory slightly damaged by fire. — C. A. Eaton Co. started up Factory No. 2, formerly occupied by Ware & Lincoln, newly equipped with machinery for making men's welted shoes.

June. Stockholders of the People's Co-Operative Shoe Manufacturing Co. voted to increase capital stock from \$3,000 to \$6,000, and re-organize. — Tripp-Lincoln Shoe Co. incorporated with authorized capital of \$15,000. — W. L. Douglas Shoe Co. shut down to install new engine; stitching room shut down for two weeks. — Fire damaged shoe factory of Field-Hazzard Co. — Averill & Thayer sold rand business to Brockton Rand Co.; manufacture of cement, blacking, etc., continued.

July. J. M. O'Donnell & Co., shoes, Middleborough, moved to this city. — Snell & Atherton, shoe tools, shut down for 2 weeks. — R. B. Grover & Co., shoes, shut down for 2 weeks. — Churchill & Alden, Preston B. Keith Shoe Co., and Brockton Co-operative Shoe Co., started up on season's run. — Mawhinney Last Co. shut down temporarily. — Thompson Bros.' shoe factory shut down to install new boiler. — Albert B. Fullerton, an old time shoemaker, died.

August. Daniel W. Field, shoes, shut down on account of damaged engine. — Trolley Shoe Polish Co. incorporated under Maine Laws; authorized capital, \$10,000. — E. L. Bonney enlarged his box factory, building an addition 30 x 76 feet. — M. F. Thomas, shoes, shut down owing to accident to machinery. — J. B. Lewis Co., shoes, shut down temporarily. — Shoe factory of Geo. G. Snow damaged by fire. — Francis M. Shaw, retired shoe manufacturer, died, aged 75 years.

September. Preston B. Keith Shoe Co. added new machinery and increased capacity. — Empire Shoe Co. occupied new factory. — Many of the shoe factories closed to allow employes to attend the Brockton Fair. — Crafts, Harrington, & Co., shoes, installed an electric light plant in factory.

October. Thompson Bros., shoes, installed electric light plant in factory, and built an addition to office. — Pioneer Shoe Co. succeeded People's Co-operative Boot & Shoe Co. — Crawford Shoe Makers sold to Leonard & Anglin who started manufacturing shoes in the No. 2 Crawford factory. — Preston B. Keith Shoe Co. shut down to install new engine. — J. B. Lewis Co. stopped manufacturing shoes. — Field-Hazzard Co. installed new engine.

November. David Eldred, cut stock, retired from business; no successor.

December. M. A. Packard Co. began foundation for addition to factory, 85 x 40 feet, 4 stories. — T. D. Barry & Co. shut down for stock taking and a general changing about of machinery. — Shaw & Bryant, shoes, succeeded by Shaw-Tannatt Co., incorporated with authorized capital of \$7,000. — Standard Rubber Co. shut down temporarily pending a re-adjustment of its affairs. — Thompson Bros., shoes, damaged by fire; later, added new boiler. — Daniel W. Field, shoes, shut down one afternoon. — W. L. Douglas Shoe Co. closed various departments in turn for stock taking. — L. M. Reynolds & Co. completed new office addition to factory. — F. E. White Co. installed electric lights. — Slater & Morrill, shoes, shut down for four days' vacation. — R. B. Grover & Co., shoes, shut down temporarily; later, shut down for stock taking. — Churchill & Alden shut down for stock taking. — Thurber & Wade, blacking, dissolved; Zimri Thurber continued under old name.

Shoe shipments. The number of cases of shoes shipped during 1900, as compiled by the *Brockton Enterprise*, is presented in the following table, comparison being made with the shipments for the 5 preceding years:

MONTHS.	1895	1896	1897	1898	1899	1900
January,	35,238	33,465	28,249	38,618	35,476	45,770
February,	37,006	36,110	37,417	38,510	41,998	48,243
March,	48,416	40,556	40,088	46,576	66,524	64,671
April,	42,734	42,150	49,834	57,015	46,544	44,274
May,	49,709	51,242	38,113	36,218	40,378	37,966
June,	37,370	31,681	24,991	29,041	40,254	35,122
July,	28,914	30,455	30,383	38,672	31,732	27,623
August,	48,066	33,100	39,265	43,187	45,944	52,447
September,	35,073	40,029	41,083	56,121	62,563	45,607
October,	30,915	43,787	45,678	31,299	43,170	44,057
November,	35,805	28,850	37,637	39,743	37,168	46,343
December,	20,527	22,950	34,112	36,769	37,526	33,918
TOTALS,	444,763	434,375	441,750	491,974	529,277	526,033

The decrease in 1900 as compared with 1899 was 3,244 cases, or 0.61 per cent. On the basis of 22 pairs of shoes to a case, there were shipped during 1900, 11,572,726 pairs as against 11,644,094 pairs in 1899.

Brookfield. In March, new building for the Esther Mills, operated by E. Gibson, completed. *April.* Billings Mann, of Mann & Stevens Woollen Co., died. — Alvin Hyde, box manufacturer, died; business continued by D. G. Tucker. *June.* Chas. H. Moulton & Co., shoes, shut down for two weeks. *August.* Two new sets of cards installed in Otsego Mills. *September.* New race way built at the Mann & Stevens Woollen Co.'s mill; new looms added, also. *October.* Vacant Clancy shoe factory sold for \$4,000. *November.* Chas. H. Moulton & Co. shut down cutting room temporarily; in December, shut down for three days.

Brookline. In May, work started on addition to factory of Holtzer Electric Co.; completed in September. *October.* Work begun on addition to carriage factory of M. W. Quinlan; completed in December; in November, harness shop damaged by fire.

CAMBRIDGE. In February, American Rubber Co. shut down for 10 days. *March.* New England Spring Bed Co.; Dixon & Fallis, patterns; Cornelius Houghton, piano sharps; and Brandon, Scribner, & Brophy, mantels, damaged by fire. *April.* Chas. E. Hall began work on new marble shop, 80 x 90 x 250 feet, one story; completed in July. — *May.* Reversible Collar Co. began addition to factory, 35 x 97 feet, 4 stories. — Columbia Jewelry Co. began foundation for new factory, 25 x 43 feet, one story. *September.* American Net & Twine Co. began addition to factory. *November.* The New England Brick Co. absorbed brick yards in Cambridge, Belmont, Concord, Andover, and Medford, aggregating about 350 acres. Included in the transfer was most of the realty of the Bay State Brick Co. in Cambridge, Medford, Concord, and Andover; 21 acres of Bray Bros. & Co., Belmont; 11 acres of John Gerry, and plant of N. M. Cofran & Co., Cambridge. — Geo. F. Blake Manufacturing Co. began foundation for brass foundry, one story, 160 x 80 feet.

Canton. In January, Draper Bros. Co., hosiery, began addition to factory, 3 stories, 50 x 60 feet. *February.* Revere Copper Co. merged into Taunton-New Bedford Copper Co.; in May, conveyed to New Bedford Copper Co. 32 lots of land in this town and in Sharon. *September.* Union Bleaching & Finishing Co., a re-organization of the old Canton Bleachery, filed articles of incorporation under New Hampshire laws; authorized capital, \$150,000.

Charlemont. In January, Frary Manufacturing Co. shut down on account of low water. *December.* W. Goodnow put new wheel into his sawmill plant.

Charlton. In February, C. W. Pike put his satinnet mill in operation. *March.* George Fitzgerald began operations in mill formerly owned by J. O. Copp.

CHELSEA. In April, still exploded in factory of Cabot Lampblack Co. causing considerable damage. — Boston Blacking Co. incorporated and began manufacturing, succeeding private firm of same name. *June.* Cropley Shoe Co. succeeded to business of A. S. Rogers Shoe Co.; authorized capital, \$50,000. *August.* Plant of Thomas Strahan & Co. reverted to them owing to failure of National Wall Paper Co. *November.* Atwood & McManus, boxes, began on storehouse, 3 stories, 40 x 447 feet.

Cheshire. In March, A. S. Farnum & Bros. purchased sawmill and lumber business of Canedy & Carpenter of North Adams.

Chester. In August, W. N. Flynt Granite Co. leased Bowe Granite Co.'s sheds and started stone cutters. *November.* Hampden Emery & Corundum Co. made repairs.

CHICOPEE. In January, the mills were generally shut down at various times on account of low water. — Overman Wheel Co. sold to J. Stevens Arms & Tool Co. *February.* Machinery of Consumers Brewery sold to a Pennsylvania concern by the Springfield Breweries Co. — Work begun on machine shop, one story, 200 x 400 feet, for Coburn Trolley Track Co. of Holyoke. *March.* Dwight Manufacturing Co. added new looms; others added in July. — J. Stevens Arms & Tool Co. shut down owing to accident to machinery; in June, equipped plant with smoke consumers. *May.* Chicopee Manufacturing Co. began foundation for new mill, 4 stories, 120 x 220 feet; completed in December. — A new brick structure begun for Hampden Bleachery, replacing old buildings torn down; entirely new machinery to bleach and dye sheeting installed. *June.* Fisk Rubber Co. shut down indefinitely. — Page & Storms Drop Forging Co. began operations in portion of plant of the Overman Wheel Co. — Lamb Knitting Machine Co. incorporated with authorized capital of \$40,000 to manufacture the Lamb knitting machines. — Samuel W. Parshley, retired hat manufacturer, died, aged 77 years. *September.* Chicopee Manufacturing Co. shut down on account of low water.

Tax abatement. The report of the special commissioner in the tax-abatement case of the Overman Wheel Co. against the city of Chicopee was given publicly in December. The company petitioned for an abatement of the taxes assessed against it for the years 1898 and 1899, alleging that the Chicopee assessors had largely overvalued the plant and machinery. There were two petitions, one for each year, and two distinct reports were made, although they were in many respects identical. The report for the year 1899 said that the commissioner found that on May 1 of that year the plant was being used for the manufacture of bicycles. The assessors' valuation for that year was as follows:

Stock in trade, \$100,000; machinery, including engines and boilers, \$140,000; four horses, \$300; buildings, \$176,750; land, \$9,800; total, \$426,350.

The commissioner held that the fair cash value of the property on that date was as follows: Stock in trade, \$100,000; machinery, including engines and boilers, \$123,000; four horses, \$300; buildings, \$160,000; land, \$9,800; total, \$392,600.

One of the principal questions argued at the hearing in the case was the value of certain machinery claimed to have become antiquated and useless through the advance in the methods of bicycle making. The commissioner said of this: "I find that changes in the making of bicycles in this country and in the construction of bicycles by which the cost of making was lessened to such an extent that its bicycles could not be manufactured economically with the machinery contained in the plant. This fact made it difficult to compete with bicycles made elsewhere by more modern methods. The changes consisted largely in the substitution of sheet metal work and connections for forged work and connections, and the substitution of wooden rims for metal rims. These changes rendered some of the machines of little or no value for the purpose of making bicycles. Among the machines so affected are many of the automatic and hand-screw machines, the forging machines and the machinery for making metal rims, also some trimmers, dies, presses, nipple machines and profiling machines. The machinery for making steel balls could not be used to make balls as cheaply as balls could be purchased elsewhere. Much of the machinery could be sold for second-hand machinery to greater advantage than it could be used for making bicycles, but some of it, being constructed for the especial purpose for which it was designed, could be used for no other, and was of little or no value except for the value of the metal it contained. This is particularly true of the machinery for making steel balls. These changes have lessened the value of the machines referred to and have lessened the value of the total machinery in the establishment as part of a going plant."

The attorney for the city asked the commissioner to make the following rulings:

(1.) Evidence is not admissible on the question of valuation of property for purposes of taxation to show that the business in which the property is used is being run at a loss and cannot be run profitably.

(2.) Evidence is not admissible on the question of valuation of property for purposes of taxation to show that certain machines cannot be used advantageously or profitably in the prosecution of the particular business for which they were originally purchased, because of changes in the method of manufacturing the articles for which the plant is being carried on.

(3.) Evidence is not admissible on the question of the valuation of property for the purposes of taxation to show that certain machines cannot be used advantageously or profitably in the prosecution of the particular business for which they were purchased because of later styles and improvements in such machines.

The commissioner said of these requests: "I cannot make any of these rulings in the form stated and rule that the value of the machinery comprised in a manufacturing plant may be affected by the fact that the plant cannot be run profitably, because of changes of method of manufacturing the articles for which the plant is being carried on, throughout the country in competing establishments, or because of later styles and improvements in the machinery used in such competing establishments, by which a large portion of the machinery cannot be used advantageously or profitably, and that by reason of said change of method and later styles and improvements the cost of such articles is decreased in other establishments to such an extent that the plant in question cannot produce the articles at a price which will enable the concern to sell at a profit. Or, in other words, the value of a machine or a lot of machinery may be affected by the fact that by the cheapening of the cost of like articles made in competing establishments by later inventions, styles or improvements, the machines or machinery cannot produce the articles at a price which will allow the owner to sell them at a profit. These things would tend to reduce the value of the machines or machinery, unless they could be used by the owners profitably for other purposes, or sold at the price they would be worth if such cheapening of method and cost had not taken place."

The report on the petition for abatement of the tax of 1898 contained the same rulings, etc., but the figures were different. The assessors valued the machinery at \$125,000 and the buildings at \$176,750 in that year. The commissioner reported that the fair cash value May 1, 1898, was \$162,500 for the buildings and \$111,000 for the machinery. This report was of interest, as being the first of the reports in tax cases of this sort brought in Western Massachusetts in recent years.

Clarksburg. In March, Strong, Hewat, & Co. added new looms.

Clinton. In January, Lancaster Mills were damaged by fire. *February.* Bigelow Carpet Co. and Lancaster Mills shut down on account of high water; shut down again in March from same cause. *March.* Clinton Worsted Co. began erection of addition to mill, 3 stories, 35 x 85 feet; completed in May. *April.* Hayes Loom Harness Co. retired from business and machinery moved to Woonsocket, R. I. *July.* All departments of Bigelow Carpet Co., except weaving, shut down for from 2 to 6 weeks. *September.* Lancaster Mills installed 7 electric motors for supplying power hitherto developed by water or steam; among the many advantages claimed for the new system was the dispensing with all belts over 10 inches wide; with gears which were all the time breaking; with heavy shafting, expensive and hard to set up, and offsetting same with the gain in cleanliness, steadiness of power, and many other advantages. *November.* Clinton Binding Co. succeeded by Thomas S. Davis. *December.* Clinton Worsted Co. added new combers and other machinery.

Concord. In September, Concord Rubber Co. added new boilers and enlarged plant. *November.* Brick yards of Bay State Brick Co. absorbed by the New England Brick Co.

Conway. In February, Darby & Moore, duck suits, made arrangements to move here from North Adams; certain public spirited citizens created a fund (completed in March) and secured this concern to occupy a hitherto vacant plant; in June, started up.

Cummingtown. In November, A. H. Allen & Co. added manufacture of barrels.

Dalton. In February, the Centennial Mill shut down on account of high water. *June.* All the paper mills in town shut down on account of the building of a new bulkhead at the woollen mill. *July.* Bay State Mill shut down 2 weeks for repairs; in October, shut down owing to accident to engine. — Byron Weston Co. shut down for repairs and the addition of 2 new beaters. *August.* Charles O. Brown, formerly of the firm of

Carson & Brown operating the Old Berkshire Mills, died at San Diego, Cal., aged 73 years. *September.* Andrew & Reddick, woollens, installed new set of cards. *November.* Renfrew Manufacturing Co., cotton goods, installed new engine. *During the year,* Zenas Crane repaired the dam, and improved and painted the tenement houses at the Kittredge Mill property. — Z. & W. M. Crane remodeled their mill office. — Renfrew Manufacturing Co. put in new gateways at the head of the pond, enlarged boiler house, and added new boiler and other machinery. — Crane & Co. built new dam at the Pioneer Mill.

Dana. In February, work generally suspended at the different mills on account of high water. *October.* Plant of Crawford & Tyler, woollens, which had been shut down for repairs, resumed operations.

Danvers. In February, the Consolidated Electric Lamp Co. incorporated; authorized capital, \$100,000. *March.* Massachusetts Glove Co. moved to Salem. *April.* American Goat Skin Co., associated with Downing-Perkins Co., began manufacture of enameled leather. — Martin Kelley & Co., shoes, started up. *May.* C. C. Farwell & Co., leather, shut down for stock taking. — Simpson & Ferguson started construction of new clder mill. *June.* Mrs. Geo. M. Morse, who had been working in various capacities in shoe factories for several years, started a small factory of her own. *July.* G. Plummer & Co., tanners, dissolved; Charles P. Kerans continued. — Ira P. Pope, shoe manufacturer, died, aged 77 years; he started in business in 1845. *August.* Clapp & Tapley, shoes, closed for vacation. *October.* The old White shoe factory at Putnamville torn down and timber used for building tenement houses; the removal of this factory marked the close of the once great shoe business in that section of the town, which was for years the busiest portion of Danvers. — George Plummer of G. Plummer & Co., leather, died, aged 60 years. — Chas. H. Gould, an old time shoemaker, died, aged 80 years; when shoe machinery was generally introduced, Mr. Gould, being beyond the most active period of life, retired from business. *December.* Plant of Edward Carr, bricks, idle during entire year. — Donovan & Shea, shoes, shut down for 2 weeks. — Eaton & Armitage, shoes, moved into their new factory. — Colcord & Walcott's shoe factory destroyed by fire.

Dedham. In June, Cochrane Manufacturing Co. began construction of new weaving plant, 2 stories, 148 x 60 feet. *November.* Merchants Woollen Co. shut down for indefinite period on account of lack of orders.

Deerfield. In October, Arms Manufacturing Co., pocketbooks, installed acetylene gas plant.

Dighton. In January, Century Stove Foundry Co. destroyed by fire; the plant was originally erected in 1883 by the Groveland Stove Co., and consisted of a main building of 2½ stories, 50 x 100 feet, and a molding shed of somewhat larger dimensions; the property did not prove a paying investment. After lying idle for several years, it was purchased, in 1892, by the present owners. *February.* Anchor Color Works shut down temporarily; in August, shut down indefinitely.

Douglas. In October, hatchet shop of American Axe & Tool Co. damaged by fire.

Dracont. In January, new slasher machine added to the Collins Mill plant of the American Woollen Co.; in February, shut down on account of high water; in April, storehouse and picker rooms destroyed by fire; in May, work of rebuilding begun; in July, rebuilding completed and plant increased from 18 to 39 sets of cards and from 105 to 168 looms; in September, foundation laid for an addition, 3 stories, 95 x 65 feet. *July.* Main building of Whitman Rendering Works destroyed by fire. *August.* Dyehouse of Merri-mac Woollen Mills destroyed by fire; in November picker room shut down for lack of material. *October.* M. L. Bassett & Co., paper, started plant after a shutdown of several months; in December, shut down four departments for one week.

Dudley. In April, Stevens Linen Works began on addition for card room, and made repairs. *June.* Josiah Perry installed new looms and new boilers.

East Bridgewater. In March, Henry Hobart, retired tack manufacturer, died, aged 76 years; as a young man Mr. Hobart became interested in machinery; he learned the

tack business of B. Hobart & Son, and when the firm of Dunbar & Hobart was formed in 1857, he became the junior partner, and afterward the firm name was changed to Dunbar, Hobart, & Whidden; the plant was enlarged, its manufactured products were shipped to all parts of the world and it became one of the best known firms in the country. On the death of Mr. Whidden, the firm name was changed to Dunbar, Hobart, & Co., and Mr. Hobart's eldest son became a partner, as well as Joseph Pettee, Jr., now of Fairhaven. The business was purchased by the Atlas Tack Corporation, and continued up to the time of their failure, since which time the large factory has been idle. *June.* J. D. Jones, boxes, succeeded by Mackie Bros. *October.* Work suspended at Hathaway Box Co. for purpose of setting up new machine.

Easthampton. In January, the Hampton Co., incorporated with authorized capital of \$60,000. *March.* Work begun on addition to Nashawannuck Co.'s finishing department, 60 x 55 feet. *April.* Easthampton Foundry Co. leased plant and started general foundry business. — Hampton Co. began foundation for new mill, 4 stories, 275 x 60 feet. — Machinery of Ionic Knitting Co. removed to Henderson, N. C. *July.* Nashawannuck Co. added new boiler. — Foundation laid for new mill for Glendale Elastic Fabrics Co. *October.* Nashawannuck Co. shut down on account of low water; during the year, the company nearly doubled its finishing department by the construction of a large addition.

Easton. In April, Eclipse Automobile Co. began manufacturing. *July.* Hatch & Grinnell shut down for repairs. — Oliver Ames & Sons Corporation shut down owing to the extreme heat.

Egremont. In May, Chester-Goodale Marble Co. began operations in its quarry. *September.* Dalzell's axle factory damaged by fire.

Enfield. In April, D. E. Tebo & Co. incorporated under Massachusetts laws, as the Enfield Manufacturing Co.; authorized capital, \$10,000. *August.* Swift River Co. made repairs on dam, headgate, and sluice way; in October, shut down on account of lack of work.

Erving. In January, Washburn, Eddy, & Co., building material, closed business; no successor. *July.* Millers Falls Co. shut down for vacation; in September, shut down for repairs; in November, moved into new addition. *December.* Washburn & Heywood Chair Co. shut down one week for stock taking. — H. L. Pratt, first president of the Millers Falls Co., died at Brooklyn, N. Y., aged 74 years.

EVERETT. In January, the Boston Varnish Co. completed its addition to plant. *February.* United States Steel Co. acquired site for establishment of steel plant, 120 x 200 feet; in April, started on electric power plant and dock; in July, started on main plant; in September, completed. *March.* Property of Everett Distilling Co. bought by Andrew J. Mahoney. *December.* Prince-Collins Co. began manufacture of shoes.

Fairhaven. In February, Atlas Tack Co. shut down temporarily.

FALL RIVER. In January, Stevens Manufacturing Co. added a number of ring spinning frames. — Fall River Manufactory put in new engine shaft. — The machinery in idle Jesse Eddy plant of American Woollen Co. shipped to Dexter, Maine. — James Marshall fitted up his Shaw Street plant as a fur shoddy manufactory for the purpose of covering, filling, and surfacing all grades of hats by a new process. — Shutdowns for month: King Philip, 15 minutes on account of accident, and one day on account of accident; Conanicut Mills, carding and shipping departments, one week on account of accident; Troy Mills, 45 minutes on account of accident. — Fires for month: Pocasset Mill, picker room, and Hargraves Mill, mule room.

February. Kerr Thread Mill shut down temporarily owing to accident to machinery. — Fall River Bleachery Co. organized; authorized capital, \$600,000. — Hargraves Mill fined \$50 for alleged violation of 58-hour law. — Fall River Iron Works Co. and Chace Mills shut down on account of accidents to machinery. — Work begun on new weave shed, one story, 160 x 50 feet, for Granite Mills. — A. F. Lamontagne, baker, sold to Theophile Lafond.

March. Heywood Narrow Fabric Co. incorporated; authorized capital, \$27,500; succeeding private firm of M. Heywood & Co. taking effect April 1.—King Philip and Richard Borden Mills substituted ring frames for mules.—The following mills added new machinery: Pocasset, Arkwright, Fall River Manufactory, Mechanics, Osborn, Wampanoag, Robeson, Conanicut, American Linen, Hargraves, Kerr Thread, Union, and Chace.—The following mills shut down temporarily owing to accidents to machinery: Shove No. 1, Wampanoag No. 1, and Sagamore No. 2.

April. American Thread Co. began work on addition to mill, one story, 100 x 60 feet; completed in June.—American Printing Co. shut down a portion of plant on account of accident to machinery; later, entire plant shut down.—Conanicut mill started on new storehouse and additions to mill, 44 x 48 feet, and 29 x 71 feet; later, added new spinning frames.—Fall River Iron Works Co. shut down No. 4 mill owing to break in shafting; later, shut down again from same trouble.—Hargraves Mill No. 2 shut down on account of accident.—King Philip Mills added new spinning frames to No. 1 mill.—Mechanics Mills shut down owing to breaking of piston rod of large engine.—Stockholders of Osborn Mills voted to increase capital stock from \$600,000 to \$750,000, and the number of shares from 6,000 to 7,500.—Richard Borden Manufacturing Co. substituted spinning frames for mules in No. 1 mill.—Sagamore Mills stopped about 160 looms on account of shortage of warps.—Shove Mills added new speeder frames to No. 1 mill.—Stafford Mills started on new weave shed, 153 x 156 feet; completed in November.—Heywood Narrow Fabric Co. shut down on account of the prevalence of grip among operatives.—The balance of old machinery at the Jesse Eddy Mill shipped to Rhode Island.—Globe Yarn Co. shipped old spinning frames to one of the mills of the New England Cotton Yarn Co. in New Bedford.—Chester S. Belcher started in the manufacture and repairing of automobiles.

May. Stockholders of the Hargraves and Parker Mills voted in favor of combining the two corporations.—King Philip Mills shut down on account of accident to machinery.—Massasoit Mills damaged by fire.—Merchants Mills substituted ring spinning frames for mules; later, added new machinery in carding department.—Shove Mills shut down No. 1 mill temporarily on account of accident to engine.—Stockholders of Union Cotton Manufacturing Co. voted to increase capital stock from \$750,000 to \$1,200,000.—James Holden, cotton banding, added machinery for manufacture of cotton yarn.

June. American Linen Co., Merchants Mills, Stafford Mills, Globe Yarn Mills, Hargraves Mills, and Kerr Thread Co., added new machinery during the month.—Parker Mills shut down for 4 days on account of accident to machinery.—Tecomseh Mill No. 2 struck and slightly damaged by lightning.—Troy Cotton & Woollen Manufactory shut down on account of accident to machinery.—Thomas Redfern & Son established workshop for manufacture of spinning frame pressers, etc.

July. By mutual agreement a number of mills shut down during the month. The form of agreement for shutting down the mills to curtail production covered the period from July 9 to September 17, inclusive. The treasurers signing the agreement were free to shut down their mills during any 4 weeks within that period. The form of agreement differed from the usual form of the sort, since it did not make the curtailment dependent upon any fixed number of spindles being joined to the agreement. The mills closing down this month were as follows: American Linen, Barnard, Chace, Cornell, Crescent, Davol, Durfee, Fall River, Granite, Laurel Lake, Merchants, Metacomet, Pocasset, Richard Borden, Robeson, Sagamore, Seaconnet, Shove, Slade, Stafford, Troy, Union, Wampanoag, and Weetamoe.—Union Belt Co. and Globe Yarn Mill No. 2 added new machinery.—Hargraves Mills No. 1 began changing over from print cloths to fine goods.

August. The mills which shut down in accordance with agreement were as follows: American Linen, Barnard, Border City, Chace, Cornell, Davol, Durfee, Fall River, Granite, Laurel Lake, Mechanics, Merchants, Metacomet, Narragansett, Pocasset, Richard Borden, Robeson, Sagamore, Seaconnet, Shove, Slade, Stafford, Tecomseh, Troy, Union, Wampanoag, and Weetamoe.—Algonquin Printing Co. started up partially after a 5 weeks' shutdown.—Fall River Iron Works Co.'s No. 4 Mill stopped 30 minutes owing to an accident to the engine.—Arkwright Mills stopped 50 minutes owing to an accident to the engine.—Narragansett Mills shut down on account of accident to engine.—Border City Mills equipped with new speeders in carding department.—Marine railway at shipyard of Edward F. Bealky destroyed by fire.—Sanford Spinning Co.'s mill struck and damaged by lightning.—John J. Highlands, mason, died, aged 61 years.

September. The following mills shut down to curtail production: Border City, Durfee, Fall River, Flint, Granite, Mechanics, Narragansett, Seaconnet, Shove, Slade, Stafford, Tecomseh, and Wampanoag.—No. 2 Globe Yarn Mill shut down 2½ hours owing to

accidents. — Hargraves Soap Manufacturing Co. sold at auction. — Fall River Iron Works Co.'s No. 4 Mill stopped 45 minutes owing to accident to engine. — Stevens Manufacturing Co. shut down 2 weeks on account of short supply of raw cotton and prevailing high prices. — Stafford Mills added new spinning frames and looms. — Fire partially destroyed plant of Fall River Gas Works.

October. A supplemental season of curtailment was undertaken with fair success, the only mills, however, which took part in the movement were the Flint, Stafford, Stevens, and Mechanics. — Arkwright Mills added new machinery. — New England Cotton Yarn Co. began work on new storehouse at the Sanford Mills, 110 x 100 feet. — During the year Stafford Mills paid out \$113,609.27 for addition to mills, new machinery, and other betterments. — Chace Mills added 5,184 spindles to plant during past year. — Arkwright Mills added during the year 6,000 spindles and 600 looms. — New England Cotton Yarn Co. re-organized and incorporated under Massachusetts laws.

November. Part of dyeing department of Kerr Thread Mills shut down for 2 months. — Osborn Mills built addition to No. 2 mill for purpose of increasing frame spinning capacity of plant. — Weave room of Sagamore Mills shut down temporarily. — Wampanoag Mill No. 1 shut down temporarily on account of accident to engine. — Crescent Hat Co. organized to operate plant formerly owned by Pocasset Hat Co. — Wilson Bannister, soap powder manufacturer, died, aged 61 years.

December. Narragansett Mills shut down one day on account of accident to machinery. — Barnard Mills added new wide looms. — Fall River Iron Works Co.'s No. 2 mill shut down indefinitely owing to breaking of main driving shaft. — Jonathan Slade died, aged 86 years; until within about a year he was president of the Slade Mills.

Print cloth statement. The opening of the year found a moderate stock of cloths on hand but with contracts in force for future delivery fully covering the stock. The price was $3\frac{1}{4}$ cents which continued in force until Feb. 19, when it was advanced to $3\frac{3}{4}$ cents for regulars, and other grades in proportion. On March 2, the price was advanced to $3\frac{1}{2}$ cents. Up to this date, the sales since the opening of the year had been fully equal to the output, but the ensuing 6 months showed a very light business, and prices were reduced on May 28 to $3\frac{1}{8}$ cents and on June 28 to $2\frac{7}{8}$ cents for regular goods. On July 3, the mills decided to curtail production to the extent of 1,000,000 pieces, which plan was carried out. The opening of the autumn season showed renewed business activity, and during the first six weeks there were sales exceeding 3,000,000 pieces, the price advanced to 3 and $3\frac{1}{8}$ cents, and on October 9 to $3\frac{1}{4}$ cents, from which, on October 24, it returned to $3\frac{1}{8}$ cents at which price it stood at the close of the year. The highest price for print cloths during the past century was $88\frac{1}{2}$ cents in 1864 and the lowest $1\frac{1}{2}$ cents in 1898; the highest price paid for raw cotton during the same period was \$1.90 per pound in 1864-5 and the lowest price 4 cents per pound in 1844-5. The cotton crop for the year 1891 was 80,000 bales and the estimated crop for 1900 was 10,000,000 bales. The first cotton mill in Fall River was erected in 1818 and contained 1,500 spindles, at the close of 1900 the number of spindles in operation was 4,456,032, of which 1,329,712 were mule and 3,126,320 were frame spindles.

In the following table we reproduce the statements of production since 1890; the figures for 1888, 1889, and 1900 are estimates furnished by a member of the Manufacturers' Board of Trade:

YEARS.	NUMBER OF PIECES OF PRINT CLOTH				
	Produced	Sold	On Hand at close of Year	Stock in United States at close of Year	Sold for Future Delivery
1890,	9,937,000	8,584,000	583,000	952,000	1,540,000
1891,	9,985,000	8,838,000	90,000	278,000	1,375,000
1892,	10,045,000	10,759,000	7,000	9,000	2,850,000
1893,	9,065,000	7,119,000	142,000	340,000	950,000
1894,	8,478,000	8,331,000	140,000	211,000	1,300,000
1895,	11,090,000	9,871,000	287,000	464,000	1,125,000
1896,	10,055,000	7,819,000	1,802,000	2,300,000	1,001,000
1897,	10,648,000	10,470,000	1,836,000	2,390,000	1,144,000
1898,	11,500,000	13,332,500	4,500	500,000	1,800,000
1899,	12,000,000	13,500,000	—	500,000	2,000,000
1900,	14,000,000	11,000,000	1,500,000	2,000,000	400,000

The following table shows the variation in price of print cloth, 64 x 64, since 1890:

YEARS.	PRICES PER YARD OF PRINT CLOTH (64 x 64)		
	Highest	Lowest	Average
1890,	3.563	3.000	3.344
1891,	3.063	2.750	2.951
1892,	4.063	3.063	3.418
1893,	4.000	2.750	3.295
1894,	3.000	2.599	2.763
1895,	3.313	2.438	2.875
1896,	3.000	2.438	2.600
1897,	2.688	2.250	2.484
1898,	2.375	1.875	2.063
1899,	5.125	3.250	2.685
1900,	3.500	2.875	3.125

Falmouth. In February, work begun on factory and store, one story, 90 x 60 feet, for Crocker Cycle Co.

FITCHBURG. In January, the Glen Mill shut down temporarily owing to frozen pipes. — Simonds Manufacturing Co. began work on addition to plant, 40 x 120 feet, 2 stories; completed in June. — The Whitney Reed Chair Co.'s factory damaged by fire. *February.* The following plants shut down temporarily owing to high water: Putnam Machine Co., Parkhill Manufacturing Co., Orswell Mills, Glen Woollen Co., Beoli Mills, Fitchburg Paper Co., and Star Worsted Co. — Fire damaged machine shop of F. S. Lovell. *March.* A second flood caused the shutting down of the Fitchburg Paper Co. and Putnam Machine Co. — Glen Mill damaged by fire. *April.* Goodnow's Foundry damaged by fire. *May.* Beoli Mill shut down on account of accident to machinery. — Parkhill Manufacturing Co. began foundation for storehouse, one story, 225 x 60 feet. *July.* Beoli Mill shut down for vacation. *August.* Louis Des Johns & Co., of New York, purchased vacant Mitchell Mill, removed the textile machinery and made ready for installation of machinery for the surface coating of paper. *November.* Willard Screen Plate Co. sold entire business to Hardy & Pinder who added product to their own output. *December.* The plants of Simonds Rolling Machine Co. and Fitchburg Steel Ball Co. shut down entire year.

Foxborough. In May, the Union Straw Factory destroyed by fire; this factory was built in 1852 by a corporation headed by O. & E. P. Carpenter; at that time, there were about 17 firms engaged in the straw hat industry in the town; the building was erected to accommodate several of these firms, and was considered the largest hat factory in the country, and perhaps in the world; the plant cost about \$250,000. There were, in later years, financial reverses and changes of firms, and in recent years the plant had been operated by the A. F. Bemis Co. *June.* Caton Bros. straw hat factory damaged by fire.

Framingham. In May, Dennison Manufacturing Co. began foundation for addition to plant, 2 stories, 88 x 50 feet. *October.* Cork Floor & Tile Co. sold to the Non-Pareil Cork Co. and business moved to Connecticut.

Franklin. In February, J. G. Ray, vice-president of the American Woollen Co., and the last of the four famous Rays, all woollen goods manufacturers, died, aged 69 years; in 1850, with his brother Francis, he started the first rag picker operated in this section and from this was started the first shoddy mill in New England under the name of Ray Bros., at Unionville. *April.* City Mills Co. added new boiler to plant. *June.* Charles J. McKenzie, retired manufacturer, died, aged 55 years. *July.* Ray Fabric Mill of the American Woollen Co. equipped looms with new shuttle check. *August.* American Woollen Co. began foundation for new building for finishing and picker room, 3 stories, 45 x 60 feet. — Ray Fabric Mill shut down for repairs. *October.* Enoch Waite built a

new mill which was leased by Daniel Pendergast for manufacture of shoddy and horse blankets. *November.* Singleton Worsted Co. shut down for one week. *December.* Ray Woollen Mill added new cloth dryer.

Freetown. In August, gun factory of N. R. Davis & Sons damaged by fire.

Gardner. In May, pail factory of E. G. Bradshaw damaged by fire; 9 out of 11 buildings were destroyed. *June.* Wyman & Upham, chairs, dissolved; Mr. Wyman continued. *December.* Gas house slightly damaged by fire.

Georgetown. In April, factory of Georgetown Boot & Shoe Co. shut down for repairs; later, shut down on account of accident to boiler. — Factory of A. B. Noyes & Co. shut down for repairs; in May, shut down temporarily; in June, shut down for one week; later, shut down for 2 weeks for stock taking; in November, shut down for stock taking.

Gill. In September, mill of New England Fibre Co. shut down 2 weeks on account of low water.

GLOUCESTER. In January, smoke house of Shute & Marchant damaged by fire. *March.* Samuel R. Crane, cooper, died, aged 73 years. *September.* Meyer, Rosenfeld, & Co. of Boston leased quarters for manufacture of wrappers. *October.* Russia Cement Co. began on addition to plant, 152 x 40 feet. *December.* New box factory on George Perkins & Sons wharf put in operation.

Grafton. In February, Fisher Manufacturing Co. shut down temporarily on account of high water. — Geo. W. Fisher, of the Fisher Manufacturing Co., died, aged 57 years. *May.* Saunders Cotton Manufacturing Co. began erection of 2 new storehouses. — J. S. Nelson & Son Co. shut down partially for stock taking. *August.* Farnumville Cotton Mills shut down permanently; in October, plant, including mill, water privilege, land, and 30 tenement houses, sold to Woonsocket Savings Bank for \$12,000 at foreclosure sale of a mortgage for \$50,000; in December the bank brought a bill in equity before the Worcester County Superior Court to restrain the former owners of the mill from disposing of or removing the machinery from the mill; the case to be heard in February, 1901.

Granville. In December, Noble & Cooley, drums, shut down for annual vacation and inventory.

Great Barrington. In February, Endrick Woollen Mill shut down on account of high water; in March, shut down on account of accident to machinery; in August, shut down one month for repairs; in December, ran out all stock and shut down indefinitely; it is said that the site of the first mill in Great Barrington was not far from the present mill which is a stone structure, erected in 1858, and operated by the Berkshire Woollen Co. for many years; the original mill was occupied about 1804 by Booth & Gibbs. *September.* Goodrich Lumber Mill shut down for repairs. *October.* Monument Mills shut down twice during the month on account of low water. *December.* Stanley Instrument Co. shut down one week for stock taking. — Berkshire Soda Springs Co. leased soda spring on Clark's farm.

Greenfield. In March, Automatic Machine Co., organized in 1889, began operations. — Goodell-Pratt Co. began erection of addition 60 x 40 feet, 2 stories. — Morey & Raymond, job printers, dissolved; Raymond & Manning succeeded. *May.* Massachusetts Tool Co. organized; authorized capital, \$25,000; ground leased of Goodell-Pratt Co. upon which to erect a factory; in August, started machinery in new building. *June.* Wells Bros. & Co. began on addition to factory. — Warner Manufacturing Co. shut down one week for repairs. — Emil Weissbrod & Sons, pocketbooks, shut down one week for vacation. — Chas. R. Field Manufacturing Co. shut down for several weeks starting up again on July 23. *August.* Geo. F. Dodge, mason builder, died, aged 70 years. *October.* Oakman Motor Vehicle Co. sold to New York parties. *November.* New England Brick Co. purchased the brick yards of Smith & Welch. *December.* Wells Bros. & Co. shut down for stock taking.

Groton. In September, paper mill of Tileston & Hollingsworth Co. shut down for repairs.

Groveland. In February, Groveland Mills shut down its No. 3 spinning room on account of accident to machinery; in July, equipped looms with new shuttle check; in November, shut down half a day to permit employes to vote; in December, shut down for holidays.

Hampden. In February, John Kenworthy added new looms for manufacture of cotton worsteds in addition to present product; new engine installed, also.

Hancock. In June, Geo. W. Barker died at Woburn; he formerly ran a cassimere mill in this town.

Hanover. In December, Clark & Bowers purchased plant from Lot Phillips & Co. and began alterations and repairs, fitting it up to manufacture fireworks.

Hardwick. In October, card and spinning rooms of Geo. H. Gilbert Manufacturing Co.'s No. 4 mill shut down on the manufacture of woollen goods and used rooms for manufacture of worsted goods.

Hatfield. During the year, C. S. Shattuck, guns, shut down 21 days on account of low water.

HAVERHILL. In January, Stewart-Potter Last Co., J. W. Russ & Co., Lennox & Briggs, and Chick Bros., increased capacity. — O. L. Foster, slippers, moved into larger quarters. — Fire damaged plants of T. S. Ruddock & Sons and Chas. K. Fox.

February. Thayer & Maguire shut down temporarily on account of accident to machinery. — P. N. Wadleigh added new line of shoes to his product. — T. L. Hill began manufacture of children's spring heel shoes, and F. M. Brown, children's and misses' shoes. — Lang & Roberts, shoes, dissolved; E. F. Lang continued. — Geo. F. Burnham, leather goods, moved into larger quarters. — Factory of Thayer & Maguire damaged by fire. — E. W. Allen, slipper manufacturer, died; business discontinued; no successor.

March. Stevens Woollen Mill and leather factory of Lennox & Briggs shut down on account of high water. — H. L. Toppan, shoes, moved into larger quarters. — Geo. B. Leavitt began manufacture of shoes. — Morse & Proctor added molded counters to their product. — Levi C. Wadleigh, retired shoe manufacturer, died, aged 85 years. — J. F. Currier & Co., slippers, discontinued; no successor. — W. P. Fletcher of Stoneham purchased plant of L. C. Ring for purpose of fitting it up for manufacture of cardboard.

April. J. W. Russ & Co. shut down for stock taking. — Warren O. Hunkins began manufacturing. — H. P. Williams, slippers, succeeded by E. B. Johnson. — J. G. Hudson began manufacture of paste for photographers' use, shoe linings, etc. — I. G. Sutherland & Sons, lasts, moved plant to Lynn. — C. M. How, shoes, gave up manufacturing; continuing business as dealer only. — Walter H. Page, shoes, discontinued; no successor.

May. F. J. Thompson, shoes, moved into larger quarters. — Leslie K. Morse & Co., shoes, moved business to Raymond, N. H. — W. Vernon Moulton began manufacture of cut stock. — Arthur Prescott, shoes, went out of business; no successor; did not intend to re-engage in manufacturing, but, on further consideration, made arrangements to begin Jan. 1, 1901.

June. H. E. Guptill, shoes, moved to larger quarters. — Prosser & Smith added new molding machine to their counter molding factory and increased capacity of plant. — Noyes, Reed, & Co., shoes, dissolved; Mr. Noyes continued. — Chesley & Rugg, J. H. Winchell & Co., J. W. Russ & Co., W. W. Spaulding & Co., Knipe Bros., and F. N. Livingston & Co. shut down for stock taking. — T. M. Arnold began manufacturing cut soles. — E. G. Morrison & Co., shoes, moved to Concord, N. H. — Chas. H. Noyes enlarged his paper box factory. — J. W. Proctor resumed the innersole business. — F. N. Livingston & Co. added a department for making pasted stock. — Geo. Ham, shoes, retired from business; no successor. — Foster Counter Co. began manufacturing.

August. Pentucket Counter Co. moved to larger quarters. — J. H. Winchell & Co., shoes, shut down half a day on account of accident to machinery. — Chesley & Rugg, shoes, added new machinery. — W. S. Adams & Son began manufacture of shoes. — Edward O'Connell, shoe manufacturer, died. — John T. Hayes, slipper manufacturer, died, aged 38 years; business discontinued in October.

September. Rocknottom Shoe Co. moved into larger quarters. — Business of E. W. Bullock & Co., counters, closed out under assignment; no successor. — Noyes, Read, & Co., slippers, dissolved; no successor.

October. Alexander Roberts & Co., men's suitings, moved entire business to Claremont, N. H. — Marlon & Bond began manufacture of wood heels. — A. E. Arnold began manufacture of shoes. — Chas. L. Stevens taken into partnership by Thos. M. Arnold in manufacture of cut soles. — E. J. Burlin began manufacture of slippers. — H. E. Adams with Warren Kimball began manufacture of shoes. — E. F. Lang, shoes, moved to larger quarters. — P. N. Wadleigh shut down on account of accident to machinery. — A. J. Farrington died, aged 70 years; he was one of the oldest shoe manufacturers in the city. — Lewis & Carleton began manufacturing cut stock.

November. Walter H. Page began manufacture of shoes based on his own patent. — J. Irving Benedict & Son discontinued manufacturing and moved to Highwood, N. J. — E. A. Jennings, shoes, moved into larger quarters. — Wm. F. Chase, shoes, retired; no successor. — Shoe factory of Geo. H. Bartlett damaged by fire; later, rebuilt.

December. Frederick W. Millay sold his interest in the Stewart-Potter Last Co. to H. F. Blake; later, he started in business for himself. — Chas. W. Tappan Shoe Co. shut down for stock taking; announced intention to remove to Maine. — H. B. Goodrich & Co., shoes, shut down for stock taking. — Improved Gasolene Motor & Automobile Co. organized. — W. B. Thom & Co., hats, shut down for stock taking. — Geo. Henry, die cutting manufacturer, died. — J. G. S. Little, retired shoe manufacturer, died.

Shoe shipments. The number of cases of shoes shipped during 1900, as compiled by the *Haverhill Gazette*, is given in the following table in comparison with the shipments of the 5 preceding years:

MONTHS.	1895	1896	1897	1898	1899	1900
January,	29,857	38,709	41,190	38,981	40,514	47,078
February,	29,519	34,411	43,176	40,509	41,356	47,048
March,	47,275	36,668	44,365	54,816	54,989	58,575
April,	42,056	47,572	51,358	39,020	44,481	37,267
May,	51,276	33,361	34,989	20,200	42,894	31,017
June,	31,599	30,706	28,679	33,350	42,284	23,053
July,	20,704	29,694	29,923	24,125	27,466	17,182
August,	23,500	22,688	22,621	24,090	36,715	24,722
September,	20,856	21,617	32,638	30,966	30,604	21,427
October,	20,847	26,327	25,156	24,873	21,062	23,723
November,	25,546	21,227	25,083	25,935	39,283	31,796
December,	23,875	43,143	42,734	39,466	39,078	32,657
TOTALS,	386,910	386,123	421,862	396,281	460,726	396,540

The decrease in 1900 as compared with 1899 was 65,186 cases, or 14.15 per cent. On the basis of 40 pairs to a case, there were shipped in 1900, 15,831,600 pairs as against 18,429,040 pairs in 1899, and 15,851,240 pairs in 1898.

Heath. In February, the Berkshire Mining & Milling Co. put men at work in their copper bearing quartz mine; in April, the company abandoned the mine, the mineral not being found in quantity sufficient to warrant the continuance of the work.

Hingham. In June, Tower Toy Co., F. J. Burrell proprietor, sold to Geo. R. Healey Manufacturing Co. of New York, and business discontinued in this town.

Hinsdale. In October, a consignment of machinery for the Hinsdale Alpha gold mine received and installed. **November.** Hinsdale Woollen Co. shut down temporarily.

Holbrook. In June, Elihu Holbrook died, aged 73 years; he was one of the pioneer boot manufacturers of Norfolk County, being engaged in the business 50 years ago and continuing until 1895, when he retired.

Holden. In July, Dawson Manufacturing Co. completed addition to plant and installed new carding machinery. **September.** Glen Mills shut down for an indefinite period; later, leased by new company to operate it as Welsh-Gleason Manufacturing Co.

Holliston. In January, new machinery installed in plants of A. T. W. Brooks, overalls, and Superior Manufacturing Co. *February.* Cornelius F. Driscoll, shoes, shut down indefinitely; in September, started up; in November, shut down for 2 months. *April.* A. T. W. Brooks installed electric motor; later, retired from business.

Holyoke. In January, new dam of the Holyoke Water Power Co. completed, the last of 10,998 pieces of stone being placed in position; the first stone was laid July 11, 1895. The old dam was built in 1849. — Deane Steam Pump Co. received an order for 70 duplex pumps from Hong Kong, China. — S. H. Young began manufacture of brooms. — Valley Paper Co. began manufacture of photograph paper. — Connecticut River Paper Co. shut down one week on account of low water. — Merrick Thread Co. shut down one week owing to accident to shafting. — Holyoke Plush Co. incorporated under laws of Maine; authorized capital, \$50,000; to operate idle mills of the Chadwick Plush Co.

February. Riverside Paper Co. shut down on account of high water.

March. Lyman Mills broke ground for new engine room and electric plant building. — Connecticut Valley Lumber Co. shut down for repairs. — Farr Alpaca Co. began on addition to dyehouse, 2 stories, 45 x 35 feet. — Holyoke Paper Co. shut down one week for repairs.

April. Richardson, slippers, increased capacity. — Morse & Logan, Shillaber Shoe Co., Dore & Fairchild, Bailey, Curtis, & Co., Chas. A. Sager, Herbert Lefavour, Alley & Newhall, J. D. Mullen & Son, Henry Alberts, J. E. Jones, and Chas. L. Gay, moved into larger quarters. — Dore & Fairchild, shoes, dissolved. — Chas. H. Richardson, slippers, increased capacity. — Phelan Shoe Manufacturing Co. began manufacture of shoes. — Eckhardt & Ford, shoes, dissolved; Harvey R. Ford & Co. continued. — Chas. H. Pinkham, president Lydia Pinkham Medicine Co., died, aged 56 years. — Lynn Board of Trade issued the following statement to manufacturers: "The temporary shipping arrangement made by the Boston and Maine Railroad at the request of the Lynn Board of Trade, has now become permanent. The amount of freight required by the railroad management in order to give daily service by the way of Boston, instead of through Salem, as heretofore, is being shipped. Under this arrangement there is positively no delay in west-bound freight, as all goods delivered to the Lynn freight station leave Boston on fast freight lines the next afternoon. We wish to impress upon Lynn shippers the importance of taking advantage of this service. If the shipments are allowed to fall below the required amount, the railroad officials will discontinue the service from lack of support, and they would have strong ground for refusing to grant any favor the people of Lynn might ask in the future. The merchants and manufacturers ought to support this arrangement. The Board of Trade has made unceasing efforts to obtain it. It has effected a considerable saving in freight rates, and should have the co-operation of every business man in making this service a success."

December. Bemis & Wright, Arthur E. Gloyd, A. & A. D. Fisher, Cross & Tucker, Geo. H. Burt & Co., and Melanson & Currier, shoes, increased capacity. — Gardiner, Beardsell, & Co. succeeded by New England Counter Co. — Redfern Shoe Co. began manufacture of shoes. — Spooner, Wise, & Co., counters, dissolved; Mr. Wise continued. —

NORTH ADAMS. In January, William Goodale purchased carriage factory of John Raffenole. — Arnold Print Works damaged by fire.

February. Nearly all of the local manufacturing plants were shut down temporarily on account of high water. — Darby & Moore, duck suits, began preparations to move plant to Conway.

March. Hygeia Ice & Cold Storage Co. organized and began erection of factory building, two stories, 80 x 80 feet. — Wilkinson & Bliss, shoes, shut down permanently. — A. B. Cleveland Co. established manufacture of shoes; later, discontinued business. — Saw-mill and lumber business of Canedy & Carpenter sold to A. S. Farnum & Bros. Co. of Cheshire. — Clark Biscuit Co. fined \$50 for running overtime. — Pump house of Arnold Print Works damaged by fire.

April. Boston Finishing Works shut down for repairs. — Office of N. L. Millard & Co., shoes, torn down to make room for an addition to factory. This office might be called one of the historical buildings of the city, it having been built 80 years ago by Turner & Laffin, who were the originators of the Windsor Print Works. A brick building which was demolished 50 years ago stood near, and both were a part of the same property, which was used in turn by various men and firms carrying on different kinds of business. After Turner & Laffin discontinued, a furnace was established in the brick building and stoves were cast. For a time Cook & Southwick had a sawmill there, and Darling & Rathbone had a barrel, stave, and planing mill on the premises. Briggs Bros., who later ran the Briggsville Mill, in Clarksburg, began the manufacture of woollen warp there, and for a few months, many years ago, Orrin Witherell and his son, Edward J., carried on blacksmithing in the rear of the brick building; they then built a shop in Willow Dell, where E. J. Witherell is still in business. The office, now torn down, was used as such by many of these firms, and has been so used by Millard & Co. for some years past.

May. Windsor Company began work on foundation for addition to plant, 2 stories, 100 x 60 feet. — W. G. Cady sold his interest in the shoe factory and business of W. G. Cady & Co. to N. L. Millard & Co.; new firm established under name of Fairfield, Millard, & Co. to continue the business. — James Hunter Machine Co. began foundation for new foundry, one story, 200 x 87 feet; completed and started up in November. — Dyehouse of Windsor Company shut down for repairs. — Print department of Arnold Print Works shut down for repairs; padding room damaged by fire; work begun on enlargement of storehouse.

June. Daniel Beardon, retired cigar manufacturer, died, aged 64 years. — Greylock Mills shut down 2 weeks for stock taking.

July. James Hunter Machine Co. began on pattern storehouse, 2 stories, 100 x 40 feet.

August. Fire damaged plants of James Hunter Machine Co., Eclipse Mill, and North Adams Brick Co. — Work begun on new dyehouse for Windsor Company.

In January, Taunton Rivet Works began on addition to plant. — Cohannet Mill added new engine. — Engine at Taunton Locomotive Works damaged by explosion. *February.* Taunton Iron Works shut down on account of accident to engine. *March.* Lincoln & Wood shipped twist drills to Honolulu. — Mason Machine Co. shut down on account of accident to machinery. *April.* Atlas Tack Corporation added new packing machines. — Estate of F. W. R. Emery, blank books, succeeded by Emery Record Preserving Co. — A. B. Staples, bricks, went out of business; no successor. *June.* The new Winthrop Mill ran off its first cotton on the 14th. *July.* Eldridge & Co., casket hardware, absorbed by American Silver & Casket Co., organized under New Jersey laws, with authorized capital of \$500,000. *August.* Taunton Iron Works installed new boiler. — The several foundries compelled to shut down temporarily on account of the heat. *October.* New Winthrop Mill in full operation. — Elizabeth Poole Mills ran on three days' time. — Massachusetts Pearl Works began operations. — Fire damaged plant of American Smelting & Refining Co., formerly the Phoenix Crucible Works, and cabinet factory of Benj. F. Cunningham. *December.* Rebuilding of burned crucible works begun. — Whittenton Mills shut down for 3 days' vacation.

Templeton. In October, Brown, Bradley, & Co., chairs, shut down on account of accident to boiler.

Tewksbury. In May, buildings and machinery of Atherton Machine Co. sold at auction. The business of the Atherton Machine Co. was originated by Mr. Wm. E. Whitehead, now deceased, who came to this country from Miles Platten, England, and became one of the most resourceful inventors of special cotton machinery of his day, and the organizer of the manufacture of same. Later he associated with himself Mr. A. T. Atherton of Lowell, then a patent lawyer, forming the firm of Whitehead & Atherton. Starting with a limited capital, in a small shop in Lowell, the firm rapidly developed a very large business in cotton picking machinery, in fact, taking the lead in the business world

in this specialty. Finding their quarters in Lowell inadequate to their growing business, they purchased a large tract of land in Tewksbury upon which was begun the erection of the present immense plant occupied by the Atherton Machine Co. Soon after moving to Tewksbury the firm was incorporated as the Whitehead & Atherton Machine Co., and after the death of Mr. Whitehead, in 1884, the property was sold to the Atherton Machine Co., incorporated under the laws of Massachusetts for the purpose of purchasing the plant. Its capital was \$300,000. In 1887 Mr. A. A. Coburn of Lowell, then the largest stockholder in the company, took charge of the concern and practically became the manager of the company and its business. From this time until August, 1893, when the financial and business depression enveloped the country, the Atherton Machine Co. was highly successful. In 1895, several unfortunate financial losses, largely outside the regular channels of the company's business, crippled its credit to such an extent that it was forced into insolvency in July, 1898.

Townsend. In February, new steam lumber and stave mill of A. D. Fessenden dedicated.

Uxbridge. In January, Edwin Whitin purchased the Capron Woollen Mill. *February.* C. A. Root & Co., cotton worsteds, began manufacturing. *March.* Calumet and Hecla Woollen Mills shut down temporarily on account of high water. *July.* Hecla Mill shut down temporarily. — Fire damaged picker room of Capron's Mill. *September.* Uxbridge Cotton Mill let contract for addition to be built between Uxbridge and Whitinsville. *During the year,* the Uxbridge Cotton Mill added new spindles, looms, and cards. — Ironstone Mill closed entire year and advertised for sale. — The Capron Mills operated by Norfolk Woollen Co. of Franklin.

Wakefield. In May, cane-cutting factory of Heywood Bros. & Wakefield Co. destroyed by fire; rebuilt. *July.* Fire destroyed factory of Wakefield Reed Chair Co.

Walpole. In May, Walpole Dye & Chemical Works sold at auction. *June.* Fire destroyed building of Massachusetts Chemical Co.; rebuilt. *July.* Walpole branch of the American Card Clothing Co. closed and the Walpole Card Clothing Co. incorporated; authorized capital, \$15,000. *August.* Waterproof paper department of F. W. Bird & Son destroyed by fire; rebuilt. *October.* Walpole Card Clothing Co. added 2 new water wheels; in operation in November.

WALTHAM. In January, fire damaged machine shop of F. C. Gifford and the plant of Waltham Electrotyping Co. — American Waltham Watch Co. shut down 3 days for stock taking. *February.* Addition to New England Motor Carriage Co.'s factory completed. *May.* S. A. Arneson Organ Co. began equipping factory to manufacture organs. *July.* American Waltham Manufacturing Co., bicycles, cut down its force on account of dull trade. — American Waltham Watch Co., United States Watch Co., Columbia Watch Co., Judson L. Thompson Manufacturing Co., and Godber Jewel Co., shut down 2 weeks for vacation. — Davis & Farnum Manufacturing Co. shut down temporarily on account of excessive heat. *August.* Boston Manufacturing Co., cotton goods, shut down 2 weeks for curtailment of production. — All factories shut down for muster day. — American Waltham Watch Co. and O'Hara Dial Co. shut down temporarily on account of the heat. — New England Motor Carriage Co. sold to Waltham Motor Carriage Co.; in November, resold to Stanton Manufacturing Co. who combined the business with their own. *September.* Boston Manufacturing Co. shut down one week for repairs. — American Watch Tool Co. added new engine. *December.* American Waltham Watch Co. shut down for holidays.

Ware. In February, mills obliged to shut down on account of high water. — Geo. H. Gilbert Manufacturing Co. added machinery to worsted spinning department; in July, shut down on account of accident to machinery. *July.* Otis Company added new battery of boilers; in August, shut down in part owing to lack of power.

Warren. In January, Thorndike Co. equipped No. 4 mill with machinery for manufacture of stockinet; in April, added more machinery; in May, began erection of new cloth room and storehouse; in September, shut down for repairs; in November, added new water wheel; in December, shut down on account of ice getting into water wheel. — Torkelson Manufacturing Co. shut down on account of accident to machinery; in December, shut down for holiday vacation. *November.* Sayles & Jenks Manufactur-

ing Co. shut down on account of dull trade; in December, shut down a second time for same reason.

Watertown. In May, Falcon Worsted Co. leased 20 looms and began manufacturing. *October.* Bemis Mills shut down indefinitely. — Hood Rubber Co. began on addition to factory, 4 stories, 80 x 100 feet; later, increased capital stock to \$750,000; in December, shut down for 10 days.

Wayland. In May, Caswell Bros. succeeded by Caswell Shoe Co. incorporated; authorized capital, \$7,000. *September.* Shoe factory of R. C. Dean destroyed by fire.

Webster. In February, mills were generally shut down on account of high water. — Eben S. Stevens of Quinnebaug, Conn., began erection of new woollen mill, 2 stories, 90 x 90 feet; completed in July. *March.* L. D. Perry, woollen yarn, added new cards; in September, began erection of new mill and other buildings as follows: yarn mill, 120 x 80 feet; picker house, 30 x 40 feet; and boiler house, 40 x 20 feet. *August.* H. N. Slater Manufacturing Co., cotton goods, shut down for repairs; in December, added new spindles and looms. *October.* A. J. Bates & Co., shoes, began on addition and improvements to factory.

Wellesley. In May, R. T. Sullivan Co., wool extracts, completed new dry house.

Wendell. In June, Farley Paper Co. shut down for repairs on mill and dam. *July.* Orange Knitting Co. shut down 2 weeks for vacation.

Westborough. In September, Geo. B. Brigham & Sons shut down cutting department for one week. *November.* F. W. Forbes, retired sleigh manufacturer, died.

West Boylston. In January, S. Gould, shoddy, moved machinery to Shirley. *February.* Clarendon Mills completed removal of machinery to its new mill at West Peterboro, N. H.

West Bridgewater. In January, A. S. Lyons began operations with a new sawmill purchased in Vermont; in April, totally destroyed by fire. — Sawmill of Daniel B. Davis damaged by fire. *October.* Chas. E. Tisdale & Co., shoes, shut down 2 days for vacation.

West Brookfield. In July, Olmstead-Quaboag Corset Co., owing to increase of business, leased vacant Wood shoe factory; in August, shut down for stock taking. *August.* Standard Fishing Rod Co. formed; leased plant and began equipping for manufacturing; first shipment of product made in October; in December, shut down for holiday vacation.

Westfield. In January, W. Warren Thread Co. began erection of addition, 3 stories, 50 x 165 feet; in December, began on another addition, 3 stories, 50 x 160 feet. *February.* Hial Holcomb, retired whip manufacturer, died, aged 82 years. *March.* Dewitt C. Sackett, cigar manufacturer, died, aged 57 years. *June.* Solar Paper Co. went out of business and was succeeded by the Columbian Paper Co., a combination of the Solar Paper Co. and the Western Photo Paper Co. of Chicago. *July.* Emmons Howard, organ manufacturer, purchased good will and name of the Johnson & Son organ business. — The American Cabinet Hardware Co. and Textile Manufacturing Co. absorbed by the American Silver & Casket Co., a new combination comprising the above companies and the following: Eldridge & Co., Taunton, Mass.; Strong Manufacturing Co. and Morgan Silver Plate Co., Winsted, Conn.; Westfield Plate Co., Thompsonville, Conn.; and Grilley Co. and United States Casket Hardware Co., New Haven, Conn.; incorporated under New Jersey laws with authorized capital of \$500,000. — H. B. Smith of H. B. Smith Co. died, aged 83 years. *September.* Owen Rockwell died, aged 86 years; he was one of the veteran powder manufacturers of Western Massachusetts. *December.* James C. Alden, formerly a woollen goods manufacturer in Westfield, died in Providence, R. I., aged 55 years.

The Westfield Board of Trade gave notice of a meeting to be held after the first of the year to consider a communication received from the American Bicycle Co. relative to the plant of the Lozier Manufacturing Co. This company was anxious to obtain the deeds of the plant which were held by the Board of Trade in the interest of the subscribers, who had contributed a large sum to bring the Lozier bicycle business to Westfield. The contract between the Lozier company and the Board of Trade has $2\frac{1}{2}$ years to run. The

proposition was that the deeds of the property be turned over to the American Bicycle Co. which wrote, in substance, as follows: "Upon the delivery of the deeds we will build, with due diligence, an addition, or additions, having a total floor space of not less than 30,000 square feet, and to cost not less than \$15,000, and will, to the best of our ability and so far as good business will permit, equip and operate the factory for manufacturing purposes for three years from the first day of January, 1901; and will not, for the period of four years next ensuing from January 1, 1901, sell the property; with the understanding that so fast as the addition or additions are constructed the deposit of \$15,000 may be drawn upon on account of the erection, in manner and form as in the case of the construction of the original plant."

Westford. In April, Allan Cameron died, aged 77 years; in 1853, Mr. Cameron came to this town and bought an interest in the Abbot Worsted Co. forming a partnership with John Abbot which connection continued to the time of his death; in October, the company was changed from a private firm to a corporation with an authorized capital of \$600,000, with the sons of the two partners as principal incorporators.

Westhampton. In November, W. H. Lyman leased his sawmill to the Columbian Specialty Co. of Easthampton.

West Newbury. In January, West Newbury Co-operative Creamery began operations. *September.* S. C. Noyes & Co., combs, and Wm. R. Chaplin, shoes, shut down one day for vacation. *November.* S. C. Noyes & Co. shut down for election day and for the Thanksgiving holiday season.

Weston. In June, Thomas Faber & Son, sash cord, retired from business; no successor.

Weymouth. In February, Benj. S. Lovell, president of the John P. Lovell Arms Co., died, aged 56 years. *July.* M. Sheehy & Co., shoes, shut down one week. *August.* E. H. Stetson & Co. succeeded by Stetson Shoe Co., Incorporated; authorized capital, \$40,000. *December.* Fireworks factory of Edmund S. Hunt & Sons damaged by fire and explosion.

Whitman. In January, Commonwealth Shoe Co. added women's shoes to product. — L. C. Bliss & Co. shut down at close of season's run for a few days. *April.* United States Shoe Co. shut down one week. *June.* Old Colony Boot & Shoe Co. shut down one week for stock taking. *September.* L. C. Bliss & Co. began on addition to be used as last department. *October.* Atwood Bros. installed new boiler in their box factory.

Wilbraham. In December, Collins Manufacturing Co., paper, shut down for repairs.

Williamsburg. In February, Haydenville Co. began erection of new melting furnaces; in July, installed new boiler; in December, shut down for stock taking. *November.* Hill Bros.' button shop shut down for repairs.

Williamstown. In January, Williamstown Manufacturing Co. shut down owing to accident to main shaft; in September, fire damaged picker room. *February.* Local mills shut down temporarily on account of high water. *August.* Boston Finishing Co. shut down in part; in September, shut down for one week; later, shut down on account of accident to machinery; in October, began on addition to be used as a dye room, one story, 66 x 64 feet; new engine also installed.

Winchendon. In August, White Bros., cotton goods, began on erection of new mill.

Winchester. In November, United Shoe Machinery Co. began erection of new factory, 300 x 80 feet, for manufacture of drop forgings and other heavy work.

Winthrop. In January, S. Payne & Co. discontinued currying leather; no successor.

WOBURN. In April, new currying shop of Beggs & Cobb completed. *September.* Freeman A. Loring died; he formerly operated the Bryant & King tannery, retiring from business in 1895. *November.* James Robertson bought the Pollard factory and began manufacture of leather. — N. J. Simonds, retired manufacturer of counters, died.

WORCESTER. In January, the Eastern Bridge and Structural Company organized under Massachusetts laws; authorized capital, \$75,000; leased plant and began operations. — James H. Whittle began excavating for addition to his machine shop, 3 stories, 50 x 160 feet. — L. A. Hastings, harnesses, incorporated as L. A. Hastings Co. — Stockholders of Worcester Optical Company voted to increase their holdings and subscribe funds for enlarging the plant and adding new machinery; in July, plant shut down indefinitely owing to business complications. — Parker Hat Company incorporated; authorized capital, \$5,000.

February. Harrington & Richardson Arms Company began manufacture of guns, a branch which they abandoned in 1886 to confine themselves to the manufacture of revolvers. — Sherman Envelope Co. moved into larger quarters. — Abraham Burlingame died, aged 58 years; he was proprietor of the Burlingame Engine Works and inventor of the Burlingame pulley and engine. — Edward H. Stark died, aged 71 years; he was one of the oldest boot manufacturers in Worcester; in 1863 he opened a small shop with his brother as partner and increased the business, retiring about two years ago. — Fire damaged plants of National Biscuit Company and Hamblin & Russell Manufacturing Company, wire goods.

March. A number of local mills and factories compelled to shut down for different periods on account of high water. — Queensbury Mills began removing its machinery from Hudson to a plant at South Worcester; company manufactured worsteds and moved 8 years ago from Sanford, Maine, to Hudson manufacturing as the Hudson Spinning Co.; a corporation purchased the business and organized as the Queensbury Mills Co. — National Biscuit Co. decided to discontinue manufacturing in this city. — Morris Cohen, wrappers, fined for running plant on Sunday. — Wachusett Mills Co. began operations with 25 looms. — John C. Otis died; he was president and treasurer of the Union Water Meter Co.

April. Etna Knitting Co. occupied new quarters. — Worcester Machine Screw Co. with the Chicago Screw Co. and Detroit Machine Screw Co. absorbed by a combination known as Standard Screw Co.; incorporated under New Jersey laws; authorized capital, \$1,500,000. — Washburn & Moen branch of American Steel Wire Co. shut down 3 days. — Washburn Wire Co. incorporated under Maine laws; authorized capital, \$1,500,000. — New factory, 3 stories, 40 x 160 feet, begun for occupancy by Vocallion Organ Co. — A. Burlingame Co. incorporated from private firm of A. Burlingame & Co.; authorized capital, \$20,000. — Fire damaged dry house of Baker, Ricketson Co.'s factory twice; knife factory of L. Hardy & Co.; and dressmaking establishment of M. E. Burnes.

May. Washburn & Moen began erection of addition to wire works, one story, 60 x 100 feet. — Harrington & Richardson Arms Co. began erection of addition for manufacture of new gun recently put on the market; one story, 50 x 60 feet. — Worcester Carpet Co. shut down for stock taking. — Gilman & Moffett succeeded C. A. Moffett, candy manufacturer; in July, moved into larger quarters.

June. Worcester Brewing Co. installed a 150 ton ice refrigerating plant, and new boiler. — The Locomobile Co. of America leased the balance of building partially occupied and the former occupants removed. — Washburn & Moen shut down for the summer months. — Junction Foundry Co. began manufacturing in plant formerly run by A. B. Davidson who retired from business in May, 1899.

July. Massasolt Knitting Co., of Spencer, leased quarters and began removal of plant to this city. — N. A. Lombard & Co. incorporated under Massachusetts laws; authorized capital, \$20,000; to manufacture woollen machinery. — Wright & Colton Wire Cloth Co. shut down one week for repairs. — The United States Lunch Wagon Co. bought out the T. H. Buckley Lunch Wagon & Catering Co., thus controlling the lunch wagon business of the United States and Canada. — Fire destroyed drop forging shop of Locomobile Co. of America. — John R. Scott, woollen goods, shut down 3 weeks; in December, shut down 10 days.

August. Merrick D. Marcy died, aged 68 years; he was for many years a manufacturer of spinning rings but had retired. — Fire damaged dyehouse of Charles W. Crough.

September. Southgate Woollen Co. shut down during month.

October. Clarendon Counter Co. incorporated; authorized capital, \$5,000; to manufacture shoe counters, as successor to C. H. Clarendon.

November. Curtis Manufacturing Co. began addition to plant. — Morgan Spring Co. began erection of new factory, 2 stories, 140 x 40 feet. — Charles Case Shoe Co. incorporated under Massachusetts laws; authorized capital, \$28,000; to manufacture men's and women's shoes. — Fire slightly damaged plant of Bay State Shoe & Leather Co. — George L. Allen died, aged 47 years; he was a member of William Allen & Sons, builders of steam boilers.

December. Parisian Wrapper Manufacturing Co. shut down owing to business complications.—The Natural Food Company organized with authorized capital of \$10,000,000. This company becomes the licensee of the Worcester plant of the Shredded Wheat Co. Until the new factory, which will be located at Niagara Falls, N. Y., is completed, the shredded wheat biscuits are to be made at Worcester; after that, the Worcester plant may be devoted to the manufacture of the machinery used in preparing the food products made by the Natural Food Co. as well as the biscuit. The plan of the deal made comprehended that the stockholders in the Shredded Wheat Co. were to be granted a yearly dividend of 8 per cent for 13 years, which is the corporate life of the company; at the close of this term of years, the capital stock of \$1,400,000 will be bought for cash, the stockholders receiving par for their holdings.—Silas Garfield died, aged 68 years; he was one of the founders of the Washburn & Garfield Manufacturing Co., manufacturers of steam, water, and gas pipe and fittings.—Mill of the Southgate Woollen Co. destroyed by fire; rebuilt.—Fire damaged plant of Stewart Specialty Manufacturing Co., makers of cardboard photograph cases. *During the year*, the Wachusett Thread Co. increased capital stock \$50,000 and installed new machines.

THE STATE. As in past years, the preceding chronology has been prepared from information supplied by manufacturers, and from other sources. It includes the more important events affecting the conduct of the industrial enterprises of the Commonwealth. Returns are made from 211 cities and towns as against 224 cities and towns reported in the volume for 1899.

In the following summary will be found a statement of the principal industrial events arranged by subjects and industries. The proper method of reading the table is as follows: In 1900, there were 156 instances of new firms or industries established in the several cities and towns; of these, three were established to manufacture artisans' tools; 52 for the manufacture of boots and shoes; 7, clothing; 5, cotton goods, etc. There were 119 new buildings constructed during the year, 6 for firms engaged in the manufacture of boots and shoes; 16, cotton goods; 15, woollen goods, etc. Other lines may be read in a similar manner.

Corporations and Capital Stock.

In the following table, the number of new corporations formed during the year is shown, together with the amount of capital authorized by their charters; also increases and decreases in capital stock, classified by industries. These figures do not include private firms which, during 1900, changed from the individual form to the corporate form of management.

SUBJECTS AND INDUSTRIES.	Number	Amount of authorized Capital
New Corporations.	48	\$10,535,500
Artisans' tools,	1	25,000
Boots and shoes,	11	260,000
Brick, tiles, and sewer pipe,	1	125,000
Carriages and wagons,	2	150,000
Clothing,	3	25,000
Cotton goods,	3	542,500
Electrical apparatus and appliances,	1	100,000
Flax, hemp, and jute goods,	1	5,000,000
Food preparations,	2	220,000
Hosiery and knit goods,	1	10,000

Metals and metallic goods,	1	700,000

RECAPITULATION. 1899, 1900.

In the following table, we bring forward the subjects shown in the two preceding presentations in comparison with similar data contained in the Chronology for 1899:

CLASSIFICATION OF SUBJECTS.	NUMBER OF ESTABLISHMENTS, ETC.	
	1899	1900
New establishments, etc.,	160	156
Buildings constructed during the year,	73	119
Machinery added to plants,	175	146
Other additions to plants,	178	136
Addition of new class of product to manufacture,	28	20
Rebuilding of burned factories, etc.,	19	15
Removals to new or larger quarters,	43	46
Resumption of business after protracted shutdowns,	29	5
Increased capacity of plants,	-	31
Changes from private firms to corporations,	20	23
Changes in firms, firm names, etc.,	64	77
Changes in character of product,	7	5
Changes in character of machinery,	12	11
Consolidations of firms and corporations,	12	6
Removals of firms and industries to Massachusetts from other States,	8	-
Removals of firms and industries from Massachusetts to other States,	9	15
Removals from one town to another in Massachusetts,	27	19
Introduction of electric lighting and power into factories, etc.,	19	9
Suspensions for vacations,	65	81
Suspensions for stock taking,	46	50
Suspensions on account of low water,	24	15
Suspensions on account of high water,	8	65
Suspensions on account of repairs and improvements,	68	80
Suspensions on account of shortage of materials,	-	5
Suspensions for curtailment of production,	1	70
Suspensions on account of accidents to machinery, etc.,	78	78
Suspensions on account of dull trade,	13	27
Suspensions (temporary as to duration),	-	111
Suspensions (indefinite as to duration),	54	17
Suspensions (cause not given),	99	59
Suspensions on account of retirement from business (no successor),	65	62
Sales of plants in whole or in part,	137	72
Sales of plants to industrial combinations,	91	55
Plants damaged by explosions,	5	6
Fires during the year,	275	185
Deaths of manufacturers,	111	120
New corporations,	47	48
Amount of authorized capital,	\$5,721,000	\$10,535,500
Increases in capital stock,	20	12
Amount of increase,	\$4,225,500	\$1,938,000
Decreases in capital stock,	7	2
Amount of decrease,	\$1,110,800	\$750,000
Net increase of capital stock,	\$3,114,700	\$1,188,000

INDUSTRIAL DIVIDENDS.

In the following table, we reproduce, as a matter of record, the annual dividends paid in certain manufacturing corporations doing business in this Commonwealth as compiled by Joseph G. Martin of Boston. Comparison is made between the rates paid in 1899 and 1900.

Dividends.

NAMES OF COMPANIES.	RATE OF DIVIDENDS		NAMES OF COMPANIES.	RATE OF DIVIDENDS	
	1899	1900		1899	1900
Acushnet Mill Corporation, .	\$16	1\$20	City Manufacturing Co., .	6¾	8
Ætna Mills,	2	9	Conanicut Mills,	6	8
A. L. Blackmer Co.,	5	6	Cordis Mills,	10	10
Am. Agricultural Chemical, (pref.),	1½	6	Cornell Mills,	*12½	*13
American Glue Co. (pref.), .	8	8	Crystal Spring M'fg Co., .	5¼	4½
American Linen Co.,	4½	6½	Dartmouth M'fg Corporation,	4½	10
Am. Soda Fountain Co. (1st pref.),	—	8	Davol Mills,	5½	8
Am. Steel & Wire Co.,	—	5¼	Diamond Match Co.,	10	10
Am. Steel & Wire Co. (pref.),	5¼	5¼	Dwight Manufacturing Co., .	10	12
Am. Sugar Refinery Co., . .	12	7¾	Everett Mills,	5	6
Am. Sugar Refinery Co. (pref.),	7	7	Fisher Manufacturing Co., .	5	6
Am. Waltham Watch Co., . .	*9	10	Fiskdale Mills,	—	4
Am. Woollen Co. (pref.), . .	3½	7	Flint Mills,	6	8
Appleton Co.,	6	7	General Electric Co., . . .	3	6½

Ashton Valve Co.,	7	*7	Granite Mills,	6	8
Atlantic Mills,	0	4	Grinnell M'fg Corporation, .	10	*10
Barnaby Manufacturing Co., .	6	8	Hamilton Manufacturing Co.,	4½	6
Barnard Manufacturing Co., .	3¼	8	Hamilton Woollen Co., . . .	1	4
Bigelow Carpet Co.,	4	1½	Hargraves Mills,	6	6
Boott Cotton Mills,	3	6	Hathaway M'fg Co.,	10	*12½
Border City M'fg Co.,	6	*8	Hathaway, Soule, & Harring- ton, Inc.,	4½	2
Boston Belting Co.,	8	8	Heywood Bros. & Wakefield Co. (pref.),	4	4
Boston Duck Co.,	8	10	Holyoke Water Power Co., .	10	10
Boston Woven Hose & Rub- ber Co. (pref.),	3	3	International Paper Co. (pref.),	6	6
Bowker Fertilizer Co.,	7	6	King Philip Mills,	7½	*6
Bristol Manufacturing Co., . .	4½	6¾	Lancaster Mills,	8	8
Chace Mills,	6	6	Laurel Lake Mills,	3¾	6
Chapman Valve Co.,	12	12	Lawrence M'fg Co.,	6	8
Chilcopee Manufacturing Co.,	6	6	Lowell Bleachery,	4	4
			Lowell Hosiery Co.,	4	4

¹ \$4 of this extra in April.

² Also 16¾ stock dividend Oct. 12, when capital stock was increased \$1,000,000.

³ One per cent of this extra.

⁴ See Lowell Manufacturing Co.

⁵ Also a cash dividend of 50 per cent.

⁶ 5 of this extra, in 1899 and 1900.

⁷ Capital increased from \$800,000 to \$1,000,000, and a cash dividend of \$75 per share paid Dec. 1 from proceeds of sale of stock and 1st mortgage 5 per cent bonds.

⁸ 2½ of this extra in April.

Dividends — Concluded.

NAMES OF COMPANIES.	RATE OF DIVIDENDS		NAMES OF COMPANIES.	RATE OF DIVIDENDS	
	1899	1900		1899	1900

Pocasset Manufacturing Co., .	4½	6	Weetamoe Mills,	4½	6
Potomska Mills Corporation, .	5	6	Whitman Mills,	6	7
Putnam Nail Co.,	5	0			
Reece Button Hole Machine Co.,	12	10			

¹ \$25 per share in 1899; combined with Bigelow Carpet Co. in 1900.

² Increased capital stock from \$2,500,000 to \$2,750,000 in July, and reduced par value of stock from \$1,000 to \$100 — 10 shares for one.

³ \$8 per share in 1899 and 1900.

⁴ Consolidated with Revere Copper Co. and Taunton Copper Co.

⁵ Also a stock dividend of 25 per cent, and capital stock increased from \$600,000 to \$750,000.

⁶ Increased capital stock from \$2,500,000 to \$3,000,000 in March, and at same time paid extra cash dividend of 20 per cent which just covered the increase.

⁷ Also a cash dividend of 25 per cent.

⁸ 6½ of this extra.

⁹ Organized in 1900 from a combination of Revere Copper Co., Taunton Copper Co., and New Bedford Copper Co.

¹⁰ 33½ extra dividend Oct. 27 when capital stock was increased \$500,000.

¹¹ Also a cash dividend of 15 per cent and stock dividend of 60 per cent when capital was increased from \$750,000 to \$1,200,000.

STOCK PRICE QUOTATIONS.

In the following table is shown the highest and lowest stock price quotations for 1899 and 1900, together with the amount of capital stock on January 1, 1901, and the par value of stock. The figures were compiled by Joseph G. Martin of Boston.

BUSINESS FAILURES.

The number of commercial failures in the United States in 1900 was 10,774. The total liabilities were \$138,495,673 and the total assets, \$88,079,555. Of these failures, 1,123, or 10.42 per cent, were in Massachusetts with liabilities of \$15,300,835 and assets of \$7,817,381, an increase over 1899, so far as relates to Massachusetts, of 180 in the number of failures, but a decrease of \$455,376 in amount of liabilities, and a decrease of \$839,200 in amount of assets.

The data presented in the following tables were supplied by R. G. Dun & Co. of New York and are taken from their official publication, *Dun's Review*. The first table exhibits the number of failures in Massachusetts from 1893 to 1900, inclusive, classified as manufacturing, trading, and other commercial.

Number of Commercial Failures. 1893-1900.

YEARS.	NUMBER OF COMMERCIAL FAILURES			
	Manufacturing	Trading	Other Commercial	Totals
1893,	356	718	14	1,088
1894,	285	546	5	836
1895,	288	270	9	567
1896,	299	563	19	881
1897,	301	605	18	924
1898,	314	674	15	1,003
1899,	355	555	33	943
1900,	383	649	91	1,123

The second table exhibits the liabilities of the establishments noted in the preceding table, under the same classification.

Amount of Liabilities. 1893-1900.

YEARS.	CLASSIFIED FAILURES—LIABILITIES			
	Manufacturing	Trading	Other Commercial	Totals
1893,	\$9,594,092	\$12,629,179	\$485,060	\$22,708,331
1894,	7,219,977	9,014,919	232,735	16,467,631
1895,	5,376,080	4,849,891	716,667	10,942,638
1896,	9,044,924	6,896,372	164,533	16,107,829
1897,	13,202,944	5,740,421	816,046	19,759,411
1898,	11,029,392	6,449,165	74,366	17,552,923
1899,	5,254,899	10,071,111	480,201	15,756,211
1900,	6,639,908	7,173,675	1,487,252	15,300,835

In the third table, we show the average amount of liabilities per failure for the years 1893 to 1900.

Average Liabilities. 1893-1900.

YEARS.	AVERAGE AMOUNT OF LIABILITIES PER FAILURE			
	Manufacturing	Trading	Other Commercial	Totals
1893,	\$26,950	\$17,589	\$34,647	\$20,872
1894,	25,333	16,511	46,547	19,698
1895,	18,667	17,963	79,630	19,299
1896,	30,251	12,253	8,660	18,284
1897,	43,864	9,488	45,336	21,385
1898,	35,125	9,568	4,958	17,500
1899,	14,803	18,146	13,036	16,709
1900,	17,337	11,063	16,343	13,625

The relative proportions of the liabilities in manufacturing, trading, and other failures of the total are shown in the next table.

Proportion — Classified Liabilities of Total Liabilities. 1893-1900.

YEARS.	PROPORTION OF CLASSIFIED LIABILITIES OF TOTAL LIABILITIES			
	Manufacturing	Trading	Other Commercial	Totals
1893,	42.25	55.61	2.14	100.00
1894,	43.85	54.74	1.41	100.00
1895,	49.13	44.32	6.55	100.00
1896,	56.15	42.83	1.02	100.00
1897,	66.82	29.05	4.13	100.00
1898,	62.84	36.74	0.42	100.00
1899,	33.35	63.92	2.73	100.00
1900,	43.40	46.88	9.72	100.00

The next table exhibits the proportion of assets of liabilities in all failures considered.

Proportion — Assets of Liabilities. 1893-1900.

YEARS.	PROPORTION OF ASSETS OF LIABILITIES — TOTAL COMMERCIAL FAILURES		
	Assets	Liabilities	Percentages
1893,	\$12,649,296	\$22,708,331	55.70
1894,	6,861,021	16,467,631	41.66
1895,	4,342,003	10,942,638	39.68
1896,	8,738,546	16,107,829	54.25
1897,	13,861,479	19,759,411	70.61
1898,	11,384,683	17,552,923	64.86
1899,	8,656,581	15,756,211	54.94
1900,	7,817,381	15,300,835	51.09

In 1900 for each \$100 of liabilities there were \$51.09 in the form of assets; indicating, on this basis, a probable settlement, on an average, of 50 cents on the dollar.

54 STATISTICS OF MANUFACTURES. [Pub. Doc.]

The next table shows for the United States and for each State the aggregate and average amounts of liabilities in the failures which occurred among manufacturing establishments during the year 1900.

Aggregate and Average Liabilities. 1900.

BATTLE SHIP CONSTRUCTION IN MASSACHUSETTS.

The recent allotment of a contract to the Fore River Ship and Engine Co. of Quincy, by the United States Government, for the construction of two 15,000-ton battle ships has awakened an interest in the shipbuilding industry and its history in this State, especially in relation to such plants as have been or are now engaged in the construction of war vessels for the Government.

Shipbuilding in America dates back to 1607, when the *Virginia* was built at the mouth of the Kennebec River. In 1614 the *Onrest** was built at New York, and in 1631 the *Blessing of the Bay* was launched by its owner, Gov. Winthrop. This vessel was built on the bank of the Mystic River, probably not far from the governor's house at "Ten Hills." There is a tradition that it was built on the north shore of the river, and, therefore, within the limits of Medford. The record concerning it is as follows:

"July 4, 1631. The governor built a bark at Mistick, which was launched this day, and was called 'The Blessing of the Bay.' Aug. 9, the same year, the governor's bark, being of thirty tons, went to sea. It cost £145. The owner said of it, May 16, 1636, 'I will sell her for £160.'"

These vessels were employed in the coasting or fishing trade, and it was not until 1640 that vessels for the transatlantic trade were launched in the Colonies. Shipbuilding, on an extended scale, was carried on during the Revolutionary War both by the Government and by private individuals. At the close of hostilities many of these vessels engaged in the East Indian and other foreign trades, and after the close of the war of 1812, packet ships, as they were called, were constructed to accommodate the immigration then beginning from Europe to the Colonies.

The great abundance of oak growing near the Merrimac River made that a favored locality for shipbuilding, and as early as 1650 Newbury, Salisbury, and Haverhill were actively engaged in the work. The famous frigate *Alliance* was built at Salisbury Point in 1778 and was the pride of the whole navy on account of her beauty and great speed. She was named in honor of the alliance between France and this country. The brig *Pickering* was built for the United States by the Merrills of Newburyport in 90 days and was sent to Boston, July 27, 1798, for her guns and crew. The ship *Merrimack* was built in 75 days at Newburyport and loaned to the Government, her keel being laid July 9 and her launching taking place Oct. 12, 1798. In 1799, the ship *Warren* was built by Daniel Webster at Salisbury under contract with the United States, and was launched September 26. In September, 1813, the United States sloop of war *Wasp* was launched from the yard of Orlando B. Merrill, Newburyport, and, about this time, two gunboats, numbered 81 and 82, were built in the town of Newbury by Stephen Coffin.

The first privateer fitted out within the limits of the original 13 colonies sailed from Newburyport in August, 1775, and was owned by Nathaniel Tracy. Privateers were built and fitted out at various other places; but the greater part of the regular ships of war constructed in the State were built in Boston and immediate vicinity. In Hart's shipyard, upon the site of which Constitution Wharf now stands, the frigate *Constitution* was built in 1797, and launched Oct. 21, 1798. The frigate *Boston* was built for the Government by subscription of the citizens of Boston at the same yard, the keel being laid Aug. 22, 1798, and the ship launched May 20, 1799, in the presence of John Adams, president of the United States. Among the other vessels built in Boston and vicinity under contract for the United States, or purchased after launching for the use of the Government, were the following: *Herald*, ship, launched 1798; *Essex*, ship, built at Salem, launched 1799; *Argus*, brig, launched 1803; *Spitfire*, ketch, launched 1805; *Vengeance*, bomb brig, launched 1808; *Frolic*, ship, launched 1813; *Rattlesnake*, brig, built at Medford, launched 1813; *Etna*, third of the name, bomb brig, launched 1846; *Stromboli*, bomb brig, launched 1846; *Edith*, steamer, launched 1847; and *Massachusetts*, transport steamer, ship rigged, built by Samuel Hall and E. H. Delano, launched 1845. In the war of 1812, Boston fitted out 81 privateers and Salem 40. At the

Charlestown Navy Yard,

which was established a hundred years ago for building, repairing, and equipping ships of war, there have been built 42 vessels of different rates and tonnage since it was first opened, the first ship having been launched in 1814. These vessels range from ships of the line down to small exploring brigs and barques, and include both steamers and sailing vessels, as will be seen by the following list:

* According to Mrs. Martha J. Lamb's History of New York, this vessel was constructed from the burned hull of a Holland vessel called the *Tiger* and was renamed the *Restless*.

NAME.	Description	Remarks
<i>Sail.</i>		
Independence, .	Ship of the line, . . .	Launched in 1814.
Vermont, . .	Ship of the line, . . .	Begun in 1818, launched Sept. 14, 1848.
Alligator, . .	Schooner, . . .	Launched Nov. 4, 1820.
Boston, . . .	Ship, . . .	Launched Oct. 16, 1825.
Cumberland, .	Frigate, 1st class, . . .	Begun in 1825, launched May 24, 1842.
Warren, . . .	Sloop of war, 2nd class, . .	Begun in 1825, launched Nov. 29, 1826.
Falmouth, . .	Sloop of war, 2nd class, . .	Begun in 1826, launched Nov. 23, 1827.
Boxer, . . .	Schooner-brig, . . .	Launched Nov. 22, 1831.
Consort, . . .	Bark for exploring expedition,	Launched Oct. 29, 1836.
Porpoise, . .	Brig, . . .	Launched in 1836.
Cyane, . . .	Sloop of war, 2nd class, . .	Launched Dec. 2, 1837.
Marion, . . .	Sloop of war, 3rd class, . .	Begun in 1838, launched Apr. 24, 1839.
Bainbridge, .	Brig, . . .	Launched Apr. 26, 1842.
Erie, . . .	Store ship, . . .	Launched in 1842.
Plymouth, . .	Sloop of war, 1st class, . .	Launched Oct. 4, 1843.
<i>Steam.</i>		
John Hancock, .	Screw cutter, . . .	Begun, 1849; launched in 1850; lengthened in 1853.
Princeton, . .	Screw sloop, 3rd rate, . . .	Launched 1851.
Merrimack, . .	Screw frigate, . . .	Launched June 15, 1855.
Hartford, . . .	Screw sloop, . . .	Launched Nov. 22, 1858.
Narragansett, .	Screw sloop, 2nd class, . . .	Begun 1858, launched Feb. 15, 1859.
Wachusett,* . .	Screw sloop, . . .	Launched Oct. 10, 1861.
Housatonic,* . .	Screw sloop, . . .	Launched Nov. 20, 1861.
Maratanza,* . .	Paddle-wheel double ender, .	Launched Nov. 26, 1861.
Canandaigua,* .	Screw sloop, . . .	Launched Mar. 28, 1862.
Genesee,* . . .	Paddle-wheel double ender, .	Launched Apr. 2, 1862.
Tioga,* . . .	Paddle-wheel double ender, .	Launched Apr. 18, 1862.
Tallapoosa,* . .	Side-wheel double ender, . .	Launched Feb. 17, 1863.
Pequot,* . . .	Screw steamer, 4th rate, . . .	Launched June 4, 1863.
Winoski,* . . .	Paddle-wheel double ender, .	Launched July 30, 1863.
Saco,* . . .	Screw steamer, 4th rate, . . .	Launched Aug. 28, 1863.
Monadnock,* . .	Double-turreted iron clad, . .	Launched Mar. 23, 1864.
Ammanooosuc, .	Screw steamer, . . .	Launched June 21, 1864.
Guerriere,* . . .	Screw steamer, 1st rate, . . .	Launched Sept. 2, 1865.
Manitou, . . .	Screw steamer, 2nd rate, . . .	Launched Aug. 25, 1866.
Nantasket, . .	Screw steamer, 3rd rate, . . .	Launched Aug. 17, 1867.
Alaska, . . .	Screw steamer, 2nd rate, . . .	Launched Oct. 31, 1868.
Vandalla, . . .	Screw steamer, 3rd rate, . . .	Rebuilt to take the place of sailing vessel of same name which was broken up; keel laid in 1872, launched Oct. 28, 1874.
Intrepid, . . .	Torpedo boat, . . .	Keel laid 1872, launched Mar. 5, 1874.

* Engines for these vessels built outside of Navy Yard.

The following named vessels were begun at the Navy Yard, but never completed, and were finally broken up:

Virginia, sail, ship of the line; begun in 1818, broken up upon the stocks in 1833-34.

Pompanoosuc, screw steamer, first class; name changed to *Connecticut*; broken up in 1833-34.

Kewadin, screw steamer, first class, name changed to *Pennsylvania*; broken up in 1833-34.

Quinsigamond, double-turreted iron clad, first rate; name changed to *Oregon*; broken up in 1883-84.

Of the ships built at the Navy Yard, the only one not constructed of wood was the screw torpedo boat *Intrepid*, which was built of iron, but for various reasons it was not deemed a success by Navy officers in general. It was totally unlike the modern torpedo boat, being a small slow steam war vessel of limited efficiency, supplied with auxiliary sail power, and a single tube for discharging torpedoes ahead.

EAST BOSTON

has for a long time been a shipbuilding centre, and although operations have been principally confined to building and repairing mercantile vessels, quite a number of steam vessels have been constructed for the United States Government, both of wood and metal. The first iron steamer built here was the *R. B. Forbes*, a large screw ocean tug of 329 gross tons, for the use of the underwriters of this port. This vessel was constructed by Otis Tufts and finished in 1845. It was supplied with twin screw propellers of Ericsson design, especially adapted for outside work in rough water, and lived long enough to be bought by the Government during the Rebellion and to take part in the capture of Port Royal. There was a small iron paddle-wheel steamer constructed in East Boston about 1857, called the *Argentina*, which was leased to the Government by Capt. Forbes and others, the owners, for surveys on the La Plata River, made by Capt. Page of the Navy; and, about a year later, another, called the *Alpha*, a small paddle-wheel iron steamer of 19 tons register, was transported to the same waters upon the deck of the brig *Nankin*, by the same owners, to be used on similar service. Both of these vessels were built in East Boston, and one of them, the *Argentina*, was partly constructed at the Atlantic Works. The other may have been built by Otis Tufts. Mr. Tufts did not have a regular shipyard, but was able to build small steam vessels from the fact that his plant had a frontage on the water and was readily accessible. A wooden vessel is said to have been built in East Boston for the Italian government in 1850, and Augustus & George T. Sampson built a large steam vessel for the Turkish government, designed for the use of the Viceroy of Egypt, about the same time. At the yards of

Donald McKay,

located on Meridian Street from 1846 to 1854, and on Border Street from that year until 1868, several United States Government vessels were built, although Mr. McKay's worldwide reputation was made by the sailing vessels constructed by him for the mercantile service. He did, however, build at the latter yard a light-draft monitor and the steam double-ender *Ashuelot* during the War of the Rebellion, and, about 1873-4, he built, on contract for the Government, the hull of the *Adams*, third rate, the Government furnishing most of, if not all, the materials. Campbell & Brooks, who succeeded Donald McKay at the plant on Border Street in 1868, built there the hull of the revenue cutter *Samuel Dexter* in 1873. The McKay plant was quite extensive, fronting 600 feet on Border Street and running back to the Harbor Commissioners' line on the water. Many mercantile vessels were built here, including Mr. McKay's masterpiece, the *Great Republic*, built in 1853, of 4,000 tons register, with four decks and four masts. In 1858,

Nathaniel McKay,

a brother of Donald, in company with a Mr. Gallagher, established a plant for the manufacture of boilers on Maverick and Border Streets, near the People's Ferry wharf, under the firm name of McKay & Gallagher. In 1860, on the retirement of Gallagher, the firm became McKay & Aldus. The scope of operations soon broadened into the building of machinery and iron vessels, many of which latter were constructed here for private owners, principally from New York. Several vessels for the Government were built here, viz.: the light-draft monitor *Squando*, and the *Phlox*, *Azalia*, and *Frederic W. Lincoln*. No sailing vessels were constructed. The plant, which was large enough to construct two vessels at a time, had no floating or dry dock, but these facilities were easily accessible. The firm went out of existence in 1866 and the plant became the property of the Atlantic Works in 1869.

Some other East Boston yards have constructed hulls for United States vessels, that of the revenue cutter *Rush* having been built by Smith & Townsend in 1873-5. Two large iron tugs, *Leyden* and *Palos*, still in the United States service, were built at Chelsea by James Tetlow about 1865-6. Mr. Tetlow was a boiler maker by trade, and had a small plant, including shop and wharf, near the present site of Campbell's coal yard, near the ferry, but

it was not originally designed for shipbuilding. The establishment which has, probably, executed the most Government work in East Boston is

The Atlantic Works,

incorporated May 2, 1853. The first plant occupied by this establishment was situated upon Chelsea Street, corner of Marion Street, at which place were constructed the iron steamers *Amoor*, *Ossuree*, *Delta*, and *Beta*, built for Russian and Chinese waters; the *Kilauea*, for the Sandwich Islands; and the *Pembroke*, for American owners. A composite iron and wood steamer, the *Nippon*, which afterwards became a United States blockading vessel during the Civil War, was also built here for American owners. All of these vessels were constructed previous to the Civil War. During that war, the iron monitors *Nantucket* and *Casco*, and the turrets for the monitors *Monadnock*, *Agamenticus*, *Passaconaway*, and *Shackamaxon* were built at this plant. In 1869, the corporation purchased the plant of McKay & Aldus, and in 1893, acquired the estate next south on New Street, upon which was then erected a brick and steel boiler shop, 100 x 226 feet, fitted with the most modern tools, making it equal in efficiency to any shop of its kind in the country. The present plant covers a large area, and is furnished throughout with the necessary tools and facilities for all kinds of marine work. It has traveling cranes in the machine and boiler shops, hydraulic and compressed air plants, flange machines, steam hammers, large rolls, marine railway, and iron shears at the end of its wharf capable of handling 100 tons. There is no dry or floating dock attached to the plant, but on an adjoining estate there are two large marine railways, and within a half mile is the Simpson dry dock, all of which are utilized when necessary.

There is extensive yard room and ample wharfage facilities for working upon several craft at the same time, and the plant is capable of constructing vessels complete, not exceeding 350 or 400 feet in length, of wood or metals, and it is especially adapted to the work of repairing steel hulls damaged by collision or otherwise, in which branch it has done a large amount of work during the past quarter of a century. The accessibility of the plant to persons for whom construction or repairing is being done, and its proximity to the markets for labor and materials, have always had their advantages. Since the establishment of the later plant, the company has constructed the iron brig *Novelty*, 358 tons, for the transportation of molasses in bulk, and the iron steamer *William Lawrence*, 1,049 tons, for the Boston & Baltimore Line, in 1869, and, for the Government, the famous dredge boat, the *Essex*, for use at the mouth of the Mississippi, in 1868, also the wooden steam revenue cutters *Rush* and *Samuel Dexter* (machinery built on the plant) in 1873-4, and the composite steam revenue cutter *Daniel Manning* in 1897. In addition, the company has built a fire boat, two police boats, and two quarantine boats (all steamers) for the city of Boston, 40 wooden tug boats, three steel and three wooden yachts for private parties; and they have now (March, 1901), under construction the steel and bronze yacht *Independence*, built as a possible defender of the American "Cup." Besides the above, the company has been extensively engaged in building marine machinery, including the engines and boilers for the war ships *Canandaigua*, *Sagamore*, *Sassacus*, and *Osceola* built during the War of the Rebellion; the *Franklin*, immediately after the close of that war; and the *Adams* and *Essex*, the hulls of all these vessels having been constructed elsewhere. The advantages which obtain in East Boston for shipbuilding are approached, in a measure, by those of

SOUTH BOSTON

where, in 1842, was built the first iron steamer in New England. This was the *McLane*, constructed by Jabez Coney for the United States, and designed for the Revenue Service. The *McLane* was 142 feet 9 inches long, 22 feet 2 inches broad, and had a depth of hold of 11 feet 11 inches. She was clincher built, wholly of wrought iron, and was propelled by Hunter wheels, that is, paddle wheels let into the side of the ship working horizontally and driven by horizontal engines. The vessel after being launched was tied up for a long time at Coney's wharf at the North End. The engines not proving a success, she was taken back to Coney's works and vertical paddle wheels substituted and operated by means of gearing. The ship served in the Mexican War and was engaged in the bombardment of Vera Cruz and Alvarado where her heavy batteries proved of great value. Shortly after the close of the war, the ship was sold by the Government, her engines taken out and used on a sugar plantation, and the hull devoted to other purposes. Mr. Coney had no regular shipbuilding plant, but carried on a machine shop on Foundry Street, near the water. He also built the engines for the United States steamer *Saranac*.

The first iron vessels constructed in this country of which there are any known records were the steamers *John Randolph*, 122 tons; *Chatham*, 196 tons; and *Lamar*, 196 tons; all built at Savannah, Ga., in the years 1834, 1836, and 1838, respectively. They were built of iron imported from Liverpool, England. The first iron vessel constructed in this country of iron manufactured in the United States was the *Valley Forge*, a steamer of 199 tons, built by Thomas Baldwin at Pittsburg, Penn., in 1839. The first iron vessels built and documented in the United States were the steamers *Black Diamond*, *Vulcan*, *Iron-sides*, and *Anthracite*, which were built by James Cunningham, in New York, in 1842. They were all of the same size, viz.: 137 gross tons, were propelled by screws, and were used in the coal carrying trade between New York and Philadelphia.

From the foregoing, it will be seen that in the construction of the *McLane*, Massachusetts practically entered the field of iron steamship building while it was in its earliest infancy in this country, and up to the War of the Rebellion Boston was one of, if not the foremost city in the Union in the line of building iron steam craft. These early builders were enterprising and daring, and single contracts for construction often ran as high as half a million dollars notwithstanding the limited size of the plants. Other machine shops later on built engines and boilers for Government craft, and, in 1864, Aquilla Adams constructed a light-draft monitor at his plant on First and L Street, which he occupied, together with a foundry on Fourth Street, for about two years. The first regular iron shipbuilding plant established in New England was that of

Harrison Loring,

located in South Boston near the Point, and called the City Point Works. Mr. Loring had for a number of years carried on machinists' work on First Street near Dorchester Avenue, when, in 1837, he built the plant now under consideration. It embraced seven acres of land located on First Street near the present House of Correction. There were 2 large ship houses in immediate connection having machine, boiler, and blacksmith shops. There was a water frontage of 550 feet, upon which he built a pier 700 feet in length, which increased in large measure the efficiency of the plant for repair work. The shops were supplied with the best tools of the day, and both steam and sailing vessels of iron were constructed. An iron steamer called the *Sestos* was built here in 1857-8 for the Hooghly River in India, and was the first built on the Scotch and English principle of framing with angle iron. Previous to this, vessels had been framed in this country with flat iron, to which the plates were fastened by means of iron straps passing over the bars and riveted to the plates. The *Sestos* proved so great a success that it was duplicated in the *Contest* a year later for the same owners.

In 1859-60 two iron paddle-wheel vessels, the *Massachusetts* and *South Carolina*, were constructed to ply between Boston and Charleston, S. C., and were the first vessels purchased by the United States during the Civil War. They were used continuously as blockading ships on the Southern coast until the close of the war. Immediately after these steamers, Mr. Loring built the two iron screw steamers *Merrimac* and *Mississippi*, of 2,000 tons each, which were used by the Government as transports; they were very strong and, for their day, very fast. Between 1861 and 1865, two monitors, *Canonicus* and *Nahant*, and the double-ender *Winnipeg*, the latter for Southern river service, were built. Later numerous tug boats were constructed, and, about 1890, three composite light-ships were built for Government service. Between 1890 and 1893, three steel tugs for the navy were built, viz.: *Iwama*, *Narkeeta*, and *Juanita*, and the 2,000-ton cruiser *Marblehead* which took a prominent part in the recent Spanish-American War. Within a few years the plant has been converted to other uses.

In addition to the complete vessels built at the Loring works, the Government steamer *John Hancock* was remodelled in 1853, and one of the first surface condensers made was placed in the ship. The machinery for the *Hartford*, Admiral Farragut's flagship, was finished at these works in 1853, and placed aboard the ship, and between 1862 and 1865 the machinery for the *Kewadin* was constructed here and sent to the Navy Yard for storage, as, owing to the close of the war, the vessel was never finished. About 1880, these engines were placed in the *Hartford*, where they did service until recently, when the ship was reconstructed.

QUINCY.

In 1884, there was established at East Braintree, a small business known as the Fore River Engine Co., occupying a shop about 25 feet square, to manufacture small marine engines of about 200 horse power capacity, as well as other machinery. In February, 1901, this company reorganized under the laws of New Jersey as the

Fore River Ship and Engine Company,

for the purpose of carrying out a contract for two of the largest battle ships ever constructed in the United States. Under its old title, in 1899, the company obtained a contract to construct two 400-ton torpedo boat destroyers for the United States Government, and, early in 1900, they were awarded the contract for the 3,500-ton protected cruiser *Des Moines*. In this same year they completed a 600-ton light-ship for the Government, and in February, 1901, were awarded the contract for the two 15,000-ton battle ships before mentioned.

In this connection, it is interesting to note the rapid progress made by this establishment since it began operations in 1884. At that time the company occupied a very small plant and employed during the first year only 6 men, while the value of the product did not exceed \$10,000. In 1886, a building 100 x 50 feet was added, a large number of up-to-date machine tools were purchased, and the land area increased to two acres. In 1890, the company began building the hulls of yachts and tugs, in addition to the machinery, the largest being about 100 tons. Previous to this, the number of employes had been gradually increased from 6 to 900, and during 1900 the maximum number reached 500. At the present time (March, 1901), 600 hands are employed, and by the end of this year, in consequence of the Government contracts secured, the force will be increased to 1,500; while in 1902 it is contemplated to have 2,500 men at work. This, it is expected, will be the greatest number employed at one time, and will mean the probable distribution of over \$50,000 in wages each week.

In 1900, the company designed and entered upon the construction of its great shipbuilding plant at Quincy Point. This action was taken in order to acquire more room and greater depth of water, and also because the tools to be installed for the construction of the 3,500-ton cruiser were heavy enough to build much larger ships, and it was not deemed advisable to set up such appliances in a locality where they could not be fully utilized. The plant when completed will be the largest in the United States, and capable of finishing complete the largest mercantile or war ship yet designed. Work of a wider scope can be carried on here than in any other shipbuilding plant in this country, since it is the only establishment having steam hammers large enough to make the heaviest forgings needed for the largest ships, including the propeller shafts, it being possible to forge a steel ingot weighing 40 tons. In addition to this, the company constructs for the vessels built, all the auxiliary machinery such as steam pumps, electric-light engines, steering engines, etc.

The area embraced by the plant is 75 acres, including docks. The buildings, which are of wood, are very systematically arranged and consist of forge, boiler, machine, joiner, and carpenter shops, storehouse, foundry, tool house, restaurant, and office. It is equipped with electric light, which is manufactured on the premises. All heavy machine and shipbuilding tools are operated by independent electric motors, instead of being driven by belts, while the small machine tools are arranged in groups under short shafts, each shaft being run by an electric motor. The plan of the plant includes a floating dock which will be constructed within two years.

The addition of this great establishment to the industries of Massachusetts, with its large expenditure for labor, should be of great benefit to our workingmen, and marks a new era in the shipbuilding industry of the Commonwealth.

PART II.

STATISTICS OF MANUFACTURES.

1899, 1900.

INTRODUCTION.

ESTABLISHMENTS AND THEIR MAN-
AGEMENT.

INVESTMENT, MATERIALS USED,
AND PRODUCT.

LABOR AND ITS COMPENSATION.

WORKING TIME AND PROPORTION OF
BUSINESS DONE.

GENERAL SUMMARY OF INDUSTRIAL
CONDITIONS.

PART II.

STATISTICS OF MANUFACTURES. 1899, 1900.

Introduction.

This Part contains the fifteenth report of the Annual Statistics of Manufactures, issued in accordance with the provisions of Chapter 174 of the Acts of 1886.

The statistical presentations have been prepared from the returns made by 4,645 identical establishments covering each of the years 1899 and 1900, and are arranged in five sections.

The first exhibits data relating to the management of 4,645 establishments, and shows the number of establishments controlled by private firms, corporations, and industrial combinations, together with the number of partners and stockholders interested therein, separated as to males, females, estates, banks, trustees, etc. The second covers the amount of capital invested, the value of stock or materials used, and the value of goods made and work done. The third, the number of persons employed (average, smallest, and greatest); the range of employment and unemployment for certain industries, by months; the total amount paid in wages; the average amount earned annually by each employé, without regard to sex or age; and the classified weekly wages for certain industries. The fourth section shows the average number of days in operation, and the average proportion of business done; while the fifth contains a general summary of industrial conditions based upon the returns made by the 4,645 identical establishments.

The term "All Industries" used in these reports for aggregates refers only to the numerical totals of the various columns and *not* to the total investment, production, persons employed, wages paid, etc., of *all* the establishments engaged

in the manufacturing and mechanical industries of the State. Totals of this nature are only presented in the Decennial Census reports once in ten years. Wherever, therefore, All Industries are mentioned in this Part, it is to be understood that the 87 classified industries shown in the table on pages 66 and 67 are referred to; and where numerical aggregates are presented for All Industries or for any single industry, whether for capital invested, goods made, persons employed, wages paid, etc., only such aggregates are intended as are derived from the 4,645 establishments each of which made returns for the years 1899 and 1900, and for which it is possible to make comparisons, unless some other meaning is distinctly stated in the text.

Establishments and Their Management.

Wherever the word "Establishment" is used in this Part, it is to be understood as meaning the factory, mill, or shop from which a report has been secured, and not the firm or corporation controlling said factory, mill, or shop. The following table exhibits the number of returns compared in each year since the first publication of these annual reports :

YEARS.	Number of Establish- ments Considered	YEARS.	Number of Establish- ments Considered
1886, 1887,	1,027	1894,	4,098
1888,	1,140	1895,	3,629
1889,	1,364	1896,	4,609
1890,	3,041	1897,	4,695
1891,	3,745	1898,	4,701
1892,	4,473	1899,	4,740
1893,	4,397	1900,	4,645

The presentations covering the data relating to the establishments and their management are arranged as follows :

1. The total number of establishments considered; the number of establishments controlled by private firms, corporations, and industrial combinations, respectively; and the number of such private firms, corporations, and industrial combinations for each of the years 1899 and 1900.

2. The number of male and female partners, the number of special partners, and the number of estates engaged in carrying on the private firms.

3. The number of males and females, and the number of banks, trustees, etc., interested in the management of the corporations as stockholders.

Attention is called to the head-notes on pages 66 and 68, in which it is stated that certain unavoidable duplications occur in the columns devoted to private firms, corporations, and industrial combinations; and to the head-notes on pages 74 and 76, in which the omission of stockholders for industrial combinations is explained.

PRIVATE FIRMS, CORPORATIONS, ETC.: BY INDUSTRIES.

1900.

[This presentation shows the aggregate number of establishments considered, the number of these establishments which are conducted by private firms; by corporations; and by industrial combinations, together with the actual number of such firms, corporations, and combinations. There are certain duplications in management, caused by the fact that the same firm, corporation, or combination is often engaged in manufacturing in more than one industry. The industries in which they occur have been indicated by an asterisk (*), and the plan adopted in such cases has been to consider each establishment, whether managed in connection with another or not, as a unit, and to credit the entire number of firms, etc. to each industry. The last three columns of the table show the actual number of firms, corporations, and combinations, all duplications having been eliminated except as they occur between the industries, and in making up the total for All Industries these duplications, too, have been omitted; so that the final line in the table shows the exact number of different private firms, corporations, and industrial combinations conducting the specified number of establishments.]

INDUSTRIES.	Number of Establishments Considered	ESTABLISHMENTS CONDUCTED BY—			NUMBER OF —		
		Private Firms	Corporations	Industrial Combinations	Firms	Corporations	Combinations

PARTNERS: BY INDUSTRIES.

1899.

[This presentation shows the number of partners comprising the 3,352 private firms engaged in the management of the 3,368 establishments. As explained in the preceding presentation, duplications in partners occur in the industries indicated by an asterisk (*), since the same firm is sometimes engaged in more than one industry, and the plan, as stated, has been to consider each establishment as a unit and to credit thereto the whole number of partners, but in making up the total for All Industries to omit duplications; so that the final line in the table shows the exact number of partners conducting the specified number of private firms.]

STOCKHOLDERS: BY INDUSTRIES.

1899.

[This presentation shows the number of stockholders in the 1,150 corporations engaged in the management of the 1,188 establishments. As in the preceding presentation, duplications occur in the industries indicated by an asterisk (*), since the same corporation is sometimes engaged in more than one industry, and the plan, as stated, has been to consider each establishment as a unit and to credit thereto the whole number of stockholders, but in making up the total for All Industries to omit duplications. Stockholders in certain establishments which are operated by railroad companies, or by industrial combinations, many of which have extensive investments of capital outside this Commonwealth, are not included in this presentation, since to include all the stockholders of a railroad company, or of an industrial combination, in connection with such merely branch establishments incidental only to the main business of the corporation, would result in abnormally increasing the aggregate.]

ALL INDUSTRIES,	1,199	26,443	15,586	5,173	47,211

† Includes 3 railroad corporations.

Analysis.

By reference to the final lines of the first two presentations, pages 67 and 69, it will be seen that the total number of establishments considered is 4,645. Of this number 3,368 were conducted by private firms, 1,193 by corporations, and 84 by industrial combinations in 1899, and by 3,301 private firms, 1,260 corporations, and 84 industrial combinations in 1900, a loss in the latter year of 67 establishments, or 1.99 per cent, controlled by private firms, and a corresponding gain of 67 establishments, or 5.62 per cent passing into the corporate form of management. The number of establishments controlled by industrial combinations was the same in both years. The changes brought about by the transfer of the individual control of establishments to their management by corporate bodies during the two years may be seen in the following table :

CLASSIFICATION.	NUMBER		INCREASE (+) OR DECREASE (-) IN 1900	
	1899	1900	Number	Percentages
Private firms,	3,368	3,296	-66	-1.97
Corporations,	1,150	1,199	+49	+4.26
Industrial combinations,	22	22	*.	-
TOTALS,	4,524	4,507	-17	-0.38

* No change.

Although there was a decrease in the number of private firms of 66, or 1.97 per cent, there was an increase of only 49 in the number of corporations, a gain of 4.26 per cent, with no change in the number of industrial combinations. The total number of firms, corporations, and combinations shows a net decrease of 17, or 0.38 per cent, in 1900 as compared with 1899, indicating, of course, that 17 concerns were absorbed, in 1900, by firms, corporations, or combinations already in existence. This may be readily noted in the quarried stone industry wherein 36 private firms were in existence in 1899 as against 31 in 1900, five of the private firms having been absorbed by one of the existing corporations, since no corresponding increase in the number of corporations is found in 1900 as against the number in 1899. The average number of establishments managed by a corporation in 1899

was 1.03 and in 1900, 1.05. Each private firm managed, on an average, one establishment in both years, and each industrial combination controlled, on an average, 3.81 establishments in both years. The variations resulting from the changes from private firms to corporations, etc., and *vice versa* are brought out in the following table:

INDUSTRIES.	1899			1900		
	Private Firms	Corporations	Industrial Combinations	Private Firms	Corporations	Industrial Combinations
Bicycles, tricycles, etc.,	6	3	1	5	4	1

Woollen goods (shoddy, waste, etc.), .	19	5	-	18	6	-
Worsted goods,	14	15	1	15	14	1

The preceding table shows the result of the changes which have been brought about in the actual number of existing private firms, corporations, and industrial combinations since 1899. In Bicycles, Tricycles, etc., a change appears from private firm in 1899 to corporation in 1900. In Clothing, while there is a loss of four private firms, there is a gain of only 3 corporations, indicating the absorption by the same corporation of two of the private firms. Other variations may be readily ascertained from the table.

The industries in which certain private firms controlled more than one establishment in 1900 are as follows :

INDUSTRIES.	Establishments	Private Firms
Boxes, barrels, kegs, etc.,	102	101
Boxes (paper),	57	56
Metals and metallic goods,	250	247
Rubber and elastic goods,	20	19
Woollen goods (woven goods and yarn),	58	57

Industries in which some of the corporations controlled more than one establishment in 1900 are found in the following table :

INDUSTRIES.	Establishments	Corporations
Boots and shoes (factory product),	80	77
Boxes, barrels, kegs, etc.,	12	11
Brick, tiles, and sewer pipe,	14	13
Carpetings,	10	8
Clothing,	35	34
Cotton goods (woven),	105	101
Food preparations,	48	47
Furniture,	25	24
Leather goods,	9	8
Liquors (malt),	30	18
Lumber,	6	5
Machines and machinery,	186	181
Metals and metallic goods,	123	121
Paper,	36	33
Stone (quarried),	16	11
Woollen goods (woven goods and yarn),	49	46

Industries in which industrial combinations controlled two or more establishments in 1900 are as follows :

INDUSTRIES.	Establishments	Combinations
Artisans' tools,	2	1
Bicycles, tricycles, etc.,	3	1
Cotton goods (yarn and thread),	8	1
Food preparations,	8	2
Leather,	2	1
Liquors (malt),	4	2
Machines and machinery,	8	3
Paper,	22	2
Paper goods,	8	2
Rubber and elastic goods,	2	1
Woollen goods (woven goods and yarn),	9	4
Worsted goods,	5	1

The head-notes to the presentations on pages 74 and 76 call attention to the fact that the stockholders of certain establishments which are operated by railroad companies, or by industrial combinations, many of which have extensive investments of capital outside this Commonwealth, are not included in the presentations; since to include all the stockholders of a railroad company, or of an industrial combination, in connection with such merely branch establishments incidental only to the main business of the corporation, would have the result of abnormally increasing the aggregate. From the presentations relating to partners and stockholders, we bring forward in the following table the aggregates for All Industries for the years 1899 and 1900, and show the increase or decrease in the later as compared with the earlier year.

PARTNERS AND STOCKHOLDERS.	NUMBER		INCREASE (+) OR DECREASE (-) IN 1900	
	1899	1900	Number	Percentages
<i>Partners.</i>	5,269	5,116	-153	-2.90
Males,	5,012	4,852	-160	-3.19
Females,	146	159	+13	+8.90
Special and estates,	111	105	-6	-5.41
<i>Stockholders.</i>	45,506	47,211	+1,705	+3.75
Males,	25,330	26,443	+1,113	+4.39
Females,	14,940	15,595	+655	+4.38
Banks, trustees, etc.,	5,236	5,173	-63	-1.20
<i>Aggregates.</i>	50,775	52,327	+1,552	+3.06
Males,	30,342	31,295	+953	+3.14
Females,	15,086	15,764	+668	+4.43
Special, banks, etc.,	5,347	5,278	-69	-1.29

Of the partners, the number of males declined from 5,012, in 1899, to 4,852 in 1900, a decrease of 160 persons, or 3.19 per cent. The number of female partners increased 13, or 8.90 per cent, while the number of special partners and estates decreased six, or 5.41 per cent.

The total number of stockholders shows an increase from 45,506 persons in 1899 to 47,211 in 1900, a gain of 1,705 persons, or 3.75 per cent. The number of males increased 4.39 per cent; females, 4.38 per cent; while banks, trustees, etc., decreased 1.20 per cent.

In the aggregate, comparing 1900 with 1899, there is seen an increase of 953 males, or 3.14 per cent; an increase of 668 females, or 4.43 per cent; and a decrease of 69 special, banks, etc., or 1.29 per cent. In 1899, females comprised 29.71 per cent of the aggregate of partners and stockholders, and in 1900, 30.11 per cent.

The number of partners and stockholders in the aggregate and in the average is shown by the following table:

CLASSIFICATION.	NUMBER	
	1899	1900
Private firms,	3,352	3,286
Partners,	5,269	5,116
Average number of partners to a private firm,	1.57	1.56
Corporations,	1,150	1,199
Stockholders,	45,506	47,211
Average number of stockholders to a corporation, . .	39.57	39.88

While the number of private firms and the number of partners declined in 1900 as compared with 1899, there is no material variation in the average number of partners to a private firm, it being 1.57 in 1899, and 1.56 in 1900. The average number of stockholders to a corporation was 39.57 in 1899 and 39.88 in 1900, a slight variation in the latter year.

The returns relative to private firms, corporations, industrial combinations, partners, and stockholders for 1900 are condensed in the following summary: The returns represent 4,645 establishments found under 87 classified industries. These establishments are conducted by 3,286 private firms,

1,199 corporations, and 22 industrial combinations. In other words, 72.91 per cent of the establishments are in the hands of private firms, under the control of 5,116 persons, of whom 94.84 per cent are males, 3.11 per cent are females, and 2.05 per cent special partners and estates. Corporations control 26.60 per cent of the establishments, and in the corporations 47,211 persons are financially interested; of these 56.01 per cent are males, 33.03 per cent females, and 10.96 per cent are banks, trustees, etc. The average number of partners to a private firm is 1.56, and the average number of stockholders to a corporation is 39.38.

Investment, Materials Used, and Product.

On the following pages presentations appear which show, respectively, comparisons of the amount of capital invested, of the value of stock or materials used, and of the value of goods made and work done in 4,645 identical establishments each making returns for the years 1899 and 1900. The relative increase or decrease in 1900 as compared with 1899 is given in amounts and equivalent percentages.

As regards the meaning of the different subjects, we quote from the previous report: The term "capital invested" as used in these reports does not mean merely cash capital or capital stock. It includes all legitimate forms of capital devoted to production. Not only does it include cash, value of land, buildings, machinery, implements, and tools, but also the value of stock on hand in a raw state or in process of manufacture. Obviously, the last named element is variable from year to year. A small amount of stock on hand or in process of manufacture at the time the report is made would have its effect in showing diminished capitalization, and, on the other hand, an investment in materials purchased in a favorable market, the same being on hand at the time of making the return, would increase relatively the amount of capital invested, and yet neither condition would affect the standing of the industry.

The term "stock used" includes all materials used in the establishment, whether entering into the construction of the article, or consumed in the processes necessary to the production of the finished goods. Increase or decrease in value of stock used, considered by itself, does not always indicate gain or loss in the *quantity* consumed or a corresponding increase or decrease in the *quantity* of goods made, it often indicates simply a decline or rise in *values* and may have no appreciable effect on the quantity.

The term "goods made and work done" is sufficiently explicit. It includes the entire value of the output in the 4,645 establishments making return in the years 1899 and 1900.

CAPITAL INVESTED: BY INDUSTRIES.

1899, 1900.

[In this presentation, the figures given under "Amount of Capital Invested" represent the returns made by the same establishments, in each industry, for the years 1899 and 1900, the whole number of establishments considered in "All Industries" being 4,645. Comparison is made, as regards the amount of capital invested, between these two years. The relative increase or decrease in 1900 as compared with 1899 is given with its equivalent percentage.]

INDUSTRIES.	Number of Establishments Considered	AMOUNT OF CAPITAL INVESTED		INCREASE (+) OR DECREASE (-) IN 1900	
		1899	1900	Amounts	Percentages
Agricultural implements,	9	\$1,068,986	\$1,010,121	—\$58,865	—5.51

ALL INDUSTRIES,	4,645	\$736,695,225	\$799,353,677	+\$62,658,452	+8.51

Analysis.

As shown in the table on pages 85 and 86, the amount of capital invested in the 4,645 establishments was \$448,709,260 in 1899, and \$456,685,248 in 1900; an increase in 1900 of \$7,975,988, or 1.78 per cent. The highest percentage of increase (141.81) is found in Shipbuilding, this abnormal gain being due to the recent expansion of this industry, detail regarding which may be found in the article on Battle Ship Construction, page 55, *ante*. The lowest percentage of increase in capital (0.02) is found in Tallow, Candles, Soap, and Grease. Increase is also shown for each of the industries except the following:

Agricultural Implements.	Jewelry.
Boots and Shoes (Factory Product).	Lumber.
Boots and Shoes (Soles, Heels, and Cut Stock).	Oils and Illuminating Fluids.
Carpetings.	Paper.
Cement, Kaolin, Lime, and Plaster.	Railroad Construction and Equipment.
Cooking, Lighting, and Heating Apparatus.	Rubber and Elastic Goods.
Cotton Goods (Waste).	Saddlery and Harness.
Crayons, Pencils, Crucibles, etc.	Silk and Silk Goods.
Dyestuffs.	Sporting and Athletic Goods.
Electroplating.	Trunks and Valises.
Flax, Hemp, and Jute Goods.	Whips, Lashes, and Stocks.
Food Preparations.	Wooden Goods.
Glass.	Woollen Goods (Woven Goods and Yarn).
Glue, Isinglass, and Starch.	Worsted Goods.

From the final line of the presentation on pages 87 and 88 it is seen that the aggregate value of stock or materials used in the 4,645 establishments in 1899 was, \$419,301,108 and in 1900, \$455,224,455, an increase in the latter year of \$35,923,347, or 8.57 per cent. The largest percentage of increase (79.86) is found in Cotton Yarn and Thread, and the smallest (0.62) in Boot and Shoe Findings. The industries which show a decrease in 1900 as against 1899 in the value of stock and materials used are as follows:

Arms and Ammunition.	Boots and Shoes (Stitching, Heeling, etc.).
Bicycles, Tricycles, etc.	Dyestuffs.
Boots and Shoes (Soles, Heels, and Cut Stock).	Earthen, Plaster, and Stone Ware.

Electroplating.	Oils and Illuminating Fluids.
Emery and Sand Paper and Cloth, etc.	Paints, Colors, and Crude Chemi- cals.
Fertilizers.	Rubber and Elastic Goods.
Hair Work (Animal and Human).	Silk and Silk Goods.
Ink, Mucilage, and Paste.	Stone (Cut and Monumental).
Leather.	Trunks and Valises.
Liquors (Malt).	Worsted Goods.
Models, Lasts, and Patterns.	

On pages 89 and 90 is presented a comparison of the value of goods made and work done in the 4,645 establishments making return in each of the years 1899 and 1900. The aggregate value of product for 1899 is \$736,695,225 and for 1900, \$799,353,677, an increase in the latter year of \$62,658,452, or 8.51 per cent. The highest percentage of increase (88.46) is found in Cotton Yarn and Thread, and the lowest (0.04) in Stone (Cut and Monumental). The following 32 industries show percentages of increase in excess of that shown for All Industries (8.51) :

INDUSTRIES.	Percent- ages	INDUSTRIES.	Percent- ages
Carpetings,	8.77	Flax, hemp, and jute goods, . .	17.67
Burial cases, caskets, coffins, etc.,	8.91	Cotton goods (woven),	18.84
Tobacco, snuff, and cigars, . .	9.06	Woollen goods (woven goods and yarn),	18.95
Arms and ammunition,	9.24	Fine arts and taxidermy, . . .	19.22
Clothing,	9.49	Cordage and twine,	20.20
Woollen goods (shoddy, waste, etc.),	9.49	Hosiery and knlt goods, . . .	21.47
Toys and games (children's), . .	9.76	Sporting and athletic goods, . .	21.97
Brick, tiles, and sewer pipe, . .	10.01	Hose: rubber, linen, etc., . . .	24.08
Musical instruments and materials,	10.12	Electrical apparatus and appli- ances,	24.91
Wooden goods,	10.70	Polishes and dressing,	25.91
Paper goods,	11.50	Chemical preparations (compound- ed),	26.52
Tallow, candles, soap, and grease,	11.59	Machines and machinery, . . .	27.17
Brooms, brushes, and mops, . .	11.96	Shipbuilding,	28.61
Boxes, barrels, kegs, etc., . . .	12.03	Clocks and watches,	48.28
Artisans' tools,	14.02	Cotton yarn and thread,	88.46
Cotton goods (waste),	15.86		
Scientific instruments and appli- ances,	16.31		

The following 36 industries exhibit percentages of increase less than that shown for All Industries (8.51) :

INDUSTRIES.	Percent- ages	INDUSTRIES.	Percent- ages
Ivory, bone, shell, and horn goods, etc.,	7.97	Whips, lashes, and stocks, . . .	3.47
Fancy articles, etc.,	7.63	Saddlery and harness,	3.28
Print works, dye works, and bleach- eries,	7.26	Boots and shoes (findings), . . .	3.07
Agricultural implements,	7.25	Boots and shoes (factory product), .	2.92
Fireworks and matches,	7.17	Liquors (distilled),	2.51
Liquors (malt),	6.87	Food preparations,	2.26
Building materials,	6.55	Perfumes, toilet articles, etc., . .	2.08
Metals and metallic goods,	4.98	Ink, muclage, and paste,	2.01
Crayons, pencils, crucibles, etc., .	4.89	Paints, colors, and crude chemicals,	1.69
Carriages and wagons,	4.83	Cooking, lighting, and heating ap- paratus,	1.66
Electroplating,	4.81	Glue, isinglass, and starch, . . .	1.64
Paper,	4.58	Furniture,	1.53
Drugs and medicines,	4.40	Jewelry,	1.53
Stone (quarried),	4.30	Lumber,	1.40
Printing, publishing, and book- binding,	4.13	Boxes (paper),	1.05
Leather goods,	3.71	Awnings, sails, tents, etc., . . .	0.83
Railroad construction and equip- ment,	3.62	Cement, kaolin, lime, and plaster,	0.52
		Liquors (bottled) and carbonated beverages,	0.41
		Stone (cut and monumental), . . .	0.04

The industries showing a decrease in the value of goods made and work done in 1900 as compared with 1899, 19 in number, are as follows :

INDUSTRIES.	Percent- ages	INDUSTRIES.	Percent- ages
Straw and palm leaf goods,	0.04	Leather,	7.39
Emery and sand paper and cloth, etc.,	0.86	Oils and illuminating fluids, . . .	8.13
Trunks and valises,	0.89	Silk and silk goods,	8.67
Photographs and photographic materials,	0.95	Boots and shoes (soles, heels, and cut stock),	9.29
Models, lasts, and patterns,	3.17	Boots and shoes (stitching, heel- ing, etc.),	9.79
Buttons and dress trimmings,	3.59	Hair work (animal and human), . .	15.58
Rubber and elastic goods,	4.09	Fertilizers,	19.28
Worsted goods,	5.98	Bicycles, tricycles, etc.,	25.47
Earthen, plaster, and stone ware, . .	6.26	Dyestuffs,	25.72
Glass,	7.08		

In the following table, we reproduce from the preceding presentations, pages 85 to 90, the percentages of increase or decrease in investment, materials used, and product for the nine

leading industries of the Commonwealth in detail and in the aggregate, for the other industries in the aggregate, and for All Industries :

INDUSTRIES.	PERCENTAGES OF INCREASE (+) OR DECREASE (-) IN 1899 AS COMPARED WITH 1900 IN—		
	Amount of Capital Invested	Value of Stock Used	Value of Goods Made and Work Done
Boots and shoes,	-1.72	+0.17	+1.38
Carpetings,	-1.00	+13.32	+8.77
Cotton goods,	+1.28	+29.84	+26.75
Leather,	+3.90	-7.54	-7.39
Machines and machinery,	+5.30	+25.12	+27.17
Metals and metallic goods,	+0.53	+2.36	+4.93
Paper,	-1.37	+10.48	+4.58
Woollen goods,	-9.46	+18.85	+18.48
Worsted goods,	-11.96	-0.88	-5.98
Nine industries,	-0.53	+10.15	+10.89
Other industries,	+5.98	+6.65	+5.54
All industries,	+1.78	+8.57	+8.51

In the nine leading industries considered in the aggregate, we find that the increase in the value of stock and materials used of 10.15 per cent is accompanied by a corresponding percentage of increase in the selling value of the manufactured product, namely, 10.89. Considering the nine industries in detail, however, we find that Leather shows a decrease of 7.54 per cent in value of stock used and a decrease of 7.39 per cent in value of goods produced in 1900 as against 1899, while Worsted Goods shows a decrease of 0.88 per cent in value of stock used and a still further decrease of 5.98 per cent in value of product. In Paper, the value of stock increased over 10 per cent and the value of goods made increased about five per cent. Cotton Goods, Machines and Machinery, and Woollen Goods show a practical uniformity in the percentages of increase in stock and product, and this is also true of the industries other than the nine and for All Industries in the aggregate.

Labor and its Compensation.

The statistical presentations under this subject head cover the number of persons employed for 1899 and 1900 in the 4,645 establishments under consideration, together with the amount of wages paid and the classified weekly wages. The data are arranged as follows :

1. The average number of persons employed, separated as to sex.

2. The average number of persons employed and the number employed at the periods of employment of smallest and greatest number, respectively, without regard to sex.

3. The range of employment and unemployment in 1899 and 1900 ; that is to say, the difference between the greatest and smallest number of persons employed, with the increase or decrease in "range" in 1900 as compared with 1899 expressed in numbers and percentages.

4. The aggregate number of persons employed (both sexes) month by month and the percentages of employment and unemployment for the nine leading industries and for All Industries, for 1899 and 1900.

5. The total amount paid in wages during each of the years 1899 and 1900 and the average yearly earnings for both years, based upon the average number of persons employed without regard to sex or age and the total amount paid in wages.

6. Classified weekly wages for the nine leading industries and for All Industries for adult males and females, and for young persons irrespective of sex, for each of the years 1899 and 1900.

Attention is called to the head-notes to the several presentations which explain the meaning of the figures shown.

AVERAGE NUMBER OF PERSONS EMPLOYED: BY SEX AND INDUSTRIES.

1899, 1900.

[In this presentation, the average number of males, females, and both sexes for each industry is shown. The total number of establishments is 4,645, and the number of establishments in each industry is as given in all preceding presentations. It should be borne in mind that the persons here enumerated are wage earners only; officers, clerks, or other salaried persons are not included.]

INDUSTRIES.	1899			1900		
	Males	Females	Both Sexes	Males	Females	Both Sexes

RANGE OF EMPLOYMENT AND UNEMPLOYMENT: BY INDUSTRIES.

1899, 1900.

[In this presentation, the excess of greatest over smallest number of persons, as obtained from the tables on pages 98 and 99, is shown and a comparison is made between the two years. The relative increase or decrease in the excess of greatest over smallest number employed in 1900 as compared with 1899 is given with its equivalent percentage. It should be borne in mind that the persons here enumerated are wage earners only; officers, clerks, or other salaried persons are not included.]

INDUSTRIES.	Number of Estab- lishments Con- sidered	EXCESS OF GREATEST OVER SMALLEST NUMBER OF PERSONS EMPLOYED		INCREASE (+) OR DECREASE (-) IN 1900

PERSONS EMPLOYED—BOTH SEXES. AGGREGATES, BY MONTHS.

1899, 1900.

[This presentation shows, for the nine leading industries and for All Industries, the aggregate number of persons employed during each month of the years 1899 and 1900, together with percentages of employment and unemployment based on the month when the greatest number of persons was employed; this greatest number has been considered as 100 per cent and the variations from this percentage month by month indicate the fluctuations in employment. It should be borne in mind that the persons here enumerated are wage earners only; officers, clerks, or other salaried persons are not included. Considerations of space have led to the curtailment of the presentation to the nine leading industries, but the figures in detail for any of the 87 classified industries may be obtained upon application to this department.]

WAGES AND EARNINGS: BY INDUSTRIES.

1899, 1900.

[In this presentation, the figures given under "Total Amount Paid in Wages During the Year" represent the returns made by the same establishment in each industry for the years 1899 and 1900. The average yearly earnings have been obtained by dividing the total amount paid in wages by the number representing the average number of persons employed during the same year (pages 98 and 99). It should be borne in mind that these sums were paid to wage earners only, and do not include the amounts paid to officers, clerks, or other salaried persons.]

CLASSIFIED WEEKLY WAGES: BY SELECTED INDUSTRIES.

1899, 1900.

[In this presentation is shown for the nine leading industries and for All Industries for 1899 and 1900, a classification by sex of the weekly wages, ranging from under \$5 per week to \$20 and over. The returns were made by manufacturers to cover the week during which the largest number of persons was employed. It should be borne in mind that these figures represent wage earners only; officers, clerks, or other salaried persons are not included. Considerations of space have led to the curtailment of this presentation to the nine leading industries, but the figures in detail for 1899 and 1900 for any industry desired may be obtained upon application to this Department.]

Analysis.

From the presentation on pages 96 and 97, we find that the average number of males employed in 1899 was 242,999; the average number of females, 124,119; and the average for both sexes, 367,118. In 1900, the average number of males rose to 254,397, females to 126,544, and both sexes to 380,941, the percentages of increase over the preceding year being as follows: Males, 4.69; females, 1.95; both sexes, 3.77.

The proportion of males employed in All Industries in 1899 was 66.19 per cent and that of females, 33.81 per cent; in 1900, the males constituted 66.78 per cent and females 33.22 per cent. In other words, in 1899, about 66 out of every one hundred persons employed were males and about 34 out of every one hundred persons employed were females, and in 1900, about 67 in each one hundred persons employed were males and about 33 in each one hundred were females. As regards All Industries, practically these same proportions obtained in the Census years 1875, 1885, and 1895, but when the industries are considered individually, variations appear which it may be interesting to note. For this purpose we bring forward in the following table the figures for 1899 and 1900 in connection with those for the Census years 1875, 1885, and 1895:

INDUSTRIES AND SEX.	PERCENTAGES				
	1875	1885	1895	1899	1900
<i>Boots and Shoes.</i>	100.00	100.00	100.00	100.00	100.00

* Includes the manufacture of Leather Goods, which in 1899 and 1900 is presented as a separate industry.

† Includes the manufacture of Paper Goods, which in 1899 and 1900 is presented as a separate industry.

Considering the nine industries in the aggregate, it is seen that in 1875 out of every one hundred persons employed about

64 were males and 36 were females. These proportions are based upon all the establishments reporting under a general Census, and the full number of persons employed in all manufacturing and mechanical industries. On the basis of these annual reports, it will be noted that the variations from these proportions are not material. In two of the nine industries, however, namely, Boots and Shoes and Metals and Metallic Goods, it is shown that the proportion of females employed has increased in 1900 as compared with 1875. In each of the other nine industries, as compared with that year, a decline for females is shown; that is to say, although a numerical increase in the persons employed may appear, the relative proportion of females in every one hundred persons exhibits a decrease.

In the following table, we show the percentages of increase or decrease for the nine leading industries, the other industries, and for All Industries in the average number of males and females, in the average of both sexes, the smallest number, the greatest number, and the excess of greatest over smallest:

INDUSTRIES.	PERCENTAGES OF INCREASE (+) OR DECREASE (—) IN 1900 IN—					
	Average Number of Persons Employed			Smallest	Greatest	Range
	Males	Females	Both Sexes			
Boots and shoes, . . .	+0.25	+1.76	+0.73	+1.03	+2.15	+4.87
Boots and shoes (factory product), . . .	+0.45	+1.42	+0.75	+1.32	+1.97	+3.26
Soles, heels, and cut stock, .	—1.93	+2.29	—0.53	—4.35	+2.36	+17.26
Boot and shoe findings, . .	+9.20	+12.74	+10.94	+8.89	+12.97	+20.75
Stitching, heeling, etc., . .	—22.56	+7.73	—4.79	+14.75	+5.35	—4.13
Carpetings,	+0.31	+4.04	+2.20	—11.59	+2.36	+108.93
Cotton goods,	+3.64	+1.70	+2.71	+0.63	+3.09	+27.68
Cotton goods (woven), . . .	+2.54	+1.85	+2.21	—0.23	+3.03	+40.87
Cotton yarn and thread, . .	+12.06	+0.57	+6.27	+7.01	+3.37	—14.90

Leather,	—3.42	+43.24	—3.07	—9.30	—0.37	+19.51
Machines and machinery, . .	+21.12	+12.00	+20.99	+28.41	+14.52	—14.93
Metals and metallic goods, .	+3.46	+4.10	+3.52	+4.07	+2.14	—2.61
Paper,	+2.43	—4.22	—0.24	—5.30	+0.08	+24.14
Woollen goods,	+3.44	+7.15	+7.97	+9.80	+4.14	—8.90
Woven goods and yarn, . . .	+8.92	+7.07	+8.23	+10.25	+4.06	—10.54
Shoddy, waste, etc., . . .	—0.67	+15.25	+0.76	—4.28	+5.92	+19.27
Worsted goods,	—2.89	—3.00	—2.94	—36.87	+2.93	+155.02
Nine industries,	+5.16	+1.67	+3.95	+1.14	+3.90	+13.43
Other industries,	+3.83	+2.53	+3.42	+3.21	+2.38	+0.61
All industries,	+4.69	+1.95	+3.77	+1.83	+3.35	+7.78

So far as the leading industries are concerned, the highest percentage of increase in the average number of males employed (21.12) is found in Machines and Machinery, and the highest percentage of increase in the average number of females employed appears in Leather, the percentage being 43.24. In Boots and Shoes (in the aggregate), males increased 0.25 per cent and females 1.76 per cent. Considering this industry in detail, we find that only Boots and Shoes (Factory Product) and Boot and Shoe Findings show increases in the average number of males employed, while in each of the subdivisions of this industry the average number of females employed exhibits increase. Considering the aggregate for the nine industries, we find that the average number of males increased 5.16 per cent, the average number of females increased 1.67 per cent, and the average number of persons of both sexes increased 3.95 per cent. There was an increase of 1.14 per cent in the aggregate of smallest number of persons employed at any one time, and an increase of 3.90 per cent in the aggregate of greatest number of persons employed at any one time, the "range" or excess of greatest over smallest number of persons employed being 13.43 per cent more in 1900 than in 1899. From this last percentage, therefore, it is apparent that, although in the majority of the industries a larger average number of persons was employed, nevertheless, in 1900, employment was not so continuous as in 1899. Referring to page 101, it is seen that the excess of greatest over smallest number for All Industries was 108,647 in 1899 and 117,045 in 1900; that is to say, 8,398 more persons were unemployed in the latter than in the former year; the duration of this unemployment it is, of course, impossible to ascertain.

For the purpose of indicating this range of employment and unemployment in a more graphic manner, the following table is presented :

COMPARATIVE YEARS.	Number of Establishments Considered	PERCENTAGES		
		Persons Employed at Periods of Employment of Smallest Number of Persons Employed at Periods of Greatest Number	Range (Unemployed at some time During the Year)	Persons Employed at Periods of Employment of Greatest Number
1886,	1,027	77.33	22.67	100.00
1887,	1,027	78.57	21.43	100.00
1887,	1,140	78.72	21.28	100.00
1888,	1,140	77.18	22.82	100.00
1888,	1,364	76.64	23.36	100.00
1889,	1,364	79.52	20.48	100.00
1889,	3,041	76.67	23.33	100.00
1890,	3,041	78.05	21.95	100.00
1890,	3,745	77.91	22.09	100.00
1891,	3,745	78.50	21.50	100.00
1891,	4,473	77.52	22.48	100.00
1892,	4,473	76.90	23.10	100.00
1892,	4,897	77.66	22.34	100.00
1893,	4,897	64.38	35.62	100.00
1893,	4,093	65.17	34.83	100.00
1894,	4,093	66.55	33.45	100.00
1894,	3,629	67.11	32.89	100.00
1895,	3,629	74.40	25.60	100.00
1895,	4,609	73.53	26.47	100.00
1896,	4,609	66.52	33.48	100.00
1896,	4,695	67.32	32.68	100.00
1897,	4,695	71.74	28.26	100.00
1897,	4,701	72.13	27.87	100.00
1898,	4,701	70.36	29.64	100.00
1898,	4,740	70.21	29.79	100.00
1899,	4,740	74.19	25.81	100.00
1899,	4,645	74.17	25.83	100.00
1900,	4,645	73.08	26.92	100.00

There are 14 groups in this table, each exhibiting a comparison between identical establishments making return in the years specified. The greatest number of persons employed is considered as 100 per cent. If this greatest number was continuously employed it is apparent that no smaller percentage would appear and there would be no distinction between the "greatest" and the "smallest;" but as at the periods of employment of the smallest number less persons are em-

ployed, it follows that the difference between the number employed at the two periods may be represented by a percentage indicating the proportion of persons unemployed at some time during the year. Taking the last group in the table, the percentages show that in 1899, about 26 persons in every 100 (25.83 per cent) of the maximum number employed were out of work at some time during the year, the length of the term of unemployment, of course, not being determined. In 1900, the corresponding percentage indicates that about 27 persons in every 100 (26.92 per cent) of the maximum number were out of work. The range of unemployment, therefore, was greater in 1900 than in 1899, or, in other words, the opportunities for continuous employment were slightly less in 1900, although the fact remains that, on an average, nearly 4 per cent more persons were employed in that year than in 1899.

The statistics concerning employment and unemployment which have just been considered are based upon the returns made by each establishment. Upon pages 102 to 106, employment on the basis of industries is shown. This presentation shows the aggregate number of persons employed during each month for the nine leading industries and for All Industries. We reproduce, in the following table, the figures for All Industries :

MONTHS.	NUMBER OF PERSONS EMPLOYED		PERCENTAGES OF EMPLOYMENT		PERCENTAGES OF UNEMPLOYMENT	
	1899	1900	1899	1900	1899	1900
January,	348,549	385,529	91.64	98.70	8.36	1.30
February,	353,504	389,508	92.95	99.72	7.05	0.28
March,	361,564	390,620	95.07	100.00	4.93	-
April,	365,688	384,907	96.15	98.54	3.85	1.46
May,	366,643	384,152	96.40	98.34	3.60	1.66
June,	365,057	377,087	95.98	96.54	4.02	3.46
July,	362,795	364,393	95.39	98.29	4.61	6.71
August,	366,288	369,646	96.31	94.63	3.69	5.37
September,	374,169	375,703	98.38	96.18	1.62	3.82
October,	376,602	380,108	99.02	97.31	0.98	2.69
November,	380,331	382,154	100.00	97.63	-	2.17
December,	379,824	384,224	99.87	96.36	0.13	1.64

The largest number of persons employed in any one month is considered as 100 per cent. In 1899, this percentage is found in November and in 1900, in March. That is to say, on the

basis of industries, the largest number of persons employed is found in these months, respectively. The month, therefore, which exhibits the largest percentage of unemployment would be that in which the smallest number of persons was employed. This is found in January, 1899, and in July, 1900, and it will be noted that from June to December in the latter year the percentages of unemployment are considerably larger than those shown for the earlier months of 1900, but in December a partial recovery is noted. In Boots and Shoes (Aggregates), in 1899, the largest number of persons was employed in the month of September. In the month of January, in that year, 9.75 per cent of this maximum number were out of employment, this being the highest percentage of unemployment reached in that year. On the other hand, in 1900 prior to June, the highest percentage of unemployment is but 7.19, found in the month of May. But in June, 10.53 per cent of the maximum number employed in 1900 are found out of employment, 12.02 per cent in the month of July, and, during the remaining months of the year, until December, the percentages of unemployment are found to be higher than in the corresponding months of 1899. Considering the subdivisions of this industry, the greatest percentages of unemployment are found in Soles, Heels, and Cut Stock; and Stitching, Heeling, etc.

In Cotton Goods (Aggregates) employment was more nearly uniform. Seasonal disturbances in this industry are much less marked than in Boots and Shoes. During 1899, the percentage of unemployment did not rise above 3.75, this percentage being shown for the month of January, but in 1900 it reached 4.10 in the month of August, falling again to 3.81 in September and in no other month in 1900 did unemployment in this industry reach three per cent. The industry showing the greatest amount of unemployment in 1900, however, is Worsteds Goods. Here the conditions were at once abnormal and indicative of unusual industrial depression, the highest percentage of unemployment being reached in July, when 40.02 per cent of the maximum number of persons employed were out of work, and this condition continued with varying intensity during the remainder of the year.

It may be interesting to compare the percentages of unemployment for the other leading industries. Considerations of space, however, have led to the curtailment of the presentation to the nine industries as given on pages 102 to 106, but the figures in detail for 1899 and 1900 for any industry desired may be obtained upon application to this Department.

The presentation on pages 107 and 108 shows the aggregate amount of wages paid during each of the years 1899 and 1900, and the average yearly earnings in each industry. In the following table, we reproduce the wages paid in the nine leading industries with the increase or decrease in 1900 as compared with 1899 in amounts and percentages :

INDUSTRIES.	TOTAL AMOUNT PAID IN WAGES DURING THE YEAR		INCREASE (+) OR DECREASE (—) IN 1900	
	1899	1900	Amounts	Percent- ages
Boots and shoes,	\$27,648,530	\$27,476,207	—\$172,323	—0.62
Carpetings,	1,650,257	1,722,180	+71,923	+4.36
Cotton goods,	29,927,858	33,453,372	+3,525,514	+11.78
Leather,	2,326,116	2,327,200	+1,084	+0.06
Machines and machinery,	13,364,375	16,416,828	+3,052,453	+22.84
Metals and metallic goods,	7,402,352	7,755,689	+353,337	+4.77
Paper,	3,811,939	3,778,900	—33,039	—0.87
Woollen goods,	6,968,819	8,004,814	+1,035,995	+14.87
Worsted goods,	5,480,110	5,459,841	—20,269	—0.37
Nine industries,	98,580,356	106,395,081	+7,814,675	+7.93
Other industries,	58,399,485	61,054,242	+2,654,757	+4.55
All industries,	156,979,841	167,449,273	+10,469,432	+6.67

Considering the line for All Industries, we find that in 1899 there was paid to the employes in the 4,645 establishments the sum of \$156,979,841, and in 1900, \$167,449,273, an increase in the latter year of \$10,469,432, or 6.67 per cent. The increase for the nine leading industries in the aggregate was 7.93 per cent, and for industries other than the nine, 4.55 per cent. Each of the industries, Boots and Shoes, Paper, and Worsted Goods, shows a slight decrease, while gains are shown for the other principal industries, ranging from 0.05 per cent in Leather to 22.84 per cent in Machines and Machinery.

On pages 107 and 108, average yearly earnings for 1899 and 1900 are presented. These averages are obtained by dividing

the total amount paid in wages by the figure representing the average number of persons employed, without regard to sex or age. On this basis, we find that in the 4,645 establishments the average amount earned by each man, woman, and young person in 1899 was \$427.60, and in 1900, \$439.57, a gain in 1900 over 1899 of \$11.97, or 2.80 per cent. In the table which follows, increases and decreases in 1900 as compared with 1899 are shown in amounts and percentages for the leading industries in detail and in the aggregate :

INDUSTRIES.	AVERAGE YEARLY EARNINGS		INCREASE (+) OR DECREASE (—) IN 1900	
	1899	1900	Amounts	Percent- ages
Boots and shoes,	\$469.73	\$468.44	—\$6.29	—1.34
Boots and shoes (factory product),	480.21	478.85	—6.36	—1.32
Soles, heels, and cut stock,	366.39	358.13	—8.26	—2.25
Boot and shoe findings,	360.08	388.56	+28.53	+6.54
Stitching, heeling, etc.,	407.76	378.08	—29.68	—7.28
Carpetings,	365.91	373.66	+7.75	+2.12
Cotton goods,	381.85	361.17	—29.32	—8.84
Cotton goods (woven),	332.71	363.36	+30.65	+9.21
Cotton yarn and thread,	323.83	345.10	+21.27	+6.57
Cotton waste,	375.74	377.28	+1.54	+0.41
Leather,	467.09	482.12	+15.03	+3.22
Machines and machinery,	545.84	554.19	+8.35	+1.53
Metals and metallic goods,	505.66	511.76	+6.10	+1.21
Paper,	427.01	424.31	—2.70	—0.63
Woollen goods,	377.86	402.01	+24.15	+6.39
Woven goods and yarn,	375.38	400.10	+24.72	+6.59
Shoddy, waste, etc.,	445.35	457.94	+12.59	+2.83
Worsted goods,	365.98	375.66	+9.68	+2.64
Nine industries,	410.75	426.47	+15.72	+3.83
Other industries,	459.42	464.42	+5.00	+1.09
All industries,	427.60	439.57	+11.97	+2.80

Boots and Shoes, in the aggregate, exhibits a decrease in average yearly earnings of slightly over \$6 per individual, or 1.34 per cent; one of the subdivisions of this industry, Boot and Shoe Findings, shows an increase of 6.54 per cent or nearly \$24 per annum, on an average, for each person employed. Each of the subdivisions of Cotton Goods and Woollen Goods shows an increase, the largest being in Cotton Goods (Woven). The nine leading industries in the aggregate exhibit a larger percentage of increase than that shown for All Industries, the percentage being 3.83.

Average yearly earnings, however, should not be considered as indicative of the *rate* of wages. They merely show that, on an average, each person employed received more or less in one year than in another but have little statistical value when considered alone, for males and females, young persons and adults, day hands and piece hands, are indiscriminately included in the figure which represents the average number of persons employed and which, as has been stated, is used as the divisor in obtaining the averages. The duration of employment and the question of skill also form important elements in determining these average earnings and to them are undoubtedly due many of the fluctuations which may be observed in the different industries.

The highest average yearly earnings in 1900 are found in Liquors (Malt), the amount earned by each employé, on an average, being \$818.65. In this industry, all of the employés are males, and according to the Census of 1895, 99.88 per cent were either day or hour hands, and 0.12 per cent were piece hands. The lowest average yearly earnings are found in Flax, Hemp, and Jute Goods, the average amount earned per employé being \$323.59; but in this industry, contrary to the one just cited, 54.66 per cent of all the persons employed were piece hands.

In connection with this subject, it may be interesting to note the average yearly earnings in certain industries for the year 1899 as shown in this Annual Report and in the reports for the States of Connecticut, New Jersey, and Pennsylvania for the same year. The averages for the other three States were obtained in a manner similar to that outlined for Massachusetts and combinations of detail have been made in order that the industry classifications might be as nearly as possible identical with those of this Commonwealth. The figures are brought together in the following table:

INDUSTRIES.	AVERAGE YEARLY EARNINGS—1899			
	Massachusetts	Connecticut	New Jersey	Pennsylvania
Agricultural implements,	\$485.63	—	\$428.90	\$490.71
Artisans' tools,	532.44	—	540.17	452.30
Awings, sails, tents, etc.,	499.08	—	516.44	441.49
Boots and shoes,	469.78	\$385.98	372.18	375.88

In the absence of returns for each individual in the State, actual wage conditions may be quite accurately ascertained by a comparison of the fluctuations in amounts paid weekly to adult male and female employes and to young persons without regard to sex. On pages 109 to 113 are presented, for the nine leading industries, the number of adult males and females and young persons receiving specified weekly wages. From considerations of space we have confined the presentation to certain industries, but the figures in detail for any industry may be obtained upon application to this Department.

The following table shows the percentages of adult males and females and of young persons in each wage class for All Industries:

In this table, the percentages in each column add to 100, and it will be noted that about one-half of the young persons employed in both years received under \$5 per week and that nearly nine-tenths of all the young persons are in the first three classes. For the purpose of analysis we have distributed, in the following table, the average number of persons employed in 1900, 380,941, into the several wage classes, based upon the percentages shown in the table on page 124, together with the estimated amount paid to adult males, adult females, and to young persons for one week of the year 1900:

CLASSIFICATION OF WEEKLY WAGES.	NUMBER OF—			ESTIMATED WEEKLY WAGES OF—		
	Males	Females	Young Persons	Males	Females	Young Persons
Under \$5,	8,508	16,583	24,093	\$25,509	\$49,749	\$72,279
\$5 but under \$6,	8,698	15,802	11,847	47,812	86,911	65,159
\$6 but under \$7,	16,331	20,102	7,680	106,152	130,663	49,920
\$7 but under \$8,	22,563	15,241	3,566	169,223	114,308	26,745
\$8 but under \$9,	22,990	12,356	1,415	185,415	105,026	12,028
\$9 but under \$10,	32,684	9,437	811	310,498	89,652	7,705
\$10 but under \$12,	36,475	6,632	435	401,225	72,952	4,785
\$12 but under \$15,	40,808	2,936	140	550,908	39,636	1,890
\$15 but under \$20,	31,817	880	26	556,798	15,400	455
\$20 and over,	9,952	141	2	223,920	3,173	45
TOTALS,	230,816	100,110	50,015	\$2,587,460	\$707,470	\$241,011

Bearing in mind that the above figures are estimates only and are based upon the actual percentages shown in the table on page 124, we see that out of a total of \$3,535,941 paid in wages during the week considered, \$2,587,460, or 73.17 per cent, was paid to adult males; \$707,470, or 20.01 per cent, to adult females; and \$241,011, or 6.82 per cent, to the young persons of both sexes. If, in the same manner, we take the total amount paid out in wages during 1900, as shown on page 108, and distribute it in the same proportion among males, females, and young persons and divide the amounts thus obtained by the average number of persons employed, we secure the average yearly earnings for certain industries as follows:

Estimated Average Yearly Earnings.

INDUSTRIES.	Males	Females	Young Persons
Boots and shoes,*	\$546.21	\$367.68	\$230.54
Boots and shoes (factory product),	552.35	379.32	234.98
Carpetings,	495.53	349.29	203.46
Cotton goods (woven),	437.10	334.50	232.12
Cotton yarn and thread,	470.34	322.44	224.72
Leather,	493.14	340.13	258.19
Machines and machinery,	574.74	308.50	211.83
Metals and metallic goods,	564.39	287.78	230.41
Paper,	525.64	284.24	260.15
Woollen goods (woven goods and yarn), . .	463.31	355.02	233.06
Woollen goods (shoddy, waste, etc.), . . .	483.48	290.25	219.86
Worsted goods,	479.04	338.06	238.54
ALL INDUSTRIES,	\$530.82	\$334.70	\$228.33

* Including Factory Product; Soles, Heels, and Cut Stock; Boot and Shoe Findings; and Stitching, Heeling, etc.

Comparing these average yearly earnings for adult males and females with those shown on pages 107 and 108 for all persons employed irrespective of sex or age, we find some marked variations. For example, in Boots and Shoes (in the aggregate) we find that the annual amount earned by each person, on an average (page 107) was \$463.44. From the distribution of the persons employed into their respective classes, by sex, we find that 72.79 per cent of all the employes are males, 21.95 per cent are females, and 5.26 per cent young persons of both sexes. Distributing the total wages paid among these three classes in accordance with the proportions shown above and dividing by the estimated number of adult males, females, and young persons, we secure average yearly earnings as follows: \$546.21 for adult males, \$367.68 for adult females, and \$230.54 for young persons without regard to sex. These averages are, undoubtedly, more nearly correct than those shown on pages 107 and 108 which, as has been stated, are averages obtained for all persons indiscriminately. In Boots and Shoes (Factory Product) 73.21 per cent of the persons employed are adult males, 21.93 per cent adult females, and 4.86 per cent minors; the average annual earnings in this industry on page 107 appear as \$473.85, but under the process outlined above the average

obtained, as shown in the analysis table on page 126, is for adult males, \$552.35; adult females, \$379.32; and for young persons, \$234.98. In the leather industry, the proportions are as follows: Adult males, 97.20 per cent; adult females, 0.57 per cent, and young persons, 2.23 per cent. The average yearly earnings for all persons in this industry are \$482.12 while the earnings by sex and age are, adult males, \$493.14; adult females, \$340.13; and young persons, \$258.19.

Considering All Industries, we find by reference to page 108 that the average yearly earnings for all persons employed without regard to sex or age was, in 1900, \$439.57, while in the table of estimated yearly earnings the amount for males appears as \$530.82, females, \$334.70, and young persons, \$228.33. Comparing these figures with those obtained under the same method in 1899, and taken from the report of that year, we secure the following comparison:

	1899	1900
Males,	\$523.34	\$530.82
Females,	324.72	334.70
Young persons,	219.34	228.33

Working Time and Proportion of Business Done.

On the following pages, we show the average number of days in operation and the average proportion of business done for the 4,645 establishments making return in each of the years 1899 and 1900.

The average number of days in operation is based upon the average number of persons employed, the number of days reported by each establishment being multiplied by the figures representing the average number of persons employed therein, and the sum of these multiplications for all the establishments divided by the aggregate average number of persons, an average for each industry and for All Industries being thus obtained. The actual number of working days exclusive of Sundays and holidays was 305 in 1899 and 306 in 1900.

The proportion of business done is based upon the greatest amount of goods which can be turned out in an establishment, presupposing a sufficient demand for goods, without increasing its present facilities. This greatest amount is considered as 100 per cent. If an establishment produced goods equivalent to three-quarters of its greatest capacity, the proportion of business done would be 75 per cent, while if only one-half of a possible output was reached it would be considered as 50 per cent. For example, in All Industries the average proportion of business done for the year 1900 is represented by 66.65 per cent; that is to say, it amounted to about two-thirds of what could have been done, had business conditions warranted, without enlarging the capacity of the manufacturing plants.

The several proportions returned by the establishments in each industry have been aggregated and the sum divided by the full number of establishments to obtain the average for each industry and for All Industries.

DAYS IN OPERATION AND PROPORTION OF BUSINESS DONE: BY INDUSTRIES.

1899, 1900.

[The figures given in the first two columns of this presentation represent the Average Number of Days in Operation, while in the last two columns the Average Proportion of Business Done is shown. The average number of days in operation is based upon the average number of persons employed, the number of days per establishment being multiplied by the figures representing the average number of persons, and the sum divided by the aggregate average number of persons, an average for each industry and for All Industries being thus obtained. As regards Average Proportion of Business Done, greatest capacity, or maximum production, has been considered as 100 per cent, and the percentages given indicate the average proportion of business done during each year on the basis stated.]

ALL INDUSTRIES,	4,645	294.15	290.43	66.82	66.65

Analysis.

The average number of days in operation for each of the 4,645 establishments in All Industries was 294.15 in 1899 and 290.43 in 1900, a decrease in the latter year of 3.72 days, or 1.26 per cent. The following table reproduces the figures for the nine leading industries :

INDUSTRIES.	Number of Estab- lishments Con- sidered	AVERAGE NUMBER OF DAYS IN OPERATION		INCREASE (+) OR DECREASE (—) IN 1900	
		1899	1900	Days	Percent- ages
Boots and shoes,	673	291.24	284.55	—6.69	—2.30
Boots and shoes (factory product), . .	445	291.08	288.87	—7.21	—2.48

Shoddy, waste, etc.,	24	270.44	276.34	+5.90	+2.18
Worsted goods,	34	297.52	274.81	—22.71	—7.60
Nine industries,	1,918	295.67	291.34	—4.33	—1.46
Other industries,	2,727	291.29	288.71	—2.58	—0.89
All industries,	4,645	294.15	290.43	—3.72	—1.26

With the exceptions of Boot and Shoe Findings, Carpetings, Cotton Waste, Woollen Goods (Aggregate), Woollen Goods (Woven Goods and Yarn), and Woollen Goods (Shoddy, Waste, etc.), each of the nine leading industries shows a decrease in the average number of days in operation, ranging from 0.23 days in Cotton Yarn and Thread to 23.21 days in Worsted Goods. On the basis of the figures for 1900, all the establishments, on an average, were in operation 24.20 days in each month, and in the following industries the running time exceeded, on an average, 24.20 days per month :

Agricultural Implements.	Ink, Mucilage, and Paste.
Arms and Ammunition.	Leather.
Artisans' Tools.	Leather Goods.
Bicycles, Tricycles, etc.	Liquors (Bottled) and Carbonated Beverages.
Boots and Shoes (Findings).	Liquors (Malt).
Boots and Shoes (Stitching, Heeling, etc.).	Machines and Machinery.
Brooms, Brushes, and Mops.	Oils and Illuminating Fluids.
Building Materials.	Paper Goods.
Burial Cases, Caskets, Coffins, etc.	Perfumes, Toilet Articles, etc.
Carpetings.	Photographs and Photographic Materials.
Chemical Preparations (Compound- ed).	Polishes and Dressing.
Cordage and Twine.	Printing, Publishing, and Bookbinding.
Cotton Goods (Woven).	Print Works, Dye Works, and Bleacheries.
Cotton Goods (Yarn and Thread).	Railroad Construction and Equipment.
Cotton Goods (Waste).	Scientific Instruments and Appliances.
Drugs and Medicines.	Shipbuilding.
Electrical Apparatus and Appliances.	Sporting and Athletic Goods.
Emery and Sand Paper and Cloth, etc.	Tallow, Candles, Soap, and Grease.
Fancy Articles, etc.	Whips, Lashes, and Stocks.
Fine Arts and Taxidermy.	Wooden Goods.
Flax, Hemp, and Jute Goods.	Woollen Goods (Woven Goods and Yarn).
Food Preparations.	
Furniture.	
Hose: Rubber, Linen, etc.	
Hosiery and Knit Goods.	

The following industries exhibit an increase in the average number of days in operation in 1900 as compared with 1899:

Agricultural Implements.	Cotton Goods (Waste).
Boots and Shoes (Findings).	Electrical Apparatus and Appliances.
Brick, Tiles, and Sewer Pipe.	Emery and Sand Paper and Cloth, etc.
Brooms, Brushes, and Mops.	Fine Arts and Taxidermy.
Building Materials.	Fireworks and Matches.
Burial Cases, Caskets, Coffins, etc.	Hose: Rubber, Linen, etc.
Carpetings.	Hosiery and Knit Goods.
Chemical Preparations (Compound- ed).	Ivory, Bone, Shell, and Horn Goods, etc.
Clocks and Watches.	Liquors (Malt).
Cooking, Lighting, and Heating Apparatus.	Lumber.
Cordage and Twine.	

Paper Goods.	Stone (Cut and Monumental).
Photographs and Photographic Materials.	Tallow, Candles, Soap, and Grease.
Scientific Instruments and Appliances.	Trunks and Valises.
Shipbuilding.	Woollen Goods (Woven Goods and Yarn).
Sporting and Athletic Goods.	Woollen Goods (Shoddy, Waste, etc.).
Stone (Quarried).	

In the following industries, the establishments were in operation, on an average, less than nine months, or 229.50 days, in 1900: Brick, Tiles, and Sewer Pipe; Glue, Isinglass, and Starch; and Hair Work (Animal and Human).

The average proportion of business done for All Industries in 1899 was 66.82 per cent of total capacity (100 per cent), and in 1900 the proportion was 66.65 per cent, a slight decrease of 0.25 per cent being shown in the latter year. In no one industry was production carried on to full capacity, the nearest approach to it being found in Cotton Goods (Woven) wherein the establishments, on the average, ran 92.99 per cent of total capacity in 1900. Two industries, namely, Crayons, Pencils, Crucibles, etc., and Paper Goods, exhibit no change in average proportion of business done. In two industries, namely, Liquors (Distilled) and Perfumes, Toilet Articles, etc., proportion did not reach 50 per cent in 1900; and in one industry, Polishes and Dressing, the average proportion of business done was one-half of the full capacity of the several plants.

Production equalled, on an average, three-quarters of greatest capacity (75 per cent or over) in the following industries in 1900:

Arms and Ammunition.	Ivory, Bone, Shell, and Horn Goods, etc.
Boots and Shoes (Findings).	Paper.
Carpetings.	Railroad Construction and Equipment.
Cotton Goods (Woven).	Silk and Silk Goods.
Cotton Goods (Yarn and Thread).	Whips, Lashes, and Stocks.
Cotton Goods (Waste).	Woollen Goods (Woven Goods and Yarn).
Crayons, Pencils, Crucibles, etc.	Worsted Goods.
Emery and Sand Paper and Cloth, etc.	
Flax, Hemp, and Jute Goods.	

The following industries exhibit an increase in average proportion of business done in 1900 as compared with 1899 :

Arms and Ammunition.	Hosiery and Knit Goods.
Artisans' Tools.	Ivory, Bone, Shell, and Horn Goods, etc.
Awnings, Sails, Tents, etc.	Leather Goods.
Boots and Shoes (Findings).	Liquors (Bottled) and Carbonated Beverages.
Boxes, Barrels, Kegs, etc.	Liquors (Malt).
Brick, Tiles, and Sewer Pipe.	Lumber.
Burial Cases, Caskets, Coffins, etc.	Machines and Machinery.
Carpetings.	Musical Instruments and Materials.
Carriages and Wagons.	Paints, Colors, and Crude Chemi- cals.
Clocks and Watches.	Perfumes, Toilet Articles, etc.
Clothing.	Railroad Construction and Equip- ment.
Cooking, Lighting, and Heating Ap- paratus.	Scientific Instruments and Appli- ances.
Cordage and Twine.	Shipbuilding.
Cotton Goods (Yarn and Thread).	Sporting and Athletic Goods.
Cotton Goods (Waste).	Stone (Quarried).
Earthen, Plaster, and Stone Ware.	Stone (Cut and Monumental).
Electrical Apparatus and Appli- ances.	Straw and Palm Leaf Goods.
Electroplating.	Tallow, Candles, Soap, and Grease.
Emery and Sand Paper and Cloth, etc.	Tobacco, Snuff, and Cigars.
Fancy Articles, etc.	Toys and Games (Children's).
Fertilizers.	Woollen Goods (Woven Goods and Yarn).
Fireworks and Matches.	
Food Preparations.	
Furniture.	
Hose: Rubber, Linen, etc.	

In the following table, we bring forward from the presentation on pages 129 and 130 the figures for the nine leading industries with the increase or decrease in 1900 as compared with 1899 :

INDUSTRIES.	Number of Estab- lishments Con- sidered	AVERAGE PROPOR- TION OF BUSINESS DONE		INCREASE (+) OR DECREASE (-) IN 1900	
		1899	1900	Proportion	Percent- ages
Boots and shoes,	678	66.89	64.04	-2.85	-4.26
Boots and shoes (factory product), . .	445	66.63	64.12	-2.51	-3.77
Soles, heels, and cut stock,	191	66.59	62.88	-3.71	-5.57
Boot and shoe findings,	24	74.17	75.75	+1.58	+2.13
Stitching, heeling, etc.,	18	66.46	66.92	-0.54	-14.35

INDUSTRIES.	Number of Estab- lishments Con- sidered	AVERAGE PROPOR- TION OF BUSINESS DONE		INCREASE (+) OR DECREASE (—) IN 1900	
		1899	1900	Proportion	Percent- ages
Carpetings,	12	75.18	76.91	+1.73	+2.30
Cotton goods,	162	90.78	91.37	+0.59	+0.65
Cotton goods (woven),	115	93.58	92.99	—0.59	—0.63
Cotton yarn and thread,	39	81.53	85.88	+4.35	+5.34
Cotton waste,	8	87.50	90.00	+2.50	+2.86
Leather,	90	70.14	68.09	—7.05	—10.05
Machines and machinery,	358	66.49	69.24	+2.75	+4.14
Metals and metallic goods,	374	68.76	67.83	—0.93	—1.35
Paper,	75	83.87	80.77	—3.10	—3.70
Woollen goods,	140	77.16	80.75	+3.59	+4.65
Woven goods and yarn,	116	78.52	83.03	+4.51	+5.74
Shoddy, waste, etc.,	24	70.63	69.79	—0.84	—1.19
Worsted goods,	34	82.00	77.80	—4.50	—5.49
Nine industries,	1,918	70.99	70.10	—0.89	—1.25
Other industries,	2,727	63.90	64.23	+0.33	+0.52
All industries,	4,645	66.82	66.65	—0.17	—0.25

Of the nine leading industries, Cotton Goods is the only one which, in 1900, approached full capacity, the average proportion of business done being 91.37 per cent. The three subdivisions of this industry exhibit proportions ranging between 85.88 per cent and 92.99 per cent. Paper follows, the average proportion being 80.77, and is in turn followed by Woollen Goods, in which the average is 80.75. The subdivisions of this industry show marked variation, however, Woven Goods and Yarn exceeding the average proportion shown for the total by 2.28 per cent, and Shoddy, Waste, etc., exhibiting an average proportion less than the total by 10.96 per cent. The lowest average proportion of business done in 1900 is found in Boots and Shoes (Stitching, Heeling, etc.), the percentage being 56.92. In no other instance does production fall below six-tenths of the possible output in so far as concerns the nine leading industries.

General Summary of Industrial Conditions.

In the following table, we bring together the leading facts concerning All Industries, drawn from the several presentations for 1899 and 1900 and from the analysis :

CLASSIFICATION.	1899	1900	INCREASE (+) OR DECREASE (—) IN 1900	
			Amounts	Percent- ages
Number of establishments considered,	4,645	4,645	-	-
Number of private firms,	3,352	3,286	-66	-1.97
Number of corporations,	1,150	1,199	+49	+4.26
Number of industrial combinations,	22	22	-	-
Number of partners,	5,269	5,116	-153	-2.90
Males,	5,012	4,862	-160	-3.19
Females,	146	159	+13	+8.90
Special and estates,	111	105	-6	-5.41
Number of stockholders,	45,806	47,211	+1,705	+3.75
Males,	25,830	26,443	+1,113	+4.39
Females,	14,940	15,595	+655	+4.38
Banks, trustees, etc.,	5,236	5,173	-63	-1.20
Average partners to a private firm,	1.57	1.56	-0.01	-0.64
Average stockholders to a corporation,	39.57	39.38	-0.19	-0.48
Amount of capital invested,	\$448,709,260	\$456,685,248	+\$7,975,988	+1.78
Value of stock used,	\$419,301,108	\$455,224,455	+\$35,923,347	+8.57
Value of goods made and work done,	\$736,695,225	\$799,353,677	+\$62,658,452	+8.51
Persons employed :				
Average number,	367,118	380,941	+13,823	+3.77
Males,	242,999	254,397	+11,398	+4.69
Females,	124,119	126,544	+2,425	+1.95
Smallest number,	312,054	317,757	+5,703	+1.83
Greatest number,	420,701	434,802	+14,101	+3.35
Excess of greatest over smallest,	108,647	117,045	+8,398	+7.73
Total amount paid in wages,	\$156,979,841	\$167,449,273	+\$10,469,432	+6.67
Average yearly earnings (without regard to sex or age),	\$427.60	\$439.57	+\$11.97	+2.80
Males,*	\$523.34	\$530.32	+\$7.48	+1.43
Females,*	\$324.72	\$334.70	+\$9.98	+3.07
Young persons,*	\$219.34	\$228.38	+\$9.99	+4.09
Average proportion of business done,	66.82	66.65	-0.17	-0.25
Average number of days in operation,	294.15	290.43	-3.72	-1.26

* Estimated.

As we have pointed out in previous reports, it is possible to reflect the actual conditions of the industries of the State from

the returns made to this Department by representative establishments in each year. From the preceding table, it is seen that the value of goods made and work done in 1900 shows an increase over 1899 of 8.51 per cent. This percentage is based upon the returns made by 4,645 establishments and in the absence of more complete information may be accepted as being applicable to the State as a whole. In the following table, we show for the nine leading industries and for All Industries the value of product for the Census year 1895 and the estimated product for 1898, 1899, and 1900.

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE			
	1895	1898	1899	1900
ALL INDUSTRIES.	\$849,807,302	\$865,619,185	\$1,000,569,216	\$1,085,717,656
Boots and shoes,	122,135,081	181,162,578	150,259,849	152,333,435
Carpetings,	7,447,115	5,982,370	7,299,188	7,989,327
Cotton goods,	93,615,560	90,986,069	100,958,142	127,964,445
Leather,	*25,694,407	23,161,557	28,632,817	26,516,389
Machines and machinery, . . .	33,492,848	34,797,770	46,548,977	59,196,334
Metals and metallic goods, . .	40,297,899	40,426,780	51,447,120	53,983,463
Paper,	†27,955,024	22,212,585	26,731,926	24,818,848
Woollen goods,	29,370,963	30,369,533	33,331,731	39,474,769
Worsted goods,	20,975,996	25,664,722	32,540,301	30,564,391

* Includes Leather Goods.

† Includes Paper Goods.

The values shown in the first column of the above table are taken from the Census report of 1895 and cover the output of all the establishments engaged in manufacturing and mechanical industries in that year. For 1898, 1899, and 1900, the figures are estimates based upon the percentages of increase or decrease as shown by these annual reports, which, as has been stated, are derived from a considerable number of representative establishments making returns in each of the years 1895 to 1900, inclusive. In other words, had a complete Census been taken on December 31, 1900, the aggregate value of goods made and work done in all the establishments would have approximated \$1,085,717,656, and the value of the product in each of the nine leading industries would have approximated the figures given in the last column of the table.

In the next table, we present the estimated value of goods

made and work done in 1900 in the various industries of the State based, also, upon the percentages of increase or decrease since 1895 as derived from the establishments making return for these annual reports.

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE	
	1899	1900
Agricultural implements,	\$1,253,206	\$1,344,063
Arms and ammunition,	2,833,390	3,096,184
Artisans' tools,	4,191,979	4,779,694
Awnings, sails, tents, etc.,	603,765	606,776
Bicycles, tricycles, etc.,	3,249,519	3,421,867
Boots and shoes,	150,258,649	152,333,435
Boxes, barrels, kegs, etc.,	4,754,558	5,326,531
Boxes (paper),	2,371,416	2,396,316
Brick, tiles, and sewer pipe,	1,599,550	1,759,665
Brooms, brushes, and mops,	1,691,331	1,893,614
Building materials,	2,340,565	2,493,872
Burial cases, caskets, coffins, etc.,	394,867	430,060
Buttons and dress trimmings,	13,677,499	13,186,477
Carpetings,	7,399,188	7,639,327
Carriages and wagons,	11,687,900	12,252,321
Cement, kaolin, lime, and plaster,	345,962	347,761
Chemical preparations (compounded),	1,749,684	2,213,700
Clocks and watches,	2,327,541	3,451,278
Clothing,	39,447,360	43,190,936
Cooking, lighting, and heating apparatus,	4,592,369	4,668,623
Cordage and twine,	8,960,041	10,769,969
Cotton goods,	100,368,142	127,964,445
Crayons, pencils, crucibles, etc.,	176,388	185,013
Drugs and medicines,	8,635,784	9,015,758
Dyestuffs,	880,667	654,159
Earthen, plaster, and stone ware,	213,821	200,436
Electrical apparatus and appliances,	9,866,957	12,324,316
Electroplating,	401,691	421,012
Emery and sand paper and cloth, etc.,	1,535,180	1,521,977
Fancy articles, etc.,	909,568	978,967
Fertilizers,	1,881,646	1,518,965
Fine arts and taxidermy,	64,237	76,883
Fireworks and matches,	143,969	154,313
Flax, hemp, and jute goods,	3,608,838	4,246,520
Food preparations,	100,024,141	102,284,687
Furniture,	14,509,483	14,731,473
Glass,	466,342	433,325
Glue, isinglass, and starch,	1,413,264	1,436,442
Hair work (animal and human),	573,403	484,067
Hose: rubber, linen, etc.,	1,017,487	1,262,496
Hosiery and knit goods,	5,924,407	7,196,377
Ink, mucllage, and paste,	741,479	756,363
Ivory, bone, shell, and horn goods, etc.,	2,068,945	2,350,035
Jewelry,	11,543,429	11,720,043

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE	
	1899	1900
Leather,	\$28,632,317	\$26,516,389
Leather goods,	4,045,960	4,196,065
Liquors (bottled) and carbonated beverages,	954,453	968,366
Liquors (malt),	13,517,444	14,446,092
Liquors (distilled),	1,495,830	1,533,375
Lumber,	5,932,916	6,015,977
Machines and machinery,	46,548,977	59,196,334
Metals and metallic goods,	51,447,120	53,963,463
Models, lasts, and patterns,	1,218,589	1,179,960
Musical instruments and materials,	7,400,626	8,149,569
Oils and illuminating fluids,	1,561,210	1,434,284
Paints, colors, and crude chemicals,	1,477,745	1,502,719
Paper,	23,731,926	24,818,848
Paper goods,	6,499,265	7,246,660
Perfumes, toilet articles, etc.,	225,868	280,566
Photographs and photographic materials,	2,114,217	2,064,132
Polishes and dressing,	2,447,751	3,061,963
Printing, publishing, and bookbinding,	29,401,941	30,616,241
Print works, dye works, and bleacheries,	27,509,367	29,506,547
Railroad construction and equipment,	6,823,849	7,070,872
Rubber and elastic goods,	25,940,548	24,879,580
Saddlery and harness,	2,406,456	2,487,453
Scientific instruments and appliances,	2,789,323	3,244,262
Shipbuilding,	2,397,879	3,083,912
Silk and silk goods,	6,174,366	5,639,048
Sporting and athletic goods,	706,842	862,135
Stone,	6,332,181	6,418,932
Straw and palm leaf goods,	5,356,980	5,354,837
Tallow, candles, soap, and grease,	4,071,066	4,542,903
Tobacco, snuff, and cigars,	4,873,242	5,314,758
Toys and games (children's),	991,611	1,088,392
Trunks and valises,	194,278	192,549
Whips, lashes, and stocks,	1,468,427	1,514,208
Wooden goods,	9,587,231	10,613,065
Woollen goods,	33,331,731	39,474,769
Worsted goods,	32,540,301	30,594,391

In the following table is shown the increase (+), decrease (—), or no change (=) in 1900 as compared with 1899 in amount of capital invested, value of product, average number of persons employed, total amount of wages paid, average number of days in operation, and average proportion of business done :

INDUSTRIES.	INCREASE (+), DECREASE (-), OR NO CHANGE (=) IN 1900 AS COMPARED WITH 1899 IN —					
	Capital	Product	Persons	Wages	Days	Pro- portion
Agricultural implements,	—	+	+	+	+	—
Arms and ammunition,	+	+	+	+	—	+

ALL INDUSTRIES,	+	+	+	+	—	—

All Industries, in the aggregate, shows an increase in each of the elements considered except average number of days in operation and average proportion of business done. The same is true for the following seven industries :

Boxes (Paper).	Printing, Publishing, and Bookbinding.
Cotton Goods (Woven).	Print Works, Dye Works, and Bleacheries.
Liquors (Distilled).	
Metals and Metallic Goods.	
Polishes and Dressing.	

The following 14 industries exhibit an increase in each of the elements considered :

Boots and Shoes (Findings).	Hosiery and Knit Goods.
Brick, Tiles, and Sewer Pipe.	Ivory, Bone, Shell, and Horn Goods, etc.
Burial Cases, Caskets, Coffins, etc.	Scientific Instruments and Appliances.
Clocks and Watches.	Shipbuilding.
Cordage and Twine.	Stone (Quarried).
Electrical Apparatus and Appliances.	Tallow, Candles, Soap, and Grease.
Fireworks and Matches.	
Hose: Rubber, Linen, etc.	

The following industries exhibit decreases in each of the elements considered :

Boots and Shoes (Soles, Heels, and Cut Stock).	Oils and Illuminating Fluids.
Dyestuffs.	Rubber and Elastic Goods.
Glass.	Silk and Silk Goods.
	Worsted Goods.

In the following table, data relative to establishments controlled by private firms, by corporations, and by industrial combinations for the year 1900 are shown :

CLASSIFICATION.	Private Firms	Corporations	Industrial Combinations
Number of establishments,	3,301	1,260	84
Aggregate capital invested,	\$95,850,027	\$317,234,910	\$43,600,311
Average capital per establishment,	\$29,037	\$251,774	\$519,051
Value of goods made and work done,	\$247,118,611	\$481,665,384	\$70,569,682
Average product per establishment,	\$74,862	\$382,274	\$840,115

CLASSIFICATION.	Private Firms	Corporations	Industrial Combinations
Number of persons employed:			
Average number,	112,013	245,990	22,938
Smallest number,	89,214	212,267	16,276
Greatest number,	136,099	271,760	26,943
Average number per establishment,	34	195	273
Total amount paid in wages,	\$52,513,347	\$105,716,332	\$9,219,594
Average paid per establishment,	\$15,908	\$83,902	\$109,757
Average yearly earnings,	\$468.81	\$429.76	\$401.94

From the above table it is seen that in the 3,301 establishments managed by the private firms there was invested as capital necessary for the production of goods, the sum of \$95,850,027, or, on an average, \$29,037 per establishment. In the 1,260 establishments controlled by corporations, the capital invested was \$317,234,910, or an average of \$251,774 per establishment. In the 84 establishments under the direction of industrial combinations, the aggregate capital was \$43,600,311, or an average of \$519,051 per establishment.

The value of goods made and work done by the private firms was \$247,118,611; by corporations, \$481,665,384; and by industrial combinations, \$70,569,682. The averages per establishment were, for private firms, \$74,862; corporations, \$382,274; and industrial combinations, \$840,115.

The average number of persons employed in the establishments controlled by private firms was 112,013, or 34 persons per establishment, on an average; by corporations, 245,990, or 195 persons per establishment; and by industrial combinations, 22,938, or 273 persons per establishment.

The total amount disbursed as wages in establishments managed by private firms was \$52,513,347, or \$15,908 per establishment, making the average annual earnings for each man, woman, and young person, \$468.81. In the establishments controlled by corporations the amount paid in wages was \$105,716,332, an average of \$83,902 per establishment, and an average for each person, irrespective of sex or age, of \$429.76. In the establishments controlled by industrial com-

binations \$9,219,594 was paid in wages, an average per establishment of \$109,757, and an average yearly earning per individual of \$401.94. In other words, the private firms have 20.99 per cent of the capital invested, produce 30.91 per cent of the value of the product, employ 29.40 per cent of the average number of persons, and pay 31.36 per cent of the wages paid in all the establishments considered. The corporations have invested 69.46 per cent of the total capital, manufacture 60.26 per cent of the product, employ 64.58 per cent of the total average number of persons employed, and pay 63.13 per cent of the aggregate amount paid in wages. The industrial combinations have 9.55 per cent of the aggregate capital invested, turn out 8.83 per cent of the total value of goods made, employ 6.02 per cent of the total average number of persons employed, and pay to them 5.51 per cent of the total amount paid out in wages.

For purposes of comparison, we present in the following table data relative to industrial combinations in 1899 and 1900:

CLASSIFICATION.	1899	1900	INCREASE (+) OR DECREASE (-) IN 1900	
			Amounts	Percent- ages
Number of establishments,	84	84	-	-
Aggregate capital invested,	\$45,648,374	\$43,600,311	-\$2,048,063	-4.49
Average capital per combination,	\$2,074,926	\$1,981,832	-\$93,094	-4.49
Value of goods made and work done,	\$82,753,784	\$70,569,682	+\$7,815,898	+12.45
Average product per combination,	\$2,852,445	\$3,207,713	+\$355,268	+12.45
Average number of persons employed,	23,442	22,938	-504	-2.15
Total amount paid in wages,	\$9,200,866	\$9,219,594	+\$18,728	+0.20
Average yearly earnings,	\$392.49	\$401.94	+\$9.45	+2.41

The 84 establishments considered above were controlled by 22 industrial combinations and had a capital invested in 1899 of \$45,648,374, falling in 1900 to \$43,600,311, a decrease of 4.49 per cent. The average capital per combination was \$2,074,926 in 1899 and \$1,981,832 in 1900, a corresponding decrease (4.49 per cent) in the latter year. The value of goods made and work done shows an increase of 12.45 per cent in 1900 as compared with 1899; the average number of persons employed, a decrease of 2.15 per cent accompanied by a slight increase of 0.20 per cent in total amount paid in

wages, and an increase of 2.41 per cent in the average amount earned annually by each employé.

The following table exhibits the industry product for the nine leading industries, as distinguished from the normal value of goods made and work done, together with the "Profit and Minor Expense Fund."

INDUSTRIES.	Value of Goods Made	Value of Stock Used	Industry Product	Paid in Wages	Profit and Minor Expense Fund
Boots and shoes,	\$129,189,130	\$80,966,554	\$48,222,576	\$27,476,207	\$20,746,369
Carpetings,	7,762,492	4,744,696	3,017,796	1,722,180	1,295,616
Cotton goods,	125,494,899	66,162,140	59,332,759	33,453,372	25,879,387
Leather,	18,381,491	13,905,787	4,475,704	2,327,200	2,148,504
Machines and machinery, .	50,833,138	18,673,352	32,159,786	16,416,828	15,742,958
Metals and metallic goods, .	29,746,722	15,297,738	14,448,984	7,755,689	6,693,295
Paper,	21,491,529	12,486,281	9,005,248	3,778,900	5,226,348
Woollen goods,	38,001,317	21,898,179	16,103,138	8,004,814	8,098,324
Worsted goods,	32,173,485	19,377,717	12,795,778	5,459,841	7,335,937

In the above table, the value of goods made and the value of stock and materials used are shown in the first two columns. The industry product is given in the third column and is obtained by subtracting from the value of goods made and work done the value of stock used. The fifth column of the table shows the profit and minor expense fund, which is obtained by subtracting from the industry product the amount paid out in wages. Industry product represents the actual result of the productive forces in the industry, that is, the added value created above the value of stock and materials consumed by the union of labor and capital. In the division of the proceeds of each industry, one part of this industry product is paid to the labor force in the form of wages, this being labor's direct share of the product. The balance constitutes a fund from which are paid freights, insurance, interest on loans (credit capital), interest on stock (fixed or invested capital), rents, commissions, salaries, etc.; in fact, all expenses other than those for stock and wages. The remainder, if any, is the profit of the employer. The entire balance of the industry product remaining after the deduction of the amount paid in wages, becomes a "Profit and Minor Expense Fund," and is thus designated in the table. Of course, it will be understood that the term "Minor Expense" is relative. The

expenses, some of which we have enumerated, paid out of this balance, are in themselves considerable in amount, and are only to be classed as "Minor" in comparison with the generally larger amounts expended for materials (stock) and wages.

The next table presents the actual product per \$1,000 of capital invested in each of the nine leading industries, with the average product per employé, the percentage of industry product paid in wages, and the percentage devoted to other expenses for the year 1900.

INDUSTRIES.	Capital Invested	Average Persons Employed	INDUSTRY PRODUCT		PERCENTAGES OF INDUSTRY PRODUCT	
			Per \$1,000 of Capital	Average per Employé	Devoted to Profit and Minor Expenses	Paid in Wages
Boots and shoes, . . .	\$26,716,110	59,288	\$1,805.00	\$813.36	43.02	56.98
Carpetings, . . .	6,546,465	4,609	460.98	654.76	42.93	57.07
Cotton goods, . . .	129,544,848	92,625	458.01	640.57	43.62	56.38
Leather, . . .	6,143,081	4,827	728.58	927.22	48.00	52.00
Machines and machinery,	40,813,722	29,623	787.97	1,085.64	48.95	51.05
Metals and metallic goods,	17,676,413	15,155	817.42	953.41	46.32	53.68
Paper, . . .	20,218,471	8,906	445.40	1,011.14	58.04	41.96
Woollen goods, . . .	24,673,165	19,912	652.66	808.72	50.29	49.71
Worsted goods, . . .	15,829,430	14,534	808.35	880.40	57.33	42.67

The efficiency of the capital invested in these industries during 1900 is shown in the third column of the table, the largest product per \$1,000 of capital invested being found in Boots and Shoes, namely, \$1,805. No other industry approaches this figure; the nearest to it, however, is Metals and Metallic Goods, the industry product per \$1,000 of invested capital being \$817.42. The lowest industry product is found in Paper, \$445.40 for each \$1,000 of capital invested. The fourth column of the table shows the efficiency of labor. With respect to this point, the industries Machines and Machinery and Paper head the list, the average industry products per employé being \$1,085.64 and \$1,011.14, respectively. The lowest industry product per employé is found in Cotton Goods, the average being \$640.57.

When the percentage of industry product paid in wages is considered, we find that Carpetings leads, the percentage being 57.07. Next ranks Boots and Shoes, the percentage being 56.98, followed in turn by Cotton Goods, Metals and

Metallic Goods, Leather, Machines and Machinery, Woollen Goods, Worsted Goods, and Paper. The percentages of industry product paid in wages are the complements of the percentages of industry product devoted to profit and minor expenses, these two items aggregating 100 per cent, or the whole of the industry product.

Below we compare the rank of the different industries in 1900 as regards the amount of industry product per \$1,000 of capital, with the rank of the same industries for 1899 as derived from the report on Annual Statistics of Manufactures for that year.

1899.

Boots and Shoes.
Leather.
Metals and Metallic Goods.
Worsted Goods.
Machines and Machinery.
Woollen Goods.
Carpetings.
Paper.
Cotton Goods.

1900.

Boots and Shoes.
Metals and Metallic Goods.
Worsted Goods.
Machines and Machinery.
Leather.
Woollen Goods.
Carpetings.
Cotton Goods.
Paper.

In the above comparison Boots and Shoes, Woollen Goods, and Carpetings retain in 1900 the rank held in 1899. Leather falls from second place to fifth in 1900, advancing Metals and Metallic Goods, Worsted Goods, and Machines and Machinery from third to second, fourth to third, and fifth to fourth place, respectively. Cotton Goods rises from ninth to eighth place, changing position with Paper.

With respect to the average industry product per employé, the rank of the industries in each of the years appears as follows :

1899.

Machines and Machinery.
Paper.
Metals and Metallic Goods.
Leather.
Worsted Goods.
Boots and Shoes.
Woollen Goods.
Carpetings.
Cotton Goods.

1900.

Machines and Machinery.
Paper.
Metals and Metallic Goods.
Leather.
Worsted Goods.
Boots and Shoes.
Woollen Goods.
Carpetings.
Cotton Goods.

No change occurs in any of the above industries. Each retains the same rank in 1900 which it held in 1899.

The next comparison relates to the percentage of industry product paid in wages, the industries ranking as follows :

1899.	1900.
Cotton Goods.	Carpetings.
Boots and Shoes.	Boots and Shoes.
Carpetings.	Cotton Goods.
Metals and Metallic Goods.	Metals and Metallic Goods.
Machines and Machinery.	Leather.
Leather.	Machines and Machinery.
Woollen Goods.	Woollen Goods.
Worsted Goods.	Worsted Goods.
Paper.	Paper.

Carpetings rose from third to first place in 1900 and Cotton Goods fell from first to third. Leather and Machines and Machinery changed places, the former holding the fifth place in 1900 as against sixth in 1899. All of the other industries held the same rank in both years.

In this connection, we present a series of separate tables for the nine leading industries for 1899 and 1900, bringing forward for that purpose data contained in the tables on pages 145 and 146.

The first relates to Boots and Shoes.

Boots and Shoes. [Comparison for 673 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$27,182,381	\$28,716,110
Value of goods made and work done (gross product),	\$127,427,884	\$129,189,130
Value of stock used and other materials consumed in production,	\$80,829,679	\$80,966,554
Industry product (gross product less value of stock and materials),	\$46,598,205	\$48,222,576
Wages (labor's direct share of product),	\$27,648,530	\$27,476,207
Profit and minor expense fund (industry product less wages),	\$18,949,675	\$20,746,369
Percentage of industry product paid in wages,	59.33	56.98
Percentage of industry product devoted to profit and minor expenses,	40.67	43.02
Percentage of profit and minor expense fund of capital invested,	69.71	77.65

The percentages of industry product paid in wages in 1899 and 1900 were 59.33 and 56.98, respectively, a decrease in

the last named year. The percentage of industry product devoted to profit and minor expenses shows an increase, being 40.67 in 1899 and 43.02 in 1900. The percentage which this profit and minor expense fund formed of capital invested was 69.71 in 1899, rising to 77.65 in 1900; that is to say, a smaller proportion of the amount remaining in this industry, after eliminating the cost of stock, was devoted to wages in 1900 than in 1899, leaving a larger amount for the payment of expenses (other than wages and stock) and for profit, and this amount formed a larger percentage of the total capital invested in the industry in 1900 than in 1899.

A similar comparison for Carpetings follows :

Carpetings. [Comparison for 12 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$6,612,557	\$6,546,465
Value of goods made and work done (gross product),	\$7,136,878	\$7,762,492
Value of stock used and other materials consumed in production,	\$4,187,029	\$4,744,696
Industry product (gross product less value of stock and materials),	\$2,949,849	\$3,017,796
Wages (labor's direct share of product),	\$1,650,257	\$1,722,180
Profit and minor expense fund (industry product less wages),	\$1,299,592	\$1,295,616
Percentage of industry product paid in wages,	55.94	57.07
Percentage of industry product devoted to profit and minor expenses,	44.06	42.93
Percentage of profit and minor expense fund of capital invested,	19.65	19.79

The percentage of industry product paid in wages in this industry was 55.94 in 1899, and 57.07 in 1900; deducting wages, the fund devoted to profit and minor expenses fell from 44.06 in 1899 to 42.93 in 1900, and this fund formed practically the same percentage of the capital invested in 1900 as in 1899, being 19.65 in 1899 and 19.79 in 1900.

The next table presents a comparison for Cotton Goods.

Cotton Goods. [Comparison for 162 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$127,908,334	\$129,544,848
Value of goods made and work done (gross product),	\$99,006,249	\$125,494,699
Value of stock used and other materials consumed in production,	\$50,956,971	\$66,162,140

Cotton Goods. [Comparison for 162 Establishments] — Concluded.

CLASSIFICATION.	1899	1900
Industry product (gross product less value of stock and materials),	\$48,051,278	\$59,332,759
Wages (labor's direct share of product),	\$29,927,858	\$38,458,372
Profit and minor expense fund (Industry product less wages), .	\$18,123,420	\$25,879,387
Percentage of industry product paid in wages,	62.28	56.38
Percentage of industry product devoted to profit and minor expenses,	37.72	43.62
Percentage of profit and minor expense fund of capital invested,	14.17	19.98

In this industry, the percentage of industry product paid in wages fell from 62.28 in 1899 to 56.38 in 1900. Of course, the percentage of industry product devoted to profit and minor expenses correspondingly increased, being 43.62 in 1900 as against 37.72 in 1899. The profit and minor expense fund formed 14.17 per cent of capital invested in 1899, and 19.98 per cent in 1900.

The next table relates to Leather.

Leather. [Comparison for 90 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$5,912,612	\$6,143,081
Value of goods made and work done (gross product),	\$19,848,590	\$18,381,491
Value of stock used and other materials consumed in production,	\$15,040,299	\$13,905,787
Industry product (gross product less value of stock and materials),	\$4,808,291	\$4,475,704
Wages (labor's direct share of product),	\$2,326,116	\$2,327,200
Profit and minor expense fund (Industry product less wages), .	\$2,482,175	\$2,148,504
Percentage of industry product paid in wages,	48.38	52.00
Percentage of industry product devoted to profit and minor expenses,	51.62	48.00
Percentage of profit and minor expense fund of capital invested,	41.98	34.97

This industry, like Carpetings, shows an increase in the percentage of industry product paid in wages, the proportions rising from 48.38 per cent in 1899 to 52 per cent in 1900. The percentage of industry product devoted to profit and minor expenses shows a decrease, 51.62 in 1899 as against 48 in 1900, and the percentage which this fund formed of the capital invested fell from 41.98 in 1899 to 34.97 in 1900.

The next table presents a comparison for Machines and Machinery.

Machines and Machinery. [Comparison for 358 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$38,758,110	\$40,813,722
Value of goods made and work done (gross product),	\$39,972,702	\$50,833,138
Value of stock used and other materials consumed in production, .	\$14,924,194	\$18,673,852
Industry product (gross product less value of stock and materials),	\$25,048,508	\$32,159,786
Wages (labor's direct share of product),	\$13,364,975	\$16,416,828
Profit and minor expense fund (industry product less wages), .	\$11,684,133	\$15,742,958
Percentage of industry product paid in wages,	53.35	51.05
Percentage of industry product devoted to profit and minor expenses,	46.65	48.95
Percentage of profit and minor expense fund of capital invested, .	30.15	38.57

The percentage of industry product paid in wages in this industry fell from 53.35 in 1899 to 51.05 in 1900, while the percentage of industry product devoted to profit and minor expenses rose from 46.65 in 1899 to 48.95 in 1900. An increase is also found in the percentage of profit and minor expense fund of capital invested, namely, 30.15 in 1899 as against 38.57 in 1900.

A comparison for Metals and Metallic Goods follows :

Metals and Metallic Goods. [Comparison for 374 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$17,583,868	\$17,676,413
Value of goods made and work done (gross product),	\$28,349,404	\$29,746,722
Value of stock used and other materials consumed in production, .	\$14,945,612	\$15,297,738
Industry product (gross product less value of stock and materials),	\$13,403,792	\$14,448,984
Wages (labor's direct share of product),	\$7,402,352	\$7,755,689
Profit and minor expense fund (industry product less wages), .	\$6,001,440	\$6,693,295
Percentage of industry product paid in wages,	55.23	53.68
Percentage of industry product devoted to profit and minor expenses,	44.77	46.32
Percentage of profit and minor expense fund of capital invested, .	34.13	37.87

In this industry, the percentage of industry product paid in wages fell from 55.23 in 1899 to 53.68 in 1900, and the percentage of industry product devoted to profit and minor

expenses rose from 44.77 in 1899 to 46.32 in 1900. The percentage of profit and minor expense fund of capital invested rose from 34.13 in 1899 to 37.87 in 1900.

The facts for Paper are as follows :

Paper. [Comparison for 75 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$20,499,173	\$20,218,471
Value of goods made and work done (gross product),	\$20,550,518	\$21,491,529
Value of stock used and other materials consumed in production,	\$11,302,065	\$12,486,281
Industry product (gross product less value of stock and materials),	\$9,248,463	\$9,005,248
Wages (labor's direct share of product),	\$3,811,989	\$3,778,900
Profit and minor expense fund (Industry product less wages),	\$5,436,524	\$5,226,348
Percentage of industry product paid in wages,	41.22	41.96
Percentage of industry product devoted to profit and minor expenses,	58.78	58.04
Percentage of profit and minor expense fund of capital invested,	26.52	25.85

In this industry, the percentage of industry product paid in wages shows slight change, it being 41.22 in 1899 and 41.96 in 1900. Its complement, therefore, the percentage of industry product devoted to profit and minor expenses, is also similar for the two years, 58.78 in 1899 and 58.04 in 1900. The percentage which the profit and minor expense fund formed of capital invested was 26.52 in 1899 and 25.85 in 1900.

The next table relates to Woollen Goods.

Woollen Goods. [Comparison for 140 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$27,252,551	\$24,673,165
Value of goods made and work done (gross product),	\$32,074,688	\$38,001,317
Value of stock used and other materials consumed in production,	\$18,424,789	\$21,898,179
Industry product (gross product less value of stock and materials),	\$13,649,899	\$16,103,138
Wages (labor's direct share of product),	\$6,968,810	\$8,004,814
Profit and minor expense fund (Industry product less wages),	\$6,681,080	\$8,098,324
Percentage of industry product paid in wages,	51.05	49.71
Percentage of industry product devoted to profit and minor expenses,	48.95	50.29
Percentage of profit and minor expense fund of capital invested,	24.52	32.82

In this industry, a falling off is noted in the percentage of industry product paid in wages, the decline being from 51.05 in 1899 to 49.71 in 1900, matched by a corresponding increase in the percentage of industry product devoted to profit and minor expenses, which rose from 48.95 in 1899 to 50.29 in 1900. The percentage which the profit and minor expense fund formed of capital invested also shows an increase, rising from 24.52 in 1899 to 32.82 in 1900.

The final table relates to Worsted Goods.

Worsted Goods. [Comparison for 34 Establishments.]

CLASSIFICATION.	1899	1900
Amount of capital invested,	\$17,980,205	\$15,829,430
Value of goods made and work done (gross product),	\$34,220,442	\$32,173,495
Value of stock used and other materials consumed in production,	\$19,549,806	\$19,377,717
Industry product (gross product less value of stock and materials),	\$14,670,636	\$12,795,778
Wages (labor's direct share of product),	\$5,480,110	\$5,459,841
Profit and minor expense fund (industry product less wages),	\$9,190,526	\$7,335,937
Percentage of industry product paid in wages,	37.35	42.67
Percentage of industry product devoted to profit and minor expenses,	62.65	57.33
Percentage of profit and minor expense fund of capital invested,	51.11	46.34

In this industry, an increase in the percentage of industry product paid in wages is found, 37.35 in 1899 and 42.67 in 1900. The percentage of industry product devoted to profit and minor expenses decreased from 62.65 in 1899 to 57.33 in 1900, and the percentage the profit and minor expense fund formed of capital invested fell from 51.11 in 1899 to 46.34 in 1900.

Condensed Statements.

On the basis of the reports made by the 4,645 representative establishments, the following condensed general statements may be made regarding the manufacturing and mechanical industries in the Commonwealth for the years 1899 and 1900:

CAPITAL INVESTED.

The increase in capital devoted to production in 1900 as compared with 1899 in All Industries amounted to 1.78 per cent. This increase does not necessarily imply an investment of more money in industrial enterprises, nor, on the other hand, does a decrease imply the withdrawal of capital, since there are various elements by which it is affected. For example, a small amount of stock on hand or in process of manufacture at the time the return is made would have its effect in showing diminished capitalization, without, of course, affecting the condition of the industry; and, on the other hand, an investment in stock purchased in a favorable market, the same being held at the time of making the return, would render the amount of capital invested relatively larger than would be found at a time when the stock on hand was comparatively light.

Concerning the nine leading industries, the following facts appear: Cotton Goods shows an increase in capital invested of 1.28 per cent; Leather, 3.90 per cent; Machines and Machinery, 5.30 per cent; and Metals and Metallic Goods, 0.53 per cent. A decrease in amount of capital is shown in Boots and Shoes of 1.72 per cent; Carpetings, 1.00 per cent; Paper, 1.37 per cent; Woollen Goods, 9.46 per cent; and Worsted Goods, 11.96 per cent. The aggregate for the nine leading industries exhibits a decrease of 0.53 per cent.

STOCK USED.

Considered in the aggregate, the value of stock used in All Industries in 1900 shows an increase of 8.57 per cent as compared with 1899. Boots and Shoes shows an increase of 0.17

per cent; Carpetings, 13.32 per cent; Cotton Goods, 29.84 per cent; Machines and Machinery, 25.12 per cent; Metals and Metallic Goods, 2.36 per cent; Paper, 10.48 per cent; and Woollen Goods, 18.85 per cent. Leather and Worsted Goods show percentages of decrease of 7.54 and 0.88, respectively. The increase in the value of stock used in the nine leading industries in the aggregate was 10.15 per cent.

GOODS MADE.

The aggregate value of goods made and work done in All Industries in 1900 as compared with 1899 shows an increase of 8.51 per cent. In seven of the nine leading industries percentages of increase are shown as follows: Boots and Shoes, 1.38; Carpetings, 8.77; Cotton Goods, 26.75; Machines and Machinery, 27.17; Metals and Metallic Goods, 4.93; Paper, 4.58; and Woollen Goods, 18.48. Leather shows a decrease of 7.39 per cent and Worsted Goods of 5.98 per cent. The aggregate increase for the nine leading industries was 10.89 per cent.

The value of goods made and work done in the 4,645 establishments considered, in 1900, was \$799,353,677. Of this amount, 30.91 per cent was produced in establishments controlled by private firms, 60.26 per cent in establishments controlled by corporations, and 8.83 per cent in establishments controlled by industrial combinations.

PERSONS EMPLOYED.

The increase in the average number of persons employed in All Industries in 1900 as compared with 1899 was 3.77 per cent. An increase is also shown in the smallest number of persons employed of 1.83 per cent; while the number of persons employed at periods of employment of the greatest number shows an increase of 3.35 per cent, with a range of unemployment wider in 1900 than in 1899 by 8,398 persons, or 7.73 per cent. In six of the leading industries an increase in the aver-

age number of persons employed appears, the percentages being as follows: *Boots and Shoes*, 0.73; *Carpetings*, 2.20; *Cotton Goods*, 2.71; *Machines and Machinery*, 20.99; *Metals and Metallic Goods*, 3.52; and *Woollen Goods*, 7.97. In the other three industries decreases are shown, the percentages being: *Leather*, 3.07; *Paper*, 0.24; and *Worsted Goods*, 2.94. The average number of males employed in *All Industries* increased 4.69 per cent, and females 1.95 per cent.

Of the aggregate number of persons employed, 29.40 per cent were employed by private firms, 64.58 per cent by corporations and 6.02 per cent by industrial combinations.

WAGES PAID.

The total amount paid in wages in the 4,645 establishments increased 6.67 per cent in 1900 as compared with 1899. In six of the nine leading industries the following percentages of increase appear: *Carpetings*, 4.36; *Cotton Goods*, 11.78; *Leather*, 0.05; *Machines and Machinery*, 22.84; *Metals and Metallic Goods*, 4.77; and *Woollen Goods*, 14.87. In the other three industries the following percentages of decrease appear: *Boots and Shoes*, 0.62; *Paper*, 0.87; and *Worsted Goods*, 0.37. Of the aggregate amount paid in wages, 31.36 per cent was disbursed by private firms, 63.13 per cent by corporations, and 5.51 per cent by industrial combinations.

AVERAGE YEARLY EARNINGS.

The average yearly earnings per individual, without regard to sex or age, was \$427.60 in 1899, and \$439.57 in 1900, an increase of \$11.97, or 2.80 per cent in the latter year. The range from highest to lowest average, in 1900, was from \$818.65 in *Liquors (Malt)* to \$323.59 in *Flax, Hemp, and Jute Goods*. The higher earnings rule in the industries demanding greater skill and employing males chiefly, and the lower in factory industries employing a large proportion of females and young persons. The estimated average amount earned during 1900 by adult males is \$530.82; adult females, \$334.70; and young persons, \$228.33.
